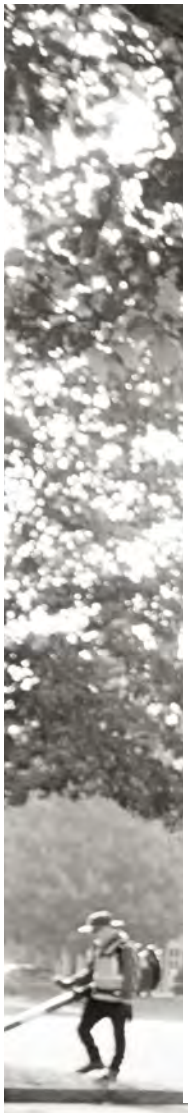
## 40V Cordless Product Line

Pull the trigger for instant start with constant no-fade power and long run time. Cleaner, quieter, and free from the hassles of gasoline or corded power, Oregon Cordless Tools are engineered to work the way you want, when you want. With the 40V Max* Lithium-Ion battery platform, you have all the power and run time you need to get the job done.

### THE OREGON ADVANTAGE:

- Ergonomically designed. Light and optimal balance for less fatigue
- Low noise and easy to use
- Hassle free with low maintenance
- High performance to tackle the toughest jobs
- Versatile battery and charger platform works with all tools
- A full comprehensive line allows you to complete all the jobs you need done—from tree and hedge trimming to grass cutting, leaf blowing and general yard cleanup

*See pages 8–29*



## 120V Professional Series™

The Oregon 120V Professional Series was developed specifically with the professional landscaper in mind. The platform combines cutting-edge technologies to finally offer the power and durability of traditional tools with all the advantages of battery power. With the ability to run a full day of real commercial work with minimal, if any, need for a fresh battery, this equipment provides the muscle needed to finish the job.

### THE OREGON ADVANTAGE:

- Battery capacity for a full day's work
- Efficient brushless electric power to match gas
- Smart controller to manage tool performance – automatically
- IP56 weather-ready rating to withstand life in the outdoors rain or shine
- Integrated dashboards communicate charge level and equipment diagnostics
- Advanced noise and vibration damping technology integrated into all tools
- Robust build quality to endure real professional-grade use

*See pages 30–37*

40V* MAX LITHIUM-ION

# Oregon® Cordless Tool System

## INSTANT START
- No Pull Cords
- No Warm-Up Required
- No Gas-Oil Mixing

## COMFORT AND CONTROL
- Ergonomic Design
- Light-Weight and Balanced
- Low Vibration

## LOW NOISE
- Significantly Quieter than Gas-Powered Motors
- Silent Between Cuts/ Trimming
- Start Early and Work Late

## ZERO EMISSIONS
- Environmentally Friendly
- No Gas Fumes

## LESS DOWN TIME
- Fewer Repairs Needed (Compared to Gas Engines)

## PowerNow™ Lithium Ion Battery Packs

The Oregon® battery platform provides all the power you need to get the job done. Our PowerNow premium cell technology ensures a long run time. Superior construction makes all our batteries rugged and durable.

### PREMIUM CELL TECHNOLOGY
Light-weight premium cells combine reliable performance & energy capacity.

### CONSTANT NO-FADE POWER
Maintain constant power through discharge.

### RETAINS CHARGE
Retains a charge even after months of storage.

### CONSISTENT CAPACITY
Charge maintenance and full discharge is not necessary to retain consistent capacity throughout the life of the battery (no memory effect).

## Cordless Multi-Attachment System

A versatile and powerful system designed for homeowners wanting to save time and money. The Oregon® Multi-Attachment System puts you in charge — choose only the attachments you need and build a customized system for you and your yard. The Oregon attachments work seamlessly with the Powerhead, and the brushless motor delivers sustainable power. Within seconds, you can switch from pruning your trees to trimming the grass around your flower bed.

### POWERFUL

- Brushless motor delivers more power and enhanced torque for higher efficiency.
- Plenty of power to trim and edge a large yard.
- Consistent lithium ion performance.

### EFFICIENT

- A single power source — no need to maintain multiple gas engines.
- Use any Oregon 40V MAX* battery.

### VERSATILE

- One system that uses your choice of Oregon interchangeable attachments.
- Seamlessly switch from high-volume jobs to precision work.
- Swap out one tool for another within seconds.

### STORABLE

- Takes up less space in your garage or shed.
- Fits easily in a truck bed or cargo space.
- Lighter weight makes it easy to move.

**SPECIFICATIONS**

- Brushless motor
- Compatible with all Oregon 40V MAX* batteries
- Variable speed trigger
- Transportation lock out
- Harness included
- Weighs 9.7 lbs (with battery)

### PS600 Pole Saw - 590990

**6.0 Ah = up to 750 cuts**
**4.0 Ah = up to 500 cuts**
**2.6 Ah = up to 325 cuts**

**SPECIFICATIONS**

- 10" Oregon bar
- 1/4 pitch Oregon chain 25AP
- Length 6'8"
- Length with EX600 extension 8'11"
- Oil tank capacity 3.4 oz (100 ml)
- Only 4 lbs

### EX600 Extension- 590988

**SPECIFICATIONS**

- For Oregon Hedge Trimmers and Pole Saw Multi-attachments
- 28" (70 cm)
- Only 1.4 lbs

# Cordless Multi-Attachment System

## HT600 Extended Hedge Trimmer - 590991

6.0 Ah = 65 to 70 min
4.0 Ah = 45 to 50 min
2.6 Ah = 30 to 35 min

### SPECIFICATIONS

- 15" (38 cm) blade
- Length 7'4"
- Length 9'7" with EX600 extension
- 3/5" (15 mm) tooth spacing
- 120º rotation, 7 positions
- Only 5.5 lbs

## ST600 String Trimmer- 590992

6.0 Ah = up to 30 min
4.0 Ah = up to 20 min
2.6 Ah = up to 15 min

### SPECIFICATIONS

- 14" (36 cm) cutting diameter
- Gator® SpeedLoad™ head
- .080" Gator SpeedLoad line
- 5500 r/min.
- Only 3.7 lbs

## EG600 Edger - 590989

6.0 Ah = up to 250 yards
4.0 Ah = up to 150 yards
2.6 Ah = up to 100 yards

### SPECIFICATIONS

- 8" (20 cm) cutting blade
- Oregon blade
- Only 5 lbs

## CS300 Chainsaw

40V MAX LITHIUM-ION

**6.0 Ah = up to 600 cuts**
**4.0 Ah = up to 400 cuts**
**2.6 Ah = up to 250 cuts**
In 2"-3" material.

The Oregon® chainsaw starts instantly and easily cuts through trees and tree limbs. The brushless motor delivers a powerful combination of speed and torque, and our premium 40V MAX* battery ensures zero emissions. Sharpen the chain in seconds with the built-in PowerSharp® system.

| OREGON | Description |
|---|---|
| **572627** | Chainsaw CS300 - Tool Only<br>40V MAX* chainsaw, 16" (40 cm) guide bar, PowerSharp chain |
| **572626** | Chainsaw Kit CS300 - E6<br>2.6 Ah battery, standard charger |
| **572625** | Chainsaw Kit CS300 - A6<br>4.0 Ah battery, standard charger |
| **586622** | Chainsaw Kit CS300 - R7<br>6.0 Ah battery, rapid charger |

### HIGH-PERFORMANCE
The chainsaw's innovative brushless motor delivers high power and torque. You can quickly and easily adjust the chain with the tool-less tensioner.

### ONBOARD POWERSHARP
Sharpen on the saw, and on the job, in seconds.™

### ERGONOMICALLY DESIGNED
Weighing only 12 lbs, the chainsaw is designed to distribute weight evenly for easy handling.

### SPECIFICATIONS
- 16" (40 cm) bar length.
- Automatic oiler with 4.1 oz tank capacity.
- No load chain speed 2796 fpm.
- Only 12 lbs (with battery).

## PowerSharp Sharpening System

With the built-in PowerSharp sharpening system, there's no more downtime due to dull chain. Simply pull the PowerSharp lever for 3–5 seconds and the chain works like new. PowerSharp: sharpen on the saw, on the job, in seconds.

*(see pages 136-137 of the FOR section of the catalog for more detail)*

## LM300 Lawn Mower

40V MAX LITHIUM-ION

**6.0 Ah = up to 7000 ft²**
**4.0 Ah = up to 5000 ft²**
Works with all Oregon batteries

The LM300 cuts large grass areas quickly and efficiently. The instant start and 6 adjustable cutting positions allow you to work in every season and on every type of lawn. The brushless motor, battery, and debris bag give you the power and capacity to clear your yard easily and efficiently.

| OREGON | Description |
|---|---|
| **591083** | Lawn Mower LM300 - Tool only |
| **591082** | Lawn Mower Kit LM300- A6<br>4.0 Ah battery, standard charger |
| **591081** | Lawn Mower Kit LM300 - R7<br>6.0 Ah battery, rapid charger |

### GREAT FOR SMALL TO MEDIUM YARDS

The LM300 starts instantly and makes cutting time more enjoyable. The brushless motor offers a combination of high-torque and efficiency, offering a quality cut and long run time (up to 7000 ft² with a full battery charge).

### LIGHT-WEIGHT/OPTIMAL BALANCE

The LM300 is light-weight (only 35.9 lbs with battery) and perfect for mowing around flower beds.

### SPECIFICATIONS

- Brushless motor
- 16" (40 cm) cutting width
- 13.2 gal (1.4 bushel) debris bag
- 35.9 lbs with battery
- 6 Cutting positions

**16" (40 cm) cutting width**

**Easily adjust cutting height**

**13.2 gal debris bag**

## NEW LM400 Lawn Mower

40V MAX LITHIUM-ION

**6.0 Ah = up to 10,000 ft²**
**4.0 Ah = up to 7,000 ft²**
With two batteries
Works with all Oregon batteries

Vertical Storage Position

Oregon's new LM400 Lawn Mower possesses the power capacity to cut any residential yard. The LM400's tough steel deck gives it the muscular look of a gas mower — without emissions and excess noise. The LM400 can run on only one battery, but it has the capacity for two — which the convenience of extended run time. The LM400 has a vertical storage position, so it will take up minimal space in your garage.

| OREGON | Description |
|---|---|
| **591080** | Lawn Mower LM400 - Tool only |
| **591079** | Lawn Mower Kit LM400 - A6<br>4.0 Ah battery, standard charger |
| **591078** | Lawn Mower Kit LM400 - R7<br>6.0 Ah battery, rapid charger |
| **591077** | Lawn Mower Kit LM400 - X7<br>Two 4.0 Ah batteries, rapid charger |

### HIGH PERFORMANCE

Cut more grass with fewer passes. The LM400's brushless motor delivers enhanced torque that allows you to cut high grass and tough vegetation on rough terrain. The LM400's 20" cutting diameter offers a wider cut for larger yards.

### SPECIFICATIONS

- Brushless motor
- Steel deck
- 20" (51 cm) cutting width
- 15.9 lbs with one battery
- Vertical storage position
- Dual battery for extended run times
- 6 cutting positions
- Bagging / rear discharge / side discharge

**20" (51 cm) cutting width**

**Dual battery: Operates with 1 or 2 batteries**

**Side discharge**

## BL300 Hand-Held Blower

40V MAX LITHIUM-ION

**6.0 Ah = up to 120 min.**
When running on the lowest trigger setting, 22 min on full trigger, 12 min on turbo button

**4.0 Ah = up to 90 min.**
When running on lowest trigger setting 15 min. on full trigger 8 min. on turbo button

Large areas of leaves and debris can be easily cleared away with the Oregon® Cordless Blower. The combination of superior air volume, (up to 507 cfm) and speed (up to 131.5 mph) make this the ultimate debris-clearing machine. The cordless blower's low decibel rating, ergonomics, and portablity make it an ideal tool for all-day jobs.

| OREGON | Description |
|---|---|
| **572619** | Blower BL300 – Tool Only |
| **572621** | Blower Kit BL300 - A6<br>4.0 Ah battery, standard charger |
| **586646** | Blower Kit BL300 - R7<br>6.0 Ah battery, rapid charger |

### LOW NOISE
The BL300 offers a powerful, low noise solution to clean-up and debris removal. With only 64.6 dB (bystander measure) on Turbo mode, the BL300 allows you to get the job done, without bothering your neighbors.

### HIGH-PERFORMANCE
The innovative brushless motor and axial fan offer a powerful combination of performance and efficiency. The variable speed trigger allows the user to stay in complete control by only using the power required by the job. The Cordless Blower delivers up to 507 cfm of air per hour.

### ERGONOMICALLY DESIGNED
The Cordless Blower is designed for extended use. The comfortable handle and shoulder strap make it ideal for large areas.

### SPECIFICATIONS
- Only 8.9 lbs (with battery).
- Superior air volume (up to 507 cfm of air per hour).
- Exceptional air speed (up to 131.5 mph).
- Variable speed trigger.

