

3/8"
Low Profile

Micro-Lite® Bar and Chain System for Narrow-Kerf Cutting

SPECIFICATIONS

Chain Pitch

Chain Gauge

1.1mm (.043")

Cutter Style

Chamfer-chisel™

Kickback Reduction

Ramped Depth Gauge

Recommended Bar Length

6-16"
(30-41 cm)

Recommended Saw Sizes

2.5 cu. in. (41 cc)
gas and electric pole saws

Recommended User

Commercial

Professional

FEATURES

Micro-Lite® narrow-kerf

BENEFITS

- Less power is required to make the same cut
- Use with Micro-Lite® bar to obtain all the advantages of the Micro-Lite® system

- Outstanding performance, fast and efficient cutting
- Excellent stay-sharp

Tall cutter shape

- Makes sharpening easier

- Helps keep oil where it's needed, on the chain
- Directs oil to the critical rivet flange/hole interface

- Helps carry oil around the full length of the guide bar's groove

- Reduces vibration 25% or more at the saw handles

- Provides a visual guide to better maintain a proper filing angle

90S — MICRO-LITE™ SAW CHAIN

SHARPENING NOTES

When using an OREGON® file guide, ALWAYS hold it level, 0°, flat on the Top Plate

WARNING

Failure to follow filing instructions can increase the level of kickback which can result in severe injury to the saw operator or bystanders.

- * Do not exceed the depth-gauge setting shown (right).
- * Always file depth gauges back to their original rounded or ramped shape after lowering.

WARNING

OREGON® 90S – Micro-Lite™ chain may be capable of kickback that could result in serious injury to the saw operator or bystanders. Although these chains have features designed to reduce kickback energies, these are NOT low-kickback chains. Do not use OREGON® 90S – Micro-Lite™ chain unless you have experience and specialized training for dealing with kickback. Saw chain with lower kickback potential is available.

SHARPENING & GRINDING TOOL PART NUMBERS

	511AX	31692	70511 (12)	OR 534-18 (5-3/4" Dia.)	12211 (12)	31941 (10)