**Well balanced**

**Convenient built-in holes (strap included)**

**Turbo button and variable speed trigger**

## ST275-GSL Trimmer/Edger

40V MAX LITHIUM-ION

**6.0 Ah = approx. 45–60 min.**
**4.0 Ah = up to 30-40 min.**
**2.6 Ah = up to 20-30 min.**
Depending on material being cut and user technique

Cut through tough vegetation and beautify your landscape; the Trimmer/Edger's patented gear drive technology allow you to do both.

| OREGON | Description |
|---|---|
| **582152** | Trimmer / Edger ST275 - Tool Only<br>With Gator SpeedLoad trimmer head |
| **590498** | Trimmer / Edger Kit ST275 - E6<br>2.6 Ah battery pack, standard charger |
| **581207** | Trimmer / Edger Kit ST275 - A6<br>4.0 Ah battery pack, standard charger |
| **586726** | Trimmer / Edger Kit ST275 - R7<br>6.0 Ah battery pack, rapid charger |

### 2-IN-1 TRIMMER / EDGER
Switch quickly from timmer to edger.

### HIGH TORQUE AND POWER
Patent gear drive technology provides high performance and torque to cut through thick vegetation. The variable throttle allows the user to maintain control.
*US patent numbers 6,301,788 and 6,014,812 used under license.*

### ERGONOMICALLY DESIGNED
- Designed for comfort and extended use.
- Sling included to help reduce operator fatigue.

SPECIFICATIONS
- Only 9.4 lbs (with battery).
- 13" cutting diameter
- 6250 rpm no-load cutting speed.
- Gator® SpeedLoadTM trimmer head

## Gator SpeedLoad Head

**FAST.** Fastest loading system ever. Reduce the whole process from 5 minutes to a few seconds.

**EASY.** Open the head. Place the disc. Close the head.

**DURABLE.** Long lasting heat-treated disc, twice as long as standards lines.

## PS250 Pole Saw

40V MAX LITHIUM-ION

**6.0 Ah = up to 750 cuts**
**4.0 Ah = up to 500 cuts**
**2.6 Ah = up to 325 cuts**
In 2" - 3" material

The Oregon® Pole Saw gives you precision, power, and a telescoping reach for all trimmming and pruning jobs. The shaft allows up to 14'-15' of access, while the premium battery pack and mid-mount motor provide you with the longevity and comfort for a long day's work.

| OREGON | Description |
|---|---|
| **563456** | Pole Saw PS250 - Tool Only<br>40V MAX* pole saw, 8" (20 cm) guide bar, Microlite™ narrow kerf chain |
| **563455** | Pole Saw Kit PS250 - E6<br>2.6 Ah battery, standard charger |
| **563454** | Pole Saw Kit PS250 - A6<br>4.0 Ah battery, standard charger |
| **586642** | Pole Saw Kit PS250 - R7<br>6.0 Ah battery, rapid charger |

### EXTENDABLE REACH
Extend up to 10'2" (3.1 mm) for a reach of up to 14'-15' (4.5m) from the ground level.**

### MID-MOUNT MOTOR
The mid-mount motor places the pole saw's weight (and size) between your hands. This reduces the size of the cutting head — making it easier to reach hard-to-reach-cuts, and reduces the weight at the end of the pole — improving ergonomics and reducing fatique.

### ERGONOMICALLY DESIGNED
In addition to the mid-mount motor, the pole saw weighs only 13.5 lbs with the battery, which means better balance and less fatigue. A shoulder strap is included for additional comfort.

### SPECIFICATIONS
- Only 13.5 lbs (with battery).
- Chain speed: 2817 fpm.
- 3/8" Microlite narrow kerf 90PX chain.
- 8" (20 cm) bar.

*** Based on estimate for a 5'10" (1.8 m) individual operating at a 60 degree angle + / - 18 degrees.*

Slim, compact head

Mid-mount motor

Adjustable collar

Branch hook

## HT250 Hedge Trimmer

40V MAX LITHIUM-ION

**6.0 Ah = up to 150 min.**
**4.0 Ah = up to 100 min.**
**2.6 Ah = up to 60 min.**
Depending on material being cut and user technique.

The Oregon® Hedge Trimmer is light enough for you to tackle tall and wide hedges as well as rows of smaller hedges. The laser-cut blades will cut neat and precise formations while maintaining the health of the plants.

| OREGON | Description |
|---|---|
| **551275** | Hedge Trimmer HT250 - Tool Only |
| **558812** | Hedge Trimmer Kit HT250 - E6<br>2.6 Ah battery, standard charger |
| **585212** | Hedge Trimmer Kit HT250 - A6<br>4.0 Ah battery, standard charger |
| **567040** | Hedge Trimmer Kit HT250 - A7<br>4.0 Ah Battery, Rapid Charger |

### 26" (60 CM) LASER-CUT BLADES

Laser-cut blades mean cleaner cuts and healthier plants, while the low noise (74 dB) offers a combination of superior performance and operator comfort.

### ERGONOMICALLY DESIGNED

Large, comfortable handles. Dual action design for low vibration.

### SPECIFICATIONS

- Only 9.8 lbs (with battery).
- 2750 strokes per minute maximum cutting speed.
- Cuts up to a 3/4" branch.
- Variable speed trigger.

## Premium Blade Technology

Engineered with premium blade technology to outlast the competition. Rugged and durable, the Oregon HT250 Hedge Trimmer's blades are perfect for trimming and sculpting.

## WL275 Portable Light

40V MAX LITHIUM-ION

**6.0 Ah = approx. 36 hrs. on LOW**
**6.0 Ah = approx. 18 hrs. on HIGH**
**AC Power Cord = Continuous run time**

Battery not included. Works with any Oregon Cordless 40V MAX battery pack.

The Oregon® Portable Light keeps work sites illuminated well after the sun sets. Our unique power options give you the flexibility to choose between the included AC power cord or inserting an Oregon PowerNow™ Battery Pack.

| OREGON | Description |
|---|---|
| **581611** | LED Portable Light WL275 - Tool Only |

### HIGH-PERFORMANCE
1091 Lumens / 12 hours on HIGH
584 Lumens / 24 hours on LOW

### PORTABLE
Use the provided AC power cord or go portable with any Oregon Cordless Tool System Battery Pack.

### DURABLE AND CONVENIENT
The durable fame and multiple angle adjustments offer ideal work site performance.

**Multiple adjustments for 90˚+ light angle options**

** Fully charged battery voltage measured without a workload is 40 volts. Nominal voltage is 36 or 37 depending on battery used.*

## Chainsaw Tool Bag

The Tool Bag is designed to protect, carry, and store an Oregon chainsaw or blower with accessories.

- Internal lining and outside pocket is water and oil resistant
- Rugged construction resists abrasion and wear
- Extra-large, wide-mouth opening for easy access and visibility
- 7 internal and 2 external pockets neatly organize your battery, charger, and other accessories
- 27" L x 12" W x 12" H (68.6 cm x 30.5 cm x 30.5 cm)
- Comfortable fitting and light weight

| OREGON | Description |
|---|---|
| **551276** | Tool Carry Bag |

## Back Pack

The Backpack is ideal to carry extra batteries, or use it for your computer/tablet:

- Size: 13.5" x 4" x 19"
- Laptop & Tablet pocket inside
- Reflectives on front and strap

## Corded Chainsaws

**CS1500**
The only self-sharpening corded electric chainsaw on the market

**CS1400**

Oregon's high-power, 15 amp CS1500 chainsaw is the only corded electric chainsaw on the market with a chain that can sharpen itself. The CS1500 has all the traditional conveniences of an electric saw — instant start with the pull of a trigger, minimal maintenance, low noise and silent between cuts — and takes it one step further by incorporating the built-in PowerSharp® chain sharpening system.

15 amp CS1400 chainsaw offer all the benefit of the CS1500 except that the PowerSharp system is replaced by an Oregon ControlCut high performance chain. + 33% longer semi Chisel cutters, suitable for all-day cutting. Low vibration, kick-back reduction. CS1400 is available with a 16" guide bar

| OREGON | Description |
|---|---|
| **603352** | Self-Sharpening Electric Chainsaw, Model CS1500 Includes: chainsaw, 18" guide bar, and PowerSharp chain. Fully assembled |
| **603353** | Self-Sharpening Electric Chainsaw, Model CS1500 Includes: chainsaw, 18" guide bar, and PowerSharp chain. Shorter box, semi-assembled |
| **603348** | Electric Chainsaw, Model CS1400 Includes : chainsaw, 16" guide bar, and ControlCut chain. Short box, semi-assembled |

### INSTANT START

- No pull cords
- No warm up
- No gas-oil mixing
- No emissions

### LOW NOISE

- Much quieter than a gas saw
- Silent between cuts

### ERGONOMIC DESIGN

- Light-weight and balanced
- Low vibration
- Over-mold comfort handle

### SPECIFICATIONS

- Bar length: CS1500: 18" (45cm); CS1400: 16" (40cm)
- CS1500: PowerSharp chain, 3/8 in. Low Profile® with .050" gauge
- CS1400: ControlCut 91PXL056G chain, 3/8 in. with .050 gauge
- Automatic oiler with view-through window
- 15 amp rating
- 120 Volt ~ 60 Hz
- No load chain speed 2888 FPM
- Weighs 12.9 lbs (5,85 kg)

## PowerSharp Sharpening System

With the built-in PowerSharp Sharpening System, there's no more downtime due to dull chain. Simply pull the PowerSharp lever for 3 – 5 seconds and the chain works like new. With PowerSharp, you can sharpen on the saw, on the job, in seconds®.

*(see pages 136-137 of the FOR section of the catalog for more detail)*

## PowerSharp® Saw Chain for CS250, CS300 & CS1500

The Oregon PowerSharp® sharpening system means no more downtime due to dull chain. PowerSharp allows you to sharpen on the saw, on the job, in seconds®.

- Sharpens in 3 – 5 seconds
- No extra tools needed for sharpening
- 10 – 20 sharpenings per chain
- 3/8" Low Profile™ / .050" gauge

# Outdoor Power Equipment

# 120V Professional Series™

## THIS IS REAL POWER

Many cordless products have been labeled professional-grade, but cordless power has never measured up to the performance of traditional, commercial gas equipment—until now. The new Oregon 120V Professional Series is engineered with up to 15% more power than gas-fueled equipment—driving more productivity than ever before.

Introducing Oregon Professional Series—The next evolution of battery technology.

### Professional Grade Cordless Equipment
Finally, there's a line of professional-grade tools that offer all the benefits of battery, without sacrificing power, performance, or durability.

### Quietly Powerful
Engineered from the ground up with low noise in mind, these tools have been designed so your work can be seen and not heard.

### More Power and Torque
Engineered to offer up to 15% more power than gas-fueled equipment.

### Weather Ready
With an IP56 rating, water and dust seals on electrical connections and components mean these tools are ready to work, rain or shine.

### Increased Productivity
Efficient power offers extended run times with no refueling stops, while ultra-quiet operation allows early start times at noise-sensitive sites.

### Commercial-Grade Durability
Tested tough to endure the rigours of professional use.

# BL120VX Leaf Blower

Built to get the job done quickly and quietly with an amazing max-bystander-noise-rating of 59dB(A) for noise-restricted sites, the zero-emission BL120VX was engineered with the professional in mind. With a variable speed trigger, fatigue-reducing throttle lock and a blow force rating of 22N, you're ready for real work.

# OREGON LOG SPLITTERS - THE CHOICE OF PROS

## Our Log Splitter Family

### A log splitter for every job

Whether you are a weekend warrior or a production professional we have a log splitter to fit your needs.

### Versatile

Easy-to-use, easy to transport, we designed our log splitter to ensure you can get the job done.

### Strong

A full range of splitting force from 22-Ton splitter to 35-Ton, designed with ergonomic positions and built to last.

### Exclusive Convenience

The new Oregon 28-Ton Log Splitter features EXtend Split™ - an exclusive design feature that gives the operator a larger work area. Extend Split offers an improved and more comfortable cutting experience that can't be found anywhere else.

### FEATURES

- Fast cycle times for increased productivity
- Built-in log cradle design makes splitting wood easier by keeping log in place for hands-free operation
- Ergonomically positioned auto return valve for increased operator comfort and efficient splitting
- Boxed tongue with handle, designed for strength and maneuverability
- 8" (20.3 cm) 10" (25.4 cm) tall wedge has larger splitting surface
- Integrated stripper plates remove stuck logs from wedge upon return
- Solid-steel foot plate for increased strength

22-TON

## SPECIFICATIONS

- Tonnage: 22-Ton
- Wedge: 7" (17.8 cm) wedge
- Cycle time: 13 seconds
- Operation options: horizontal and vertical
- Log capacity: 26" (66 cm)
- Hydraulic capacity: 6.5 gallons (24.6 L)
- Tank Capacity: 5 gallons (18.9 L)
- Pump performance: 2-stage, 11 GPM pump
- Working height: 31.5" (80 cm)
- Weight: 595 lbs (270 kg)

# Features

### LOG SPLITTING FORCE

1. Auto-return valve speeds up the log splitting process.
2. Ergonomically positioned valve placement for increased operator comfort.
3. 4" X 24" (10.2 X 61 cm) cylinder capable of producing 22-tons of splitting force, makes this our most popular tonnage for splitting most logs.
4. The efficient 7" (17.8 cm) wedge is also 4-way wedge compatible.

### BUILT TO LAST

5. Integrated stripper plates and log cradle for rigidity; capable of removing stuck logs and holding logs secure for hands-free splitting.
6. Solid-steel foot piece designed for increased strength.
7. 2-stage 11 GPM pump for faster production.
8. 6.5 gallons (24.6 L) hydraulic capacity allows plenty of room for fluid to keep flowing and stay cool.

### VERSATILE & PORTABLE

9. 4.80" x 8.0" (12.3 cm x 20.30 cm) 45 MPH tires DOT certified.
10. Horizontal shaft engine opposite side of operator.
11. Spring-loaded 6" x 6" (15.2 cm X 15.2 cm) beam lock keeps beam secure.
12. Boxed tongue with rotating ground stand and handle gives solid support during splitting.
13. Optimized trailer tow height.

| OREGON | Description |
|---|---|
| 596282 (shown) | 35-Ton Log Splitter (Honda) |
| 596281 | 35-Ton Log Splitter (Kohler) |

# Features

## LOG SPLITTING FORCE

1. Auto-return valve speeds up the log splitting process.
2. Ergonomically positioned valve placement for increased operator comfort.
3. 5"x 24" (10.2 X 61 cm) cylinder capable of producing 35 tons of splitting force, makes this our most popular tonnage for splitting most logs.
4. Large 10" (25.4 cm) wedge has larger splitting surface for splitting larger logs in a single pass and is 4-way wedge compatible.

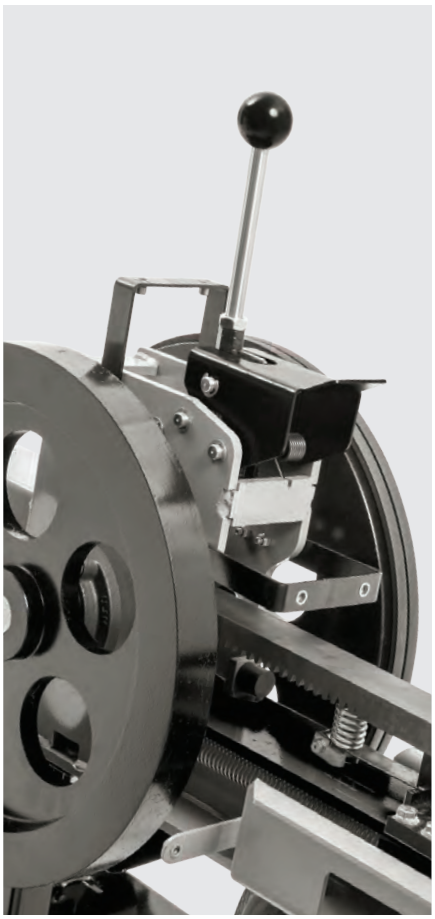
## BUILT TO LAST

5. Integrated stripper plates and log cradle for rigidity; capable of removing stuck logs and holding logs secure for hands-free splitting.
6. High-strength U.S. steel beam with reinforced, integrated log cradle and interlocking footplate designed for increased strength and durability.
7. 2-stage 16 GPM pump for faster production.
8. 8 gallons (30.2 L) hydraulic capacity allows plenty of room for fluid to keep flowing and stay cool.

## VERSATILE & PORTABLE

9. 4.80" x 12.0" (12.3 cm x 30.48 cm) 45 MPH tires DOT certified. Optimized trailer tow height.
10. Horizontal shaft engine opposite side of operator.
11. Boxed tongue with rotating utility jack and handle designed for strength during splitting.

# Log Splitters - Kinetic



## SPLIT WOOD 6X FASTER* WITH KINETIC POWER

## Kinetic Advantages

**Save Time & Money**

Kinetic splitters consume less fuel than hydraulic splitters because the power requirements on the engine are less.

**Clean Operation**

No hydraulic fluid, cylinders, pumps, hoses, fittings, or filters eliminates hydraulic leaks and maintenance.

**Work Efficiently**

The precision wedge splits clean, creating less wood-waste debris.

## How It Works

Precision balanced, 70-pound flywheels spin at 325 PMs to create and store kinetic energy.

As the flywheels turn, the pinion gear spins on the same shaft. When the control handle moves forward, the rack presses onto the pinion gear.

The rack and push plate power forward at high speed, pushing the log through the wedge. This burst of energy adds high speed to the splitting action versus a much slower 20 to 40 ton hydraulic log splitter. As a result, most logs are split in 2 or 3 seconds instead of more than 13 seconds with a hydraulic splitter.

*Compared with hydraulic log splitters

KINETIC

## SPECIFICATIONS

- Kinetic log splitter
- Wedge: 6" (15.24 cm) wedge
- Cycle time: 2 seconds
- Operation options: horizontal
- Log capacity: 24" (61 cm)
- Weight: 640 lbs (290.3 kg)

## ENGINE OPTIONS

*All EPA approved*

**Kohler SH265**

196cc

| OREGON | Description |
|---|---|
| 581738 (shown) | Kinetic Log Splitter (Kohler) |

# Features

## WORK SMARTER WITH LESS FATIGUE

1. Virtually eliminates kick-back with patent-pending handle design with torsion springs that absorb energy when a stall occurs.
2. Reduced operator fatigue due to no unnecessary motion.
3. Work from either side of the log splitter with the convenient two-handed operation.

## HEAVY-DUTY WORK TABLE

4. Minimize snags when you bring a log back for re-splitting. The work surface is smooth and flush with the beam.
5. Split more logs with less debris. The log splitter's wide slots reduce build-up that could jam the push plate assembly.
6. The 32" wide work table allows easy access to rounds and re-splits from either side.

## VERSATILE & PORTABLE

7. Easily move the log splitter around your work site with the welded, table-mounted handles.
8. Tow it on the highway with the 2" ball coupler and safety chains, 45 MPH DOT certified tires.
9. Load and unload easily with the stow-away retractable tongue.

## BUILT FOR YEARS OF COMMERCIAL USE

10. Work efficiently. The precision wedge splits clean, creating less wood-waste debris in high-volume applications and can be sharpened to maintain edge in the future.
11. The heavy-duty stand centered under the table supports years of commercial use.
12. The precision, heat-treated, steel alloy rack and pinion gear system is proudly made in the USA.
13. The durable, high-strength steel drive system components are manufactured for heavy commercial use.

# Log Splitters - Accessories

## Log Splitter Catcher

Log catchers keep work at a consistent height, reducing strain and fatigue on the operator and to help keep the immediate work-space in order. Built of heavy-gauge steel, these attachments are designed to be durable and easily installed.

# ANSI Information

## Customer Safety Information: Important

**To dealers: For customer safety, this is a must read.**
This insert covers provisions of the safety standard, "ANSI (American National Standards Institute) B175.1". It describes requirements that are designed to reduce the risk of injury due to kickback from s sold in the United States. Kickback is a rapid upward and backward motion of the chainsaw. It happens when the moving saw chain, near the upper part of the tip of the guide bar, contacts an object—for example, a log or a branch. The ANSI standard contains test methods. And these methods check the kickback potential for chainsaws and replacement saw chain.

To help you keep your customers safe, we have included an Oregon Saw Chain Classification Chart. It helps you choose the right replacement saw chains. And, it helps maintain compliance with the ANSI standard.

**Chainsaws and the ANSI standard**
The ANSI standard divides all gasoline powered chainsaws into two groups:

- Below 3.8 cubic inch displacement (62 cc)
- 3.8 cubic inch displacement (62 cc) and above

According to the ANSI standard, chainsaws below 3.8 cubic inch displacement (62 cc), have to meet low kickback performance requirements (paragraph 5.11.2.1). The manufacturer is required to mark these chainsaws. These chainsaws are required to be durably marked in a lasting manner to identify at least one replacement bar-and-chain combination that has been evaluated with that chainsaw power head and that will provide low kickback performance.

Chainsaws that have 3.8 cubic inch displacement (62 cc) and above, can follow ANSI low kickback provisions. But they are not required to do so. Chainsaws that don't meet the low kickback performance requirements need identification. Specifically, a warning, such as the following:

WARNING: This chainsaw is capable of severe kickback that could result in serious injury to the user. Do not operate this chainsaw unless you have extraordinary cutting needs and experience and specialized training for dealing with kickback. Chainsaws with significantly reduced kickback potential are available.

**Replacement saw chain and the ANSI standard**
When you replace the saw chain on chainsaws below 3.8 cubic inch displacement (62 cc), you have to use a low kickback chain of the proper pitch, gauge, and drive link count. That keeps the chainsaw in compliance with the low kickback provisions of the ANSI standard. Oregon provides replacement saw chain and we label it according to the ANSI standard. See the green highlighted chain types in the saw chain classification chart included. These are low kickback. The yellow highlighted chain types are not low kickback. These should be used only by people with experience and specialized training for dealing with kickback.

**Green label chain is low kickback chain**

The green label reads:

**ATTENTION: READ THIS**
**WARNING:** This saw chain met the kickback performance requirements of ANSI B175.1-2012 when tested according to the provisions of ANSI B175.1-2012. Low kickback saw chain meets the kickback performance requirements of CSA Standard Z62.3.

**Yellow label chain does not comply with the low kickback requirements of the standard**

The yellow label reads:

**ATTENTION: READ THIS**
**WARNING:** The saw chain in this package may be capable of kickback that could result in serious injury to the chainsaw operator or bystanders. Do not use this saw chain unless you have experience and specialized training for dealing with kickback. Saw chain with reduced kickback potential is available.

**Replacement guide bars and the ANSI standard**
The ANSI standard states:
Because of differences in replacement guide bars, the following guidelines shall be considered to determine kickback energy:

A. Sprocket nose guide bars with the same effective length, the same number of sprocket nose teeth, the same nose radius, and the same pitch may be considered to have the equivalent kickback energy.
B. A hard-nose guide bar having the same effective bar length, and the same or smaller nose radius as a sprocket-nose bar, may be considered to have equivalent or less kickback energy than the sprocket nose bar.
C. Kickback energy of all guide bars may be considered to be less for smaller nose radius sizes.

When replacing guide bars, in order to maintain approximately the same kickback energy of a chainsaw, the nose size (radius), or number of teeth in a sprocket nose bar, of the replacement bar should be equal to or smaller than the original equipment nose – with the same bar length.

## Oregon® Saw Chain Classification Chart

### Low kickback saw chain

Part numbers of Oregon saw chain that follow the ANSI low kickback standard (paragraph 5.11.2.4) are listed below. Packages of Oregon low kickback saw chain carry this authorized UL Classification Marking:

LOW KICKBACK SAW CHAIN IN ACCORDANCE WITH ANSI/OPEI B175.1-2012, PARAGRAPH 5.11.2.4 AND WITH CSA Z62.3
This saw chain met the kickback performance requirements of ANSI B175.1-2012 when tested according to the provisions of ANSI B175.1-2012. Low kickback saw chain meets the kickback performance requirements of CSA Standard Z62.3.

| Saw Chain Pitch | Part Numbers by Gauge .043" | .050" | .058" | .063" |
|---|---|---|---|---|
| 3/8 low profile™ | 90PX, 90SG | 91P, 91PS, 91PX, 91PXL | | |
| .325 | | 20BPX, M20BPX* | 21BPX, M21BPX* | 22BPX, M22BPX* |
| | | 95VPX | | |
| 3/8 | | 72V | 73V | 75V |

The above Saw Chain Classification Chart supersedes and replaces all previous Oregon Saw Chain Classification charts and posters.

### Professional use saw chain

Part numbers of Oregon chains that do not meet ANSI low kickback performance requirements are listed below. The chains below should be used only by those with experience and specialized training for dealing with kickback.

| Saw Chain Pitch | Part Numbers by Gauge .050" | .058" | .063" |
|---|---|---|---|
| 1/4 | 25AP, 25A, 25F | | |
| 3/8 low profile™ | 91VXL, M91VXL* | | |
| .325 | 20LPX, M20LPX*, 95TXL | 21LPX, M21LPX* | 22LPX, M22LPX* |
| 3/8 | 72APX, 72DPX, M72DPX*, 72LGX, 72JGX, 72EXL, 72EXJ, 72JPX, 72LPX, M72LPX* | 73DPX, M73DPX*, 73JGX, 73LGX, 73EXL, 73EXJ, 73LPX, M73LPX* | 75DPX, M75DPX*, 75JGX, 75LGX, 75EXL, 75EXJ, 75LPX, M75LPX* |

| | | | 27R, 27RA |
| | | | 68CL, 68CJ |

* DuraCut™ chain – see Saw Chain section for details

## Dealer Responsibilities

**Dealers, use extra caution if your customer wants:**
Cutting chain that does not meet the low kickback provisions of the ANSI standard, or any replacement guide bar with a nose radius larger than the original-equipment nose.

Oregon urges you — and all of our dealers — to advise these customers that this choice brings added risk of injury. Note also, that customers can buy the chains and bars that meet ANSI low kickback performance requirements. In accordance with ANSI, dealers should advise customers not to use yellow label chain if they do not have experience or specialized training for dealing with kickback.

**Oregon chain package labeling**
Boxes of Oregon chain are identified on the outside. We identify them using a green or a yellow label. Oregon preprints loop boxes and sheets of labels with the required ANSI kickback information. These preprinted loop boxes and labels are packed inside reel boxes of Oregon chain. Dealers must pack loops of chain into the loop box that has the corresponding green or yellow ANSI information. If you are not using a preprinted loop box, then apply the corresponding green or yellow label to either: the chain, the saw's guide bar or the invoice at the time of sale. Extra boxes and labels are available through your Oregon distributor.

**Dealer expertise**
You can help your customers stay safe and get the job done right. As you learn more, you'll know exactly which products are right for the job. Getting familiar with the chainsaw fit-up information in this catalog is a good first step.

The fit-up and application information in this catalog are based on data pulled from a variety of sources.
This guide can help you choose products that are right for your customer. But a note of caution — it is possible that some of the information provided contains errors. That's because it's not possible to account for variations in cutting conditions. Or, for how people might use these products from region to region. Dealers should confirm all data and information provided herein. Oregon disclaims all responsibility for any errors contained in this catalog. All dealers are urged to become as knowledgeable as possible about:

- Local conditions and customer needs
- Kickback, and how you can help limit your customers' exposure to injury
- Issues specific to Oregon products, including our end-use symbols, Intenz® guide bars and Guard Mate® bar-nose tip guards, as seen in these pages

# Important Information

## Choosing Oregon® Products – Important Information

### Guard Mate® Bar-nose tip guards

Some chainsaws include a bar-nose tip guard as original equipment (including Echo, Homelite and Ryobi models). Be aware that while some Oregon replacement bars and bar noses have holes for mounting a Guard Mate tip guard, most bars and bar noses do not.

**WARNING:** Some chainsaws come with bar-nose tip guards. Removing the bar-nose tip guard increases the risk of kickback. The operator, or bystanders, could be seriously hurt. If you replace the bar or the bar nose, make the right choice. Choose bars and bar noses with holes to mount a bar-nose tip guard. And follow the manufacturer's instructions.

### Selection and Installation of Oregon Intenz® Guide Bars

Intenz guide bars have our patented Intenz chain tensioning mechanism built right into the bar itself. You can read and follow the information about Intenz guide bars in this section.

#### Replacing the bar on saws equipped with an Intenz guide bar

Chainsaws originally equipped with an Intenz guide bar do not have a "bar adjustment mechanism" for tensioning the chain. Chainsaws which have been adapted to take an Intenz guide bar have had the bar adjustment mechanism removed. Since these saws have no bar adjustment pin, always replace an Intenz guide bar with another Intenz guide bar. That way, you maintain the saw's ability to properly tension the saw chain.

#### Replacing a standard bar with an Intenz guide bar

An Intenz bar can be fitted to any chainsaw with a compatible motor mount pattern. If the saw has a bar adjustment mechanism, the mechanism must be removed.

**WARNING: Do not use standard-type non-Intenz guide bars on chainsaws without a bar-adjustment mechanism.** Be sure to tension the chain correctly. A loose chain can jump off the bar and seriously injure the operator and bystanders. You cannot maintain chain tension on a non Intenz guide bar without the mechanical stop from the saw's bar-adjustment mechanism.

### Oregon Maintenance and Safety Manual

More information on the safe and effective use of Oregon saw chain, guide bars and sprockets is available in our Oregon Maintenance and Safety Manual. Oregon urges you, and all of our dealers to read and follow the instructions in this manual. We recommend that our dealers urge their customers to do the same.

Oregon Maintenance and Safety Manuals are printed in English, French, and Spanish and available from your authorized Oregon distributor, or by contacting Oregon directly.

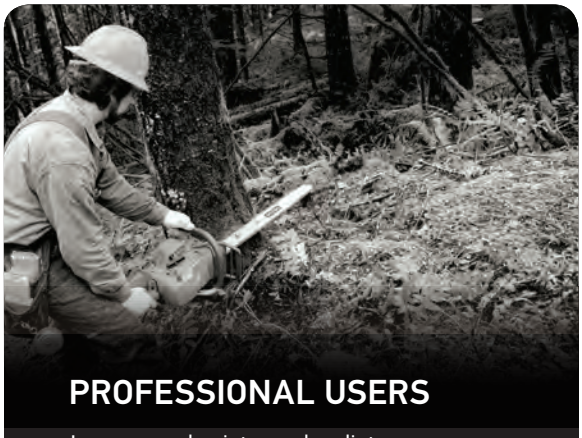
# PRODUCT FAMILIES

*Oregon® understands that the needs of woodcutters – professionals and novices – are as diverse as the terrains and environments in which they work.*

*We have organized our saw chains into product families with key characteristics that different users will value. These product families will help ensure that you choose the right chain based on your everyday needs — helping to make understanding the differences between our chains effortless.*

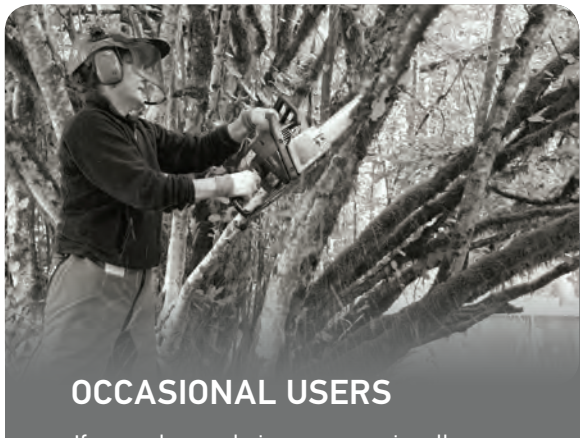


## PROFESSIONAL USERS

Loggers, arborists, orchardists, millwrights, forestry workers, and other highly skilled woodcutters require products designed for the demands of their tough professions. Oregon makes products that are strong and durable, with state-of-the-art features that promote a long lifespan and make the products easier to use.

Oregon has developed product families designed for all professional woodcutters. They range from bars and chain that provide more control in the cut to precision cutting systems for the most experienced users. We also make specialty products for the toughest conditions and ripping chain used in saw mills.

**PowerCut™**
**SpeedCut™**
**VersaCut™**
**ControlCut™**
**DuraCut™**
**RipCut™**



## OCCASIONAL USERS

If you only use chainsaws occasionally, Oregon makes several products to meet your needs.

Oregon's occasional user products are perfect for trimming trees, cutting firewood, and maintaining your property.

These bars and chain are easy to use and easy to maintain, featuring technology that reduces kickback.

**AdvanceCut™**
**PowerSharp®**
**Single Rivet** (guide bars only)

**Detailed information about each product family can be found on these pages:**

Saw Chain → FOR 102–147
Guide Bars → FOR 148–179

A. The bar-and-chain application tables are organized by chainsaw brand names, shown in alphabetical order

B. Saws less than 3.8 cubic inches (62cc) are shown with a green triangle . Low kickback performance requirements in the ANSI standard apply to these saw models

C. Saws 3.8 cubic inches and larger are shown with a yellow triangle . Low kickback performance requirements in the ANSI standard do not apply to these saw models

D. Saw models are listed and further broken down into groups, with each saw model group having its own set of recommended bar-chain applications. Note: Saws made for use with multiple pitches of chain will be listed in more than one saw-model group

E. The bar-chain applications for each group of saw models are organized in sections, with each section headed by one pitch, one gauge and the recommended chain(s) having that pitch and gauge. There are multiple sections of applications for most saw-model groups depending on how many chain gauges, or other product variables apply to each group

F. Spur sprockets and rim systems can vary by tooth count. The common drive sprocket tooth count is shown

G. Where applicable, Intenz or Narrow Kerf saw chain and guide bars applications are grouped and show under the chainsaw model numbers

H. Footnotes at the bottom of the pages provide references to other areas of the catalog where tools, safety, packaged, and speciatly products are found

I. PowerSharp systems are available for some OEM saw models

See our guides for chainsaws with a **green triangle** on pages FOR 2–3

See our guides for chainsaws with a **yellow triangle** on pages FOR 2–3

Saw chain complies with low kickback performance requirements (FOR 2–3)

Saw chain does not comply with low kickback performance requirements (FOR 2–3)

H

# Ordering Oregon Saw Chain

## Chain Packaging & Saw Chain Ordering

**Note**: Dealers must provide customers with the correct-color label, or loop box (green or yellow) with each sale of each chain part number. Sufficient ANSI labels or printed loop boxes are provided in the original factory reel shippers containing Oregon chains. Below are additional loop boxes that may be ordered. See FOR 2–3 for full details on correct labeling of chain sales.

| Package Type | OREGON | Description |
|---|---|---|
| Loop Packaging | 591063 | Loop Carton 25-pack (Yellow ANSI), Black |
| | 591062 | Loop Carton 25-pack (Green ANSI), Black |
| | 591061 | Loop Carton 25-pack (Green ANSI), Grey |

## Ordering Oregon Chain

| Packaging Type | Chain Type | + | Package Designation | = | OREGON |
|---|---|---|---|---|---|
| Bulk Chain, 100-Foot Reel | 72LPX | + | 100U = 100-Foot Reel | = | 72LPX100U |
| Bulk Chain, 25-Foot Reel | 91PX | + | 025U = 25-Foot Reel | = | 91PX025U |
| Loop of Chain, in a Loop Box | 21LPX | + | 066G = 66 Drive Link Loop in a Loop Box | = | 21LPX066G |

## Overview of Packaging Changes

**Product Families and Package Colors**
We have redesigned our packaging to help you identify the products that are right for you. We created three tiers of user-friendly product families, differentiated by color, to simplify your selection process.

| PROFESSIONAL USERS | OCCASIONAL USERS | BASIC PRODUCTS |
|---|---|---|
| PowerCut™<br>SpeedCut™<br>VersaCut™<br>ControlCut™<br>DuraCut™<br>RipCut™ | AdvanceCut™<br>PowerSharp® | Single rivet guide bars<br>Accessories |

**Professional Users** will see premium features designed for their jobs in black packaging.

**Occasional Users** can find products with features geared specifically for them in gray packaging.

**Basic Products** are identified by white packaging.

**Package Materials and Durability**
You'll notice a real improvement in our packaging; we've used higher quality materials and superior construction for better durability.

**Clear Communication and User-Friendly Layout**
You can identify and choose the right product through the following:

- Product family
- Part number
- OEM chainsaw fit up
- Product information
- Window for product visibility
- Bar motor mount exposed for easy identification
- Areas to write product information

**Guide Bar Packaging**

**Saw Chain Loop Packaging**

# Guide Bar & Saw Chain Combos

## Oregon® Guide Bar & Chain Combos by Motor Mount Number

Our updated line-up of Oregon bar and chain combos puts many of our most popular products together in attractive packaging for ease of selection and increased sales. The new visual graphic style we are introducing on the display packaged loop line-up is carried over into our refreshed guide bar & chain combo offering. The complete Oregon merchandising program lets you move guide bars and chains out of your back room and into your showroom.

# PowerCut™ 70-Series EXL

## An Evolution to the Popular LGX 3/8" Professional Saw Chain

## REPUTATIONS ARE BUILT WITH EVERY CUT

# Keep Your Edge

With every cut, your reputation is on the line. That's why we've spent generations engineering the sharpest, fastest professional cutting systems in the world. Day in and day out, the PowerCut 70-Series EXL full chisel cutters help you power through timber with speed, efficiency, and precision.

Designed to maximize every cut, our proprietary cutter technology gives users a sharper, more durable cutting edge that provides increased cutting performance with less effort. We're constantly raising the bar, pushing ourselves to exceed the demands of the professionals who rely on us to make the job feel less like work.

## Advantages

- Multi-axis grind technology for superior performance, sharpness, and consistency
- Reshaped cutter powers through timber with speed, efficiency, and precision
- Designed to reduce the force applied by the operator
- Engineered to utilize the power of today's professional saws
- LubriTec™ keeps your saw chain and guide bar oiled for less friction and longer life
- Gold Loop Start Indicator makes sharpening easier with start and stop identification

# SpeedCut™

## 95-Series .325” Cutting System

## A BETTER SAW STARTS HERE

Get your cutting done easier and faster. Our SpeedCut™ System works as hard as you do. Made for mid-size saws (≤ 55cc). The narrow kerf guide bar and saw chain need less power for faster cuts in most conditions.

# SpeedCut ™ 95-Series .325 Cutting System

## The Narrow Kerf Advantage

A narrow kerf means faster cuts because less wood is displaced.

Top performance comes from pairing the narrow kerf 95TXL saw chain with a specially built narrow kerf guide bar. Light-weight and efficient, the SpeedCut System cuts faster and better on mid-size chainsaws.

Always use bars designed for narrow kerf saw chain. Look for this icon .

## 95TXL Saw Chain

**FASTER***
Get a faster, easier cut with a re-shaped cutting surface and narrow kerf design

**SHARPER***
Sharper, more durable cutting edge from a new precision grind and optimized cutting angle

**EASIER***
An easier to sharpen chain, with the cutting surface matched to the file. More indicators help you spot the recommended filing angles

- LubriTec™ keeps guide bar rails and rivet joints oiled, for less wear and longer life
- Replaces 95VPX

## Guide Bars

**LIGHTER****
Up to 20% lighter, for more control and less fatigue with a light-weight aluminum core

**STRONGER****
Stiffer and stronger with aerospace bonding technology

**LONGER LASTING****
More durable on the job, from a redesigned nose with new parts and materials. Harder bar rails designed to last longer.

- Better chain retention and less wear via precision rail groove design
- LubriTec™ keeps the chain drive link and chain rivet joints oiled, for less wear and longer life

## Oregon Features – Lubrication

LubriTec™
OILING SYSTEM

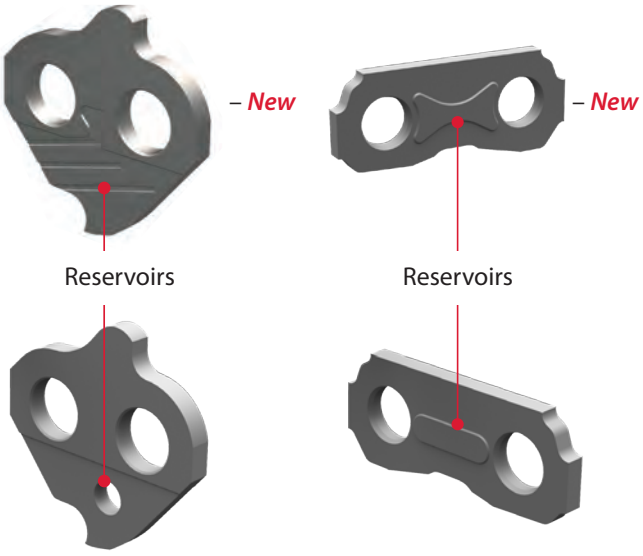
You want tools to work smarter and last longer. We designed LubriTec to deliver the best possible lubrication for your saw chain. Keeping lubrication where it's needed most means a longer lasting saw chain and guide bar and less down time. Here's how it works:

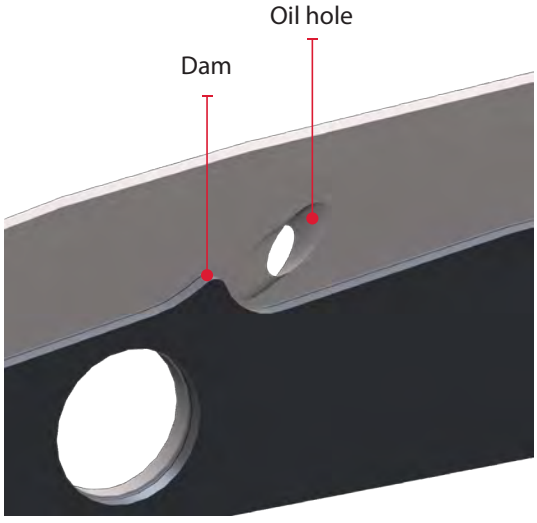
### LubriTec for the Chain*

- Lubricant is held inside LubriTec reservoirs
- Oil flows freely into and around the saw chain parts and the guide bar. Oil is held in the high-friction zone where the saw chain and guide bar groove walls make contact.
- The presence of lubricant lowers friction during the start-up period before the saw's oiling system reaches its peak function
- LubriTec strengthens the saw chain tie straps and reduces their tendency to flex during operation, making a more stable and durable saw chain

### LubriTec for the Guide Bar*

- Our LubriTec guide bar dam is cleverly designed to keep lubricant where it's needed most. It looks like a small barrier and is found in the bottom of the guide bar's groove, just behind the oil hole. It both increases available oil and reduces oil hole plugging. Resulting in better overall lubrication.
- The LubriTec angled oil hole virtually eliminates guide bar oil hole plugging. The oil hole slopes up toward the top of the guide bar and forward toward the nose. It's approximately 40% smaller in diameter than a standard hole, increasing velocity as oil enters the guide bar. It also helps clear sawdust and debris away from the hole during operation.





***Combination of features will vary by chain and bar products**

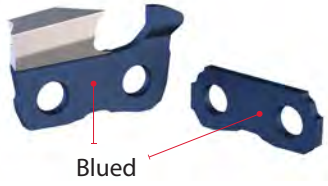
## Oregon Features – Saw Chain

### Low Vibration

Less vibration equals more comfort. We wanted to lessen vibration-induced white finger (VWF), so we created a small space between the saw chain and the guide bar. A lot of the energy gets dissipated by the saw chain, acting as a shock absorber. It never reaches the guide bar, the saw — or most important — the operator. Our low vibration design reduces vibrations by 25% or more.

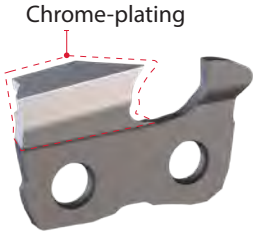
### Filing Indicators

Your sharpening made easier and more accurate. Special filing marks show the best top-plate angle. Lines make it easier for filing the correct top-plate angle and help maintain equal cutter lengths. Filing indicators show you when cutters have reached the end of their life. Cutters should not be sharpened beyond the line.



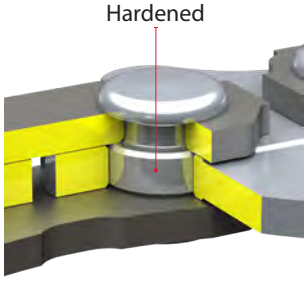
### Blued Components

Our Blued Components give you high-quality resistance to corrosion with the presence of protective oil. A precise and controlled tempering process results in a blue surface, designating our best-in-class saw chain.



### Chrome-Plated Cutters

Your chain stays sharper, longer. Oregon electroplates a layer of industrial hard chrome to all our saw chain cutters. Chrome delivers a harder surface and better wear resistance. So you spend more time cutting and less time filing or grinding the chain.



### Hardened Rivets

For a longer working saw chain, Oregon induction hardens and quenches all saw chain rivets, delivering a high-quality, load-bearing surface that resists wear and improves strength. Less wear and chain stretch means fewer chain tension adjustments.

## Chain Cutter Sequence Terminology

Standard

Semi-skip

Skip

## Why Choose "Semi-Skip" or "Skip" Sequence Chain?

Consumer users of chainsaws will probably never need to use a semi-skip or skip sequence chain. However, professional or commercial chainsaw operators who use their saws frequently and who use longer bars may prefer a semi-skip or skip chain for these reasons:

- Fewer cutters to sharpen makes sharpening faster and easier
- Greater clearance for better chip flow – the larger the wood being cut and the longer the bar used, the more important good chip flow becomes
- The type of wood being cut and other factors will affect the choice of the chain type and chain sequence, but with the full-size 3/8" pitch and .404" pitch chains, preferred by professional and commercial operators who use longer bars, the following general guidelines will be useful

**Bar Length considerations for semi-skip and skip chain:**

| Chain Sequence | Recommended Bar Lengths |
|---|---|
| Standard | Up to 24" (60 cm) |
| Semi-Skip (Square Ground only) | 24" to 32" (60 – 80 cm) |
| Skip | 32" and longer (80 cm+) |

# Product Families

Oregon understands that the needs of woodcutters – professionals and novices – are as diverse as the terrains and environments in which they work.

We have organized our saw chains into product families with key characteristics that different users will value. These product families will help ensure that you choose the right chain based on your everyday needs — helping to make understanding the differences between our chains effortless.

To help easily identify our tiers of products, packaging is differentiated by color. Product within families meeting the needs of occasional users will be indicated by gray packaging. Product families targeted at demanding professional users will be indicated by black packaging.

## Chain for High-Performance Saws

**PowerCut™**
The ultimate saw chain for loggers and skilled forest workers who use high performance saws. Full chisel cutters power through timber with speed, efficiency, and precision.

**SpeedCut™**
Faster, cutting performance for wood-cutting professionals who use mid-size saws under 55cc. Narrow kerf system requires less power to cut through high volumes of wood quickly and easily.

**VersaCut™**
Designed for landowners and tree-cutting professionals who require a multi-purpose, high performing saw chain. Uses cutters designed for maximum durability and versatility.

**ControlCut™**
Ideal for wood cutting professionals looking for a fully featured cutting system that delivers smooth cutting and reduced kickback. Easy to maintain saw chain, with a forgiving sharpening profile.

**DuraCut™**
Made for woodcutters working in abrasive and tough environments. Advanced plating process with extra layers of chrome extends sharpness up to three times longer than conventional saw chain.

**RipCut™**
Created specifically for chain-type sawmills. Produces smooth ripping cuts with supreme efficiency to make precise boards and planks.

## Chain with Reliable Performance

**AdvanceCut™**
Perfect for homeowners cutting trees on their property and for landscape professionals who occasionally cut wood. User-friendly because of the low kickback designs.

# PowerCut™

Highly-experienced loggers and skilled forest workers require precision, power, and speed to get through a hard day's work.

Oregon's PowerCut saw chain possesses all of those qualities. PowerCut uses full chisel cutters that cut quickly through timber with precise cuts. Available in two cutting styles: traditional round ground and square ground options for more efficient cutting when logging the largest timber.

If you require top performance during a long day of logging, then PowerCut is the right cutting system for you.

**• Speed • Power • Precision**

## PowerCut™

### 20, 21, 22 LPX

An ideal chain for professional woodcutters who use .325" pitch saws. Low-vibration, full chisel cutters offer top performance. Offset depth gauges prevent cutters from driving into the sidewall of the cut, offering a smoother cut.

**Features and Benefits**

- LubriTec™ keeps your saw chain and guide bar oiled, for less friction and longer life
- Blued Cutters deliver high-quality protection against corrosion
- Top-Plate Filing Indicators makes accurate sharpening easie
- Our exclusive OCS-01 Steel delivers greater durability

## PowerCut™

### 72, 73, 75 EXL
### 72, 73, 75 EXJ

With a reshaped cutter and multi-axis grind technology for superior performance, sharpness and consistency; now the top option for professional woodcutters who use 3/8" pitch saws (replaces 72, 73, 75LGX & JPX). This low-vibration, full chisel cutter chain is engineered to utilize the power of today's professional saws and reduce the force applied by the operator. Designed to maximize every cut, our proprietary cutter technology gives users a sharper, more durable cutting edge that provides increased cutting performance with less effort.

**Features and Benefits**

- LubriTec™ keeps your saw chain and guide bar oiled, for less friction and longer life
- Blued Cutters deliver high-quality protection against corrosion

# SpeedCut™

Whether you're an arborist or a firewood cutter, high volumes of wood require speed, efficiency, and a strong performing saw chain to get the job done right. Oregon's SpeedCut exemplifies the efficiency, speed, and top performance of the entire SpeedCut cutting system.

SpeedCut is easy to use because it uses a narrow kerf cutting system and is easy to maintain. Narrow kerf requires less power than other cutting systems, making more efficient cuts that allows you to finish the job quickly and easily. Professionals will appreciate SpeedCut's unbeatable performance, and will love how easy it is to maintain.

**• Efficiency • Fast • Easy**

Narrow Kerf

## 95 TXL

Work faster, sharper, easier, with a more efficient saw chain. Ideal for arborists and property owners who want top performance. 95TXL is for saws up to 55 cc. (Replaces 95VPX.) Oregon® SpeedCut 95TXL narrow kerf cutting systems are more efficient, needing less power from the saw than standard cutting systems. Low-vibration, Micro Chisel cutters have small-radius working corners for excellent performance and easy maintenance. Get a faster, easier cuts with a reshaped cutting surface. A sharper, more durable cutting edge from a new precision grind and optimized cutting angle. Always use SpeedCut narrow kerf chain in combination with SpeedCut or other narrow kerf bars.

**Features and Benefits**

- LubriTec™ keeps your saw chain and guide bar oiled, for less friction and longer life
- Blued Cutters deliver high-quality protection against corrosion

## SpeedCut™

Narrow Kerf

### 95 VPX

A more efficient chain, 95VPX is ideal for arborists and property owners seeking top performance. For saws up to 55 cc. Our narrow kerf cutting systems are more efficient, needing less power from the saw than standard cutting systems. Always use narrow kerf chain in combination with narrow kerf bars. Low-vibration, Micro Chisel® cutters have small-radius working corners for excellent performance and easy maintenance.

**Features and Benefits**

- LubriTec™ keeps your saw chain and guide bar oiled, for less friction and longer life
- Blued Cutters deliver high-quality protection against corrosion
- Top-Plate Filing Indicators makes accurate sharpening easier
- Our exclusive OCS-01 Steel delivers greater durability

## Coming Soon!

### SpeedCut Nano 80 TXL

Available in 2019, SpeedCut Nano 80 TXL is an innovative new cutting system designed specifically for today's high-performance battery-powered and compact light-weight gas chainsaws. 80 TXL will be Oregon's most efficient saw chain for 1-3 HP chainsaws. Our patented design includes the following features:

- Increased cutting speed
- Longer run time per charge for battery saws
- Reduced tendency to stall in the cut
- Multi-axis grind technology for exceptionally clean cuts

SpeedCut Nano 80 TXL is part of an all-NEW .325" Low Profile™ cutting system – saw chain, guide bar, and sprocket – which must be used together and are not compatible with any other existing cutting systems.

## New Cutting System

SpeedCut Nano 80 TXL is the latest cutting system innovation from Oregon, specifically engineered to deliver maximum performance and efficiency for battery-powered and 20–35cc gas chainsaws.

A BETTER SAW STARTS HERE

# VersaCut™

Arborists, landscapers, and loggers have encountered every type of tree, shrub, stump, limb, and twig. If it's outdoors and made of wood, you've probably cut or maintained it.

Oregon's VersaCut was designed for you. VersaCut delivers both versatility and durability. The semi-chisel and Micro Chisel® cutters makes sure you stay sharp longer for all-day cutting.

VersaCut is also easy to maintain; and it stays sharp longer in a variety of cutting conditions.

Clean wood or dirty wood, frozen or green, VersaCut is the smart choice for tree professionals.

**• Easy • Durable • Versatile**

## VersaCut

### 91 VXL

91VXL is a high-performance, Low Profile™ chain. It's ideal for professional arborists and orchardists who use light-weight chain-saws. Cutter top-plates are 33% longer than standard 91 cutters. Low vibration, semi-chisel cutters provide an aggressive cutting edge with a forgiving sharpening profile and good stay-sharp.

**Features and Benefits**

- LubriTec™ keeps your saw chain and guide bar oiled, for less friction and longer life
- Blued Cutters deliver high-quality protection against corrosion

# ControlCut™

If you own or maintain a property, you will inevitably manage a lot of smaller jobs. They add up fast. Oregon's ControlCut saw chain is ideal for all light-duty work, because it gives you a smooth cut every single time and it's easy to maintain.

ControlCut has the longevity for bigger jobs, too. ControlCut's semi-chisel and Micro Chisel® cutting styles are ideal for property owners who need to cut the occasional tree limb, as well as experienced landscapers and orchardists who cut trees for a living.

ControlCut is low maintenance, and it stays sharper so you get jobs done quickly and easily.

**• Smooth • Controlled • Forgiving**

## ControlCut™

### 25 AP

Get your smallest jobs done just right. 25AP is light-weight, smooth chain, ideal for pruning — our Micro Chisel® cutters have small-radius working corners for excellent performance, and they are easy to maintain. The 25AP is small and light-weight, making it easy to use and maneuver.

- Available in Sculptor™ chain version – see page FOR 125

# DuraCut™ (formerly MultiCut™)

Woodcutters face challenging environments all the time. Fire-damaged trees can be unstable and require extra care. Trees in sandy environments, like desert ironwood, are notoriously tough on saw chains.

Oregon's DuraCut is made for these environments. DuraCut has an advanced plating process with extra layers of chrome that allows you to cut up to three times longer than conventional saw chain.

Working a site with standard filing tools? No problem. You can use your usual files to sharpen the chain and get back to work. DuraCut is the durable solution for your toughest woodcutting jobs.

**• Durable • Tough**

## DuraCut™

### M91 VXL

Work longer in dirty conditions with this more durable version of our aggressive 91VXL chain; cuts up to 3 times longer. 91VXL is a high-performance Low Profile™ chain. Low vibration, semi-chisel cutters provide an aggressive cutting edge with a forgiving sharpening profile. Maintain with standard maintenance tools.

**Features and Benefits**

- Extra heavy-duty chrome and an advanced plating process enables exceptional durability and stay-sharp
- LubriTec™ keeps your saw chain and guide bar oiled, for less friction and longer life
- Blued Cutters deliver high-quality protection against corrosion

# RipCut™

Any saw mill worker will tell you that ripping chain is different from all other saw chains. You need a special kind of chain for ripping cuts, the kind that transforms raw timber into the boards and planks used in homes and businesses. Oregon's RipCut is designed specifically for chain-type sawmills, producing smooth cuts with supreme efficiency.

RipCut's precise ripping cuts give you a smooth surface every time you cut parallel to the wood grain. RipCut isn't recommended for hand-held use, but that suits experienced millwrights just fine.

**• Ripping • Smooth**

## RipCut™

### 72, 73, 75 RD

Specially made for ripping — making cuts parallel to the wood grain. 72, 73, 75 RD has a special ripping application grind for making dimensional boards and planks from larger timbers. For use on chain-type sawmills. Not recommended for hand-held use.

**Features and Benefits**

- LubriTec™ keeps your saw chain and guide bar oiled, for less friction and longer life
- Our exclusive OCS-01 Steel delivers greater durability

| No. | Gauge | Standard Sequence |

# Sculptor™

Carvers require precision cutting tools to transform wood of different shapes and sizes into works of art. Sculptor was designed with carvers and precise detail work in mind. Sculptor's Micro Chisel cutters give you the freedom to create fine detail and finishing work.

Sculptor is also easy to maintain and light-weight for optimum maneuverability. It is the perfect tool for carvers, pruners, and any other user who values extra-fine cutting.

**25 A**

**25 F**

**25A** – For users with bars with a nose radius of 12 mm or less designed for carving. Micro Chisel® cutters have small-radius working corners to give you excellent performance with easy maintenance. Small size and light weight make 25A easy to use and maneuver.

**25F** – For users with bars with a nose radius of 12 mm or less designed for carving. The "full-house" sequencing makes 25F the preferred chain of some carvers cutting fine detail and finishing work. Micro Chisel cutters have small-radius working corners to give you excellent performance with easy maintenance. Small size and light weight make the 25F easy to use and maneuver.

See Guide Bar section pg. FOR 166

**Micro Chisel**

**Warning:** Failure to use this chain on bars with nose radii of 12 mm or smaller can result in severe kickback

Chain part numbers printed in *red italics* have been obsoleted. Contact your authorized Oregon distributor for availability.

# AdvanceCut™

Homeowners need a chainsaw within arm's reach for occasional yardwork and even storm-damaged trees. You also need a saw chain advanced enough to tackle tough jobs, but user-friendly enough and forgiving for occasional use.

Oregon's AdvanceCut was created for "DIY" homeowners because of its solid performance and reliable durability.

Low kickback design makes AdvanceCut an ideal – and dependable – choice for maintaining your property's trees. AdvanceCut is an essential tool for the discerning homeowner.

**• Dependable • Advanced**

## AdvanceCut™

### 90 PX

Maintain your trees with ease. 90PX offers higher chain efficiency, ideal for small, low-powered saws great for homeowners and landscapers (replaces 90SG). Our narrow kerf cutting systems increase efficiency. They need less power from the saw than standard cutting systems. The narrow .043" gauge reduces the weight of the bar and chain by roughly 15%. Low-vibration, low kickback Chamfer Chisel™ cutters' twin cutting corners offer outstanding performance. They are durable, easy to maintain and forgiving, comparable to round-cornered chains. Bumper drive link paired with depth gauge design, offers reduced kickback with strong performance. Always use with guide bars designed for narrow kerf saw chain.

**Features and Benefits**

- LubriTec™ keeps your saw chain and guide bar oiled, for less friction and longer life
- Top-Plate Filing Indicators makes accurate sharpening easier

| No. | Gauge | Standard Sequence |
|---|---|---|
| 90PX | .043" | |

### 3/8" Low Profile™

# PowerSharp®

Occasional saw chain users sometimes spend too much time using hand files to sharpen dull chain, or they lose an afternoon taking it to a dealer for professional sharpening. Fumbling an inexact sharpening is a thing of the past with PowerSharp. PowerSharp takes saw chain from dull to sharp in as little as three seconds.

PowerSharp is also ideal for professional users who want greater productivity on the job. Professionals get precise and knife-sharp edges quickly and easily – every time.

**• Fast • Easy • Precise**

## Sharpens On the Saw, On the Job, In Seconds™

PowerSharp® is an easy-to-use, precision sharpening system that gives chainsaw users the power to sharpen their chain in a matter of seconds with a simple attachment. Patent-pending features make PowerSharp a major advance over other sharpening methods.

## Easy to Use

PowerSharp is a system that includes the PowerSharp chain, the PowerSharp guide bar, and the PowerSharp bar-mount sharpener. Together, they work to make sharpening simple and easy.

### Attach

When the chain dulls, simply attach the bar-mount sharpener to the PowerSharp guide bar. Twin guide holes in the tip of the bar make perfect alignment fool proof.

### Sharpen

Press the tip of the sharpener to a solid surface for 3 – 5 seconds.

### Cut

And it's back to the job, working faster with less effort.

## PowerSharp®

### 91 PS

Now you can sharpen fast, easy, and on the saw with the PowerSharp system. Includes the 91PS PowerSharp saw chain; a guide bar designed for PowerSharp; and the PowerSharp bar-mount sharpener. Sharpen the 91PS chain in a flash. Go from dull to sharp in just three seconds with this easy-to-use, precision sharpening system. Stays sharp three times longer than 91PX saw chain.

**Features and Benefits**

- LubriTec™ keeps your saw chain and guide bar oiled, for less friction and longer life

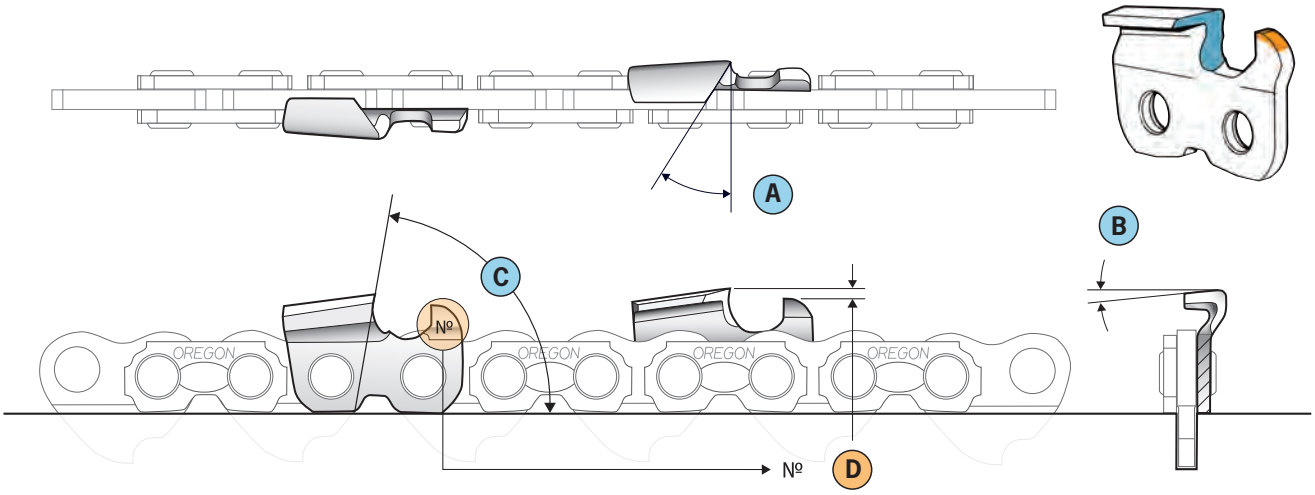
*Please note. On matters of safety or suitability for saw chain NOT manufactured by Oregon, this chart offers no information or comment. Please read and follow all the notes below to use this chart properly.

### Notes:

- This chart is meant to help those who want to replace other brands of saw chain with a comparable Oregon chain.
- Many saw chains are interchangeable in terms of their fit-up. But interchanging certain types of chains might not be right for some users. Stay safe. Be certain that the chain you choose is right for both the use, and for your level of experience.
- You can learn more about compliance. Find out about the low kickback performance requirements of ANSI B175.1-2012, or about other safety issues as they pertain to any Carlton, Stihl, or Windsor chain. See the documents on saw chain safety provided by those companies.
- This chart should not be used to replace Oregon saw chain with any other brand of chain. Doing so is a misuse of this chart and those who do so assume any and all risks associated with such misuse.
- Chain part numbers printed in *red italics* are now obsolete. Contact your authorized Oregon distributor for availability.

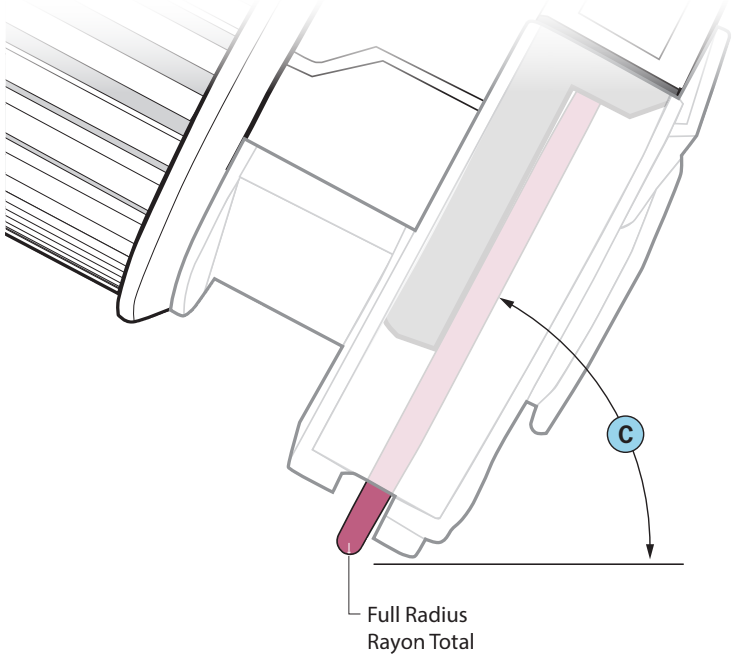
# Saw Chain

## Sharpening Geometry



**Sharpening geometry is universal for all chain types.**
See "Filing Angles" or "Grinding Angles" chart on the following pages for recommended A, B, C, or D sharpening or grinding angles by chain type.

## Universal Grinding Wheel Dressing



Saw chain complies with low kickback performance requirements (FOR 2–3)
Saw chain does not comply with low kickback performance requirements (FOR 2–3)
Chain part numbers printed in *red italics* have been obsoleted. Contact your authorized Oregon distributor for availability.

❶ When using an Oregon® file guide, ALWAYS hold it level, 0-degrees flat on the Top Plate.
❷ Oregon Depth Gauge File (flat file) P/N 12211 must be purchased separately for use with Oregon Depth Gauge Tools.
❸ Square Ground Filing: A 15° cutting edge is the result when the file is held at 45° top-plate angle and 45° down angle.

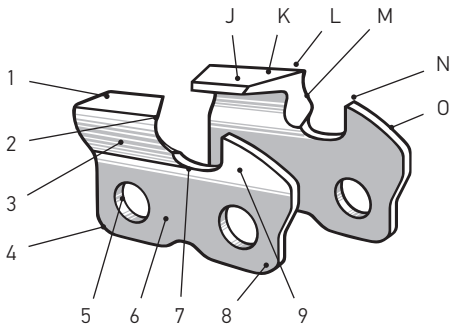
## Properly Sharpened Cutter

**Cutter features**

1. Top Plate
2. Square or Round Working Corner
3. Side Plate
4. Heel
5. Rivet Hole
6. Chassis
7. Gullet
8. Toe
9. Depth Gauge

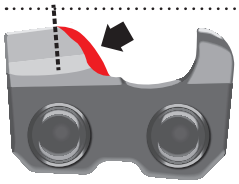


**Sharpened Cutters have:**

J. Correct angle on top plate (degree of angle depends on chain type)
K. Razor-edge on top plate (no light should reflect from this edge)
L. Slightly protruding "hook" or point (curve on non-chisel chain)
M. Razor-edge (with no nicks) on side plate
N. Top of depth gauge at correct height below top plate
O. Front of depth gauge rounded off

## Filing Errors

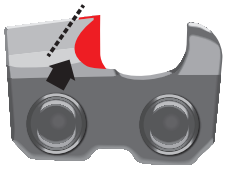
**Backslope on side plate cutting edge – cutter won't feed into wood**



Cause
File held too high

Solution
Refile cutters to recommended angle

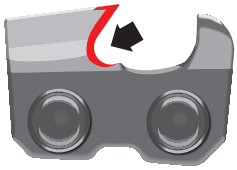
**Too-thin top plate causes rapid dulling**



Cause
File handle held too low

Solution
Refile properly, at recommended angle

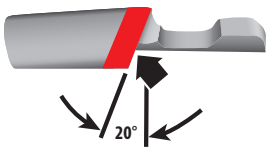
**To much hook in side plate cutting edge – cutters grab, cut rough**



Cause
File held too low or file is too small

Solution
Refile to recommended angle with right size file

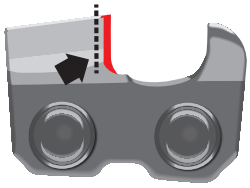
**Top plate angle less than recommended – slow cutting, excess wear on chain and bar**



Cause
File held at less than recommended angle

Solution
Refile at correct angle

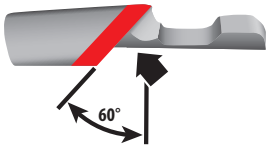
**Flat top plate cutting angle – chain won't feed into wood, won't cut**



Cause
File handle held too high

Solution
Refile properly at recommended angle

**Top plate angle more than recommended – side plate cutting edge is thin and dulls rapidly**

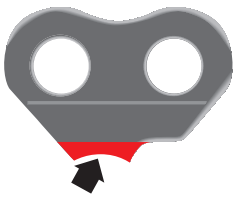


Cause
File held at more than recommended angle

Solution
Refile at correct angle

## Drive Link Wear

**Rounded concave bottom**

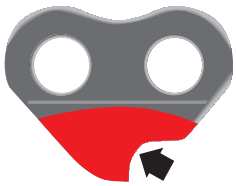


Cause
Shallow grove on bar tip

Solution
Regroove bar tip. Bar may need replacing

Note
Applies to DuraCut™ bars only

**Scars on sides**

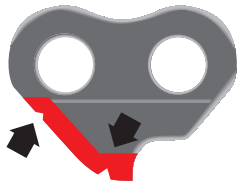


Cause
Loose chain jumping off bar

Solution
Adjust chain tension. Replace bent drive links or replace chain. Refile at correct angle

## Drive Link Wear

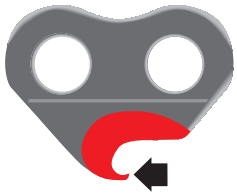
### Nicked bottom or back



Cause
Cutting with loose chain, or wrong pitch sprocket

Solution
Adjust chain tension. Install correct sprocket. File off burrs. Replace damaged drive links or replace chain

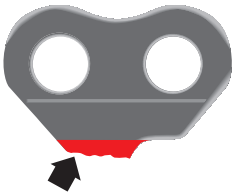
### Front point turned up



Cause
Drive links bottoming in sprocket. Sprocket worn

Solution
Replace sprocket. Sharpen tangs. Check for burrs

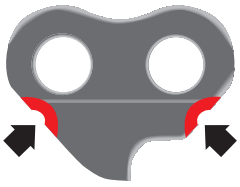
### Battered and broken bottom



Cause
Chain jumped bar. Spur sprocket hit drive links

Solution
Replace damaged drive links, sharpen tangs with round file or replace chain. Remove burrs

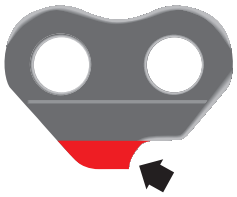
### Front or back peened



Cause
Wrong pitch sprocket or pro-longed chain chatter

Solution
Replace sprocket. Adjust chain tension. Chain may be damaged beyond repair

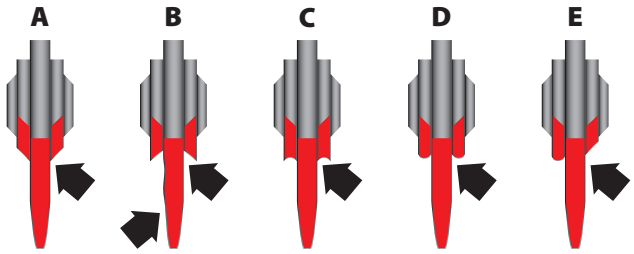
### Sides worn round at bottom



Cause
Chain wobbled in bar groove. Uneven cutters or worn bar rails

Solution
Rework bar rails and groove. Correct chain filing

### Excess wear on bottom of all chain parts



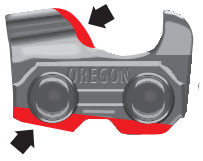
A. Open bar groove B. Severe abrasion and wobbly chain on thin bar rails
C. Rails not flat D. Wobbly chain – rails too thick E. One rail too thin or soft

Cause
Uneven filing, worn bar rails cause chain to wobble

Solution
File chain properly. Recondition bar rails or replace bar. Replace chain if necessary

## Cutter and Tie Strap Wear

### Excessive heel wear on cutters and tie straps



Causes
1. Blunt top plate filing
2. Forcing dull chain to cut
3. Lack of lubrication
4. Low depth gauge settings
5. Forcing chain to cut frozen wood

Solution
File cutters properly. Don't force dull chain to cut. Use oil freely

### Light damage on cutting edges of top and/or side plates

Cause
Excessive pressure on dull or misfiled cutters. Common during winter

Solution
File chain correctly. Use oil freely

## Cutter and Tie Strap Wear

### Edges burred and notch peened on tie straps

Cause
Chain chatter due to loose chain tension and improper filing

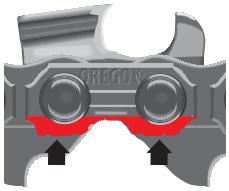
Solution
Correct chain tension. Refile chain properly. Replace sprocket if badly worn

### Peened notch in tie strap causing tight joints and broken drive links

Cause
Chain run on badly worn spur sprocket or wrong pitch sprocket

Solution
Replace worn sprocket. Chain may need replacing

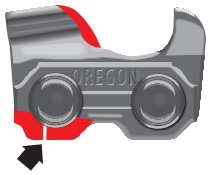
### Peening on bottom of cutters and tie strap – causes tight joints



Cause
Loose chain tension. Result of dull cutters and forcing dull chain into wood

Solution
Keep proper tension. Keep cutters sharp. Chain may need replacing

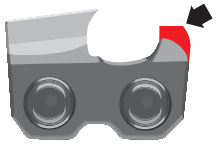
### Cracks under rear rivet holes on cutters and opposing tie straps



Cause
Excessive pressure on dull or misfiled cutters – common during winter

Solution
File chain correctly. Use oil freely

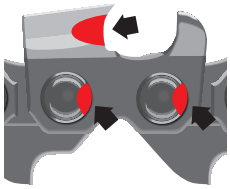
### Blunt depth gauge causes rough cutting



Cause
Uneven filing

Solution
Use correct depth gauge jointer to lower gauges evenly

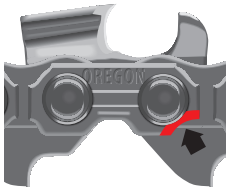
### Severe damage on either side of top and/or side plates



Cause
Cutters hit abrasive materials

Solution
File cutters to remove all damage

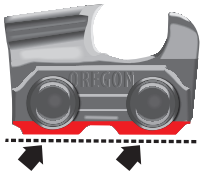
### Peening on front corner of cutters and intermediate tie straps – causes tight joints



Cause
Chain striking bar entry. Sprocket too small or loose chain tension

Solution
Use proper bar and sprocket. Adjust chain tension correctly

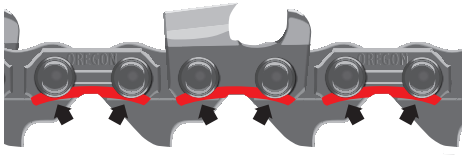
### Excessive wear on bottom of cutters and tie straps



Cause
Depth gauges too high. Cutting edge cannot get into wood

Solution
Lower depth gauges to proper setting. Keep cutters filed correctly

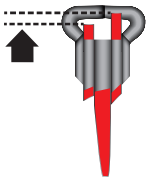
### Concave wear on bottom of cutters – connecting tie straps



Causes
Chain tension too tight
Normal wear from undercutting (cutting with top of bar)

Solution
Adjust chain tension Reduce cutting with top of bar

### Uneven depth gauge height. Chain won't cut straight.



Cause
Improperly filed depth gauge

Solution
Round off front corner to maintain original shape

## Saw Chain Drive Link Counts & Length in Feet

## Professional

Loggers, arborists, orchardists, millwrights, forestry workers, and other highly skilled woodcutters require guide bars designed for the demands of their tough professions. Oregon® makes guide bars that are strong, durable, and reliable, and our state-of-the-art LubriTec oiling system promotes a long lifespan.

**NEW**
SpeedCut, VersaCut, & ControlCut

**OLD**
Pro-Lite®

### SpeedCut™
For professionals who cut high volumes of wood. Narrow kerf. Durable and efficient. The lighter weight helps reduce operator fatigue.

### VersaCut™
For professionals (like arborists) who cut with a variety of applications. Versatile and durable. The lighter weight helps reduce operator fatigue.

### ControlCut™
for users who require smooth and controlled cuts. Smaller radius nose reduces kickback. The lighter weight helps reduce operator fatigue.

**NEW**
PowerCut

**OLD**
Power Match®

### PowerCut™
For loggers and other users who require a tough, heavy-use tool. The chrome-moly body helps reduce wear and promotes a longer lifespan.

**NEW**
DuraCut

**OLD**
Armor Tip

### DuraCut™
Made for challenging cutting environments. Stellite nose and chrome-moly body promotes ultra high-wear resistance.

## Occasional User

Homeowners and other occasional users prize simplicity and reliability for yard work. You need a tool that can cut a stubborn tree or make that Saturday set aside for yardwork pleasant and satisfying. Oregon® guide bars like the Advance-Cut and Single Rivet were designed with occasional users in mind.

Oregon guide bars are safe, simple to use, light-weight, and provide added value by saving you money.

**NEW**
AdvanceCut

**OLD**
Pro-Am®

### AdvanceCut™

For experienced homeowners, as well as farmers and firewood cutters. Multi-rivet nose, light-weight, and maneuverable.

**NEW**

**OLD**
Double Guard®

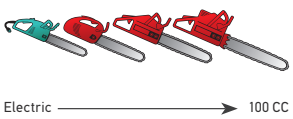
### Single Rivet

For homeowners who only have an occasional need to use a chainsaw. The single-rivet, smaller-radius noses helps reduce kickback.

# Guide Bars

## Choose the Right Guide Bar for Your Saw

For safety and performance, it's essential that you choose the right guide bar. From electric and small gas to the largest professional powerheads, Oregon has the bar you need - beginning with 8" up to 42". Oregon offers you the broadest selection of guide bars in the industry. Use the chart below to help you choose the right guide bar for your saw.



| | | 4 | 0 | | | | | 8 | | | 3 | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | .043" | .050" | | | | | .058" | | | .063" | | | | |

### Gauge (in.)

4 = .043"
**0** = .050"
8 = .058"
3 = .063"

### Professional Guide Bar Codes

**SpeedCut™**

TXL = SpeedCut
*MP* = Narrow kerf sprocket-nose (Pro-Lite®)
*MG* = Narrow kerf sprocket-nose with Guard Mate holes (Pro-Lite®)

**VersaCut™**

VXL = VersaCut
SLH = Sprocket-nose (Pro-Lite®)
*SLG* = Sprocket-nose (Pro-Lite®)
*SP* = Sprocket-nose (Pro-Lite®)
*GP* = Sprocket-nose with Guard Mate holes (Pro-Lite®)
*GL* = Sprocket-nose with Guard Mate holes (Pro-Lite®)

**ControlCut™**

PXL = ControlCut
*SLB* = Sprocket-nose (Pro-Lite®)

**PowerCut™** formerly Power Match®

**RN** = Replaceable sprocket-nose
PM = Replaceable sprocket-nose
RW = Replaceable sprocket-nose

**DuraCut™** formerly Armor Tip

AT = Solid nose, laser welded tip with wear-resistant alloy

### Occasional User Bar Codes

**AdvanceCut™** formerly Pro-Am®

SX = Sprocket-nose
PX = Sprocket-nose
GD = Sprocket-nose with Guard Mate holes
ML = Narrow kerf sprocket-nose
SF = Sprocket-nose

Single Rivet formerly Double Guard®

SD = Sprocket-nose
DG = Sprocket-nose with Guard Mate holes
ML = Narrow kerf sprocket-nose

### Sprocket Nose Codes

| Pitch | Tooth Count |
|---|---|
| A = 1/4" | 10 |
| B = .325" | 10 or 12 |
| **D** = 3/8" | 9 or 11 |
| E = 3/8" | 7 or 9 |
| F = .404" | 10 |
| G = .325" | 12 |
| H = 3/8" | 11 |

T318

**Comments:**

- In a few cases, where two bars would have the same length in their part numbers but different drive link counts, the letter Z will be used in the bar mount description to distinguish between them (K095 and Z095 for example).
- Chainsaws originally equipped with an Intenz® bar, and saws adapted to take an Intenz® bar, do not have a "bar adjustment pin" for tensioning the chain. Use ONLY an Intenz bar when replacing the guide bar on these saws. See page FOR for important information on Intenz bars.
- PowerCut solid body bars may be stamped with XXX, ZZZ or other letters as they can have different noses installed on the body, thereby changing the part number.
- Guard Mate holes are built into the noses of certain types of Oregon bars and allow the attachment of a Guard Mate tip guard to help reduce the risk of kickback.
- Oregon Sculptor™ carving bar part numbers do not follow the Oregon bar part numbering system.
- Bar types and part numbers printed in *red italics* have been obsoleted. Contact your authorized Oregon distributor for availability.

These completely re-designed light-weight professional guide bars are lighter, stronger and longer lasting. Designed for top performance for professional woodcutters.

**SpeedCut** Perfect for professionals who cut high volumes of wood. The **narrow kerf system** requires less power so your cuts are much faster. SpeedCut lives up to its name because of its lighter weight, durability, and best-in-class efficiency.

**VersaCut** Ideal solution for arborists, orchardists, and other professionals who encounter every type of tree, shrub, or limb during their work day. VersaCut has the versatility and durability for your ever-changing environment.

**ControlCut** Made for the work days when you encounter a dozen small jobs and a few larger ones. ControlCut gives you the freedom to use one tool, rather than two or three. The guide bar's smaller-radius nose reduces kickback for smooth cutting.

= Narrow kerf

### Features and Benefits

- More precise cutting from a stiffer bar
- Provides better balance on smaller saws
- Lighter weight means less fatigue
- Longer life from a hardier rail
- Longer nose life and better performance with a new sprocket nose system
- Reduced rail wear rate and more precise cutting via better chain fit-up
- LubriTec™ keeps your chain and guide bar oiled, for less friction and longer life

**Recommended Saw Sizes** – Up to 2.3 – 4.0 cu. in (38 – 65 cc)

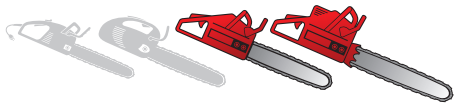
For loggers and other tree-cutting professionals that need heavy-use guide bars. PowerCut's chrome-moly steel body is tough and powerful, enabling you to cut through timber precisely and efficiently. The replaceable sprocket nose reduces the need for new guide bars, giving the PowerCut bar a longer life and greater durability.

### Features and Benefits

- Replaceable bar nose, eliminates need to purchase a new bar
- Nose fastens with a single rivet, and is secured by wide, strong, overlapping ears
- Long nose takes most of the abuse. Less wear to the body.
- Much stronger bar with super tough chrome-moly steel. And tough rails with excellent resistance to wearing and chipping.
- LubriTec™ keeps your chain and guide bar oiled, for less friction and longer life

**Recommended Saw Sizes** – 3.5 cu. in (58 cc) and larger



**Comments**
PowerCut solid body bars may be stamped with XXX, ZZZ or other letters as they can have different noses installed on the body.

### PM Pro Finish

- Squared, polished rails minimize chain leaning.

### RW Reduced Weight

- 26% lighter than a standard bar at 32" length
- Aluminum core
- Precision milling from a solid bar core, without sacrificing durability

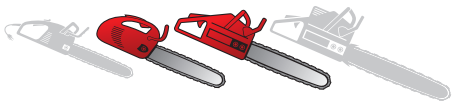
Intenz
T041

Exceptional tool for homeowners who regularly cut trees on their properties or yards, as well as farmers and firewood cutters. AdvanceCut is for experienced users who need power and reliability in challenging yard conditions. The multi-rivet nose gives you durability, and AdvanceCut's maneuverability and light-weight help you get the job done quickly.

### Features and Benefits

- Slim symmetrical contour is light-weight, easy to maneuver, and is reversible for longer life
- Available in models with the Intenz tensioning mechanism built into the bar itself
- Multi-rivet nose for long-lasting durability
- LubriTec™ keeps your chain and guide bar oiled, for less friction and longer life

**Recommended Saw Sizes** – Up to 3.5 cu. in (57 cc)



### Narrow Kerf

- Thickness of side laminates is reduced to obtain all the advantages of narrow kerf cutting when used in combination with all narrow kerf .325" 95-series chain

| | 535048 | 14" (35 cm) | 75 | 51 |

## PowerCut™ RSN Kits

Long nose takes most of the abuse and minimizes wear on the bar body on PowerCut (Power Match®) bars. A single nose for .050", .058", and .063" gauges. Attachment rivet included. (Nose radius 1.115"). Standard RSN kits fit "RN" bars.

| OREGON | Description | Pitch – Tooth Count |
|---|---|---|
| 34775 | Standard RSN Kit | .325" – 12 |
| 30853 | Standard RSN Kit | 3/8" – 11 |
| 30855 | Standard RSN Kit | .404" – 10 |
| *523437* | Replacement nose attachment rivets 25-pack | |

Part numbers printed in *red italics* have been obsoleted.
Contact your authorized Oregon distributor for availability.

## PowerCut Pro RSN kits

Made for Pro and reduced-weight PowerCut bars with the features that professional cutters want. Long nose takes most of the abuse and minimizes wear on the bar body. A single nose for .050", .058", and .063" gauges. Attachment rivet included. (Nose radius 1.115"). Pro RSN kits fit "PM" and "RW" bars.

| OREGON | Description | Pitch – Tooth Count |
|---|---|---|
| *543554* | Pro RSN Kit PM RW | .325" – 12 |
| *39520* | Pro RSN Kit PM RW | 3/8" – 11 |
| *39715* | Pro RSN Kit PM RW | .404" – 10 |
| *523437* | Replacement nose attachment rivets 25-pack | |

## Guard Mate Bar-Nose Tip Guards

A proven product that reduces the risk of bar-nose kickback. Only for use on bars with Guard Mate holes.

33812

33810

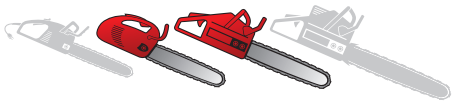
Intenz®
T041

Sprocket-nose laminated guide bars. Designed for full-time woodcutters who need the best combination of value and professional durability. For cutting clean wood with small to medium-size saws.

## Pro-Lite Features and Benefits

- Slim contour, easy to maneuver
- Impressive bar-body strength. Excellent resistance to wear and chipping. Super-tough chrome-moly steel.
- Replaceable nose sprocket kit (except SP and GP bars)

**Recommended Saw Sizes** – Up to 2.3 – 4.0 cu. in (38 – 65 cc)



## MP & MG

- Thickness of side laminates is reduced to obtain all the advantages of narrow kerf cutting when used in combination with narrow kerf .325" 95VPX and 95TXL chain

## Pro-Lite® – Part Numbers ( still available while supplies last )

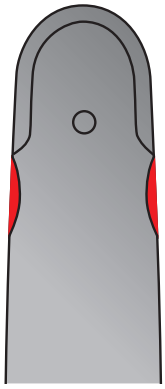
# Guide Bars – Troubleshooting

## Guide Bar Problems

### Chipped rail

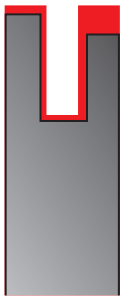


Cause
Chipping of rails behind hard tip. Continual pressure of bar on one area. Dull chain. Loose bar tension

Result
Material chipping out of one or both rails behind the hard tip

Solution
Reverse bar to reduce wear. Replace bar. (This chipping can cause chain damage)

### Thin rail and low rail

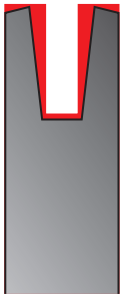


Cause
Chain leaning over, cutting crooked. Forcing dull chain to cut. Damage to cutters on one side of chain

Result
Thin rail on one or both sides of bar. Rail could be blue color in thin area

Solution
Bar cannot be repaired if rail is thin and uneven. Replace it. Make sure chain doesn't continue to lean. If it does, replace with a new chain

### Worn bar rails

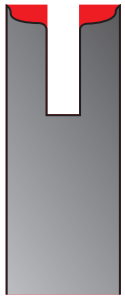


Cause
Worn bar rails are normal for a bar that has been in service for a period of time

Result
Shallow groove

Solution
Replace bar

### Wire edge bar rail



Cause
Normal wear caused by pressure of chain on edges of bar rails

Result
Rail edges may chip if wire edge is not removed

Solution
Use a flat file on edge of bar rail to remove wire edge or Bar Rail Dresser #111439

## Sprocket Nose Bar Problems

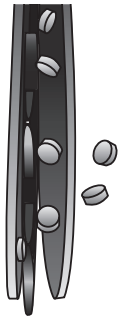
### Blue discoloration on bar nose

Cause
Nose was pinched. Friction from revolving sprocket caused heat and area turned blue. Could be lack of lubrication

Result
Entire edge turns blue or only in one or two spots

Solution
If this happens in the nose bearing area the bar is no longer service-able. Replace bar if laminated bar

### Spread nose rails and bearing loss



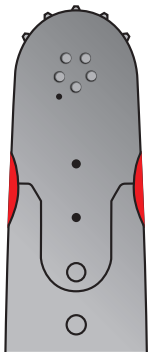
Cause
Chain jumped off bar. Carving with nose. Limb caught nose. Twisting nose. Any operating accident

Result
Spread nose rails and loss of bearings

Solution
Replace bar or replace nose of RSN bar

## Sprocket Nose Bar Problems

### Chipping at nose connection (replaceable nose)

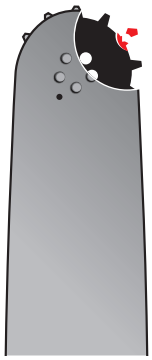


Cause
Loose chain tension. Continual pressure in this area. Heavy limbing at this point

Result
Chipping at connection of both body and nose assembly

Solution
Replace nose assembly and dress rail of bar and nose to match

### Section broken out of sprocket

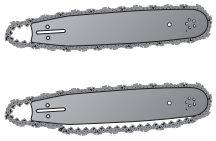


Cause
Irregular operating condition which forced drive link sideways. Throwing the chain when limbing. Chain tension run too loose

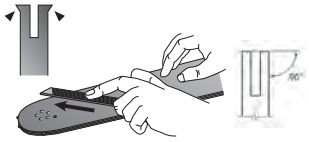
Result
Open nose. Broken sprocket. Bearings fall out. One or two broken teeth

Solution
Replace bar nose assembly.

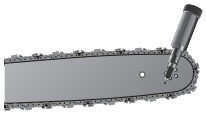
## Basic Guide Bar Maintenance Tasks



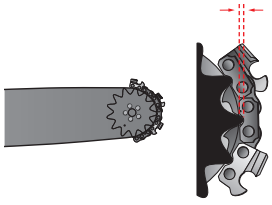
**Chain Tension**
Inspect before use and after every hour of use



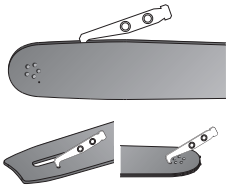
**File Bar Edge**
File bar edge to 90° weekly or use Bar Rail Dresser #111439



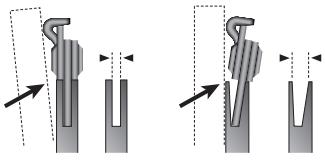
**Bar Nose Grease**
Turn nose sprocket while pumping grease until whole sprocket has new grease. Do not push dirt into hole



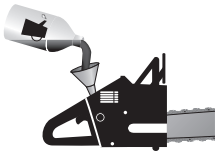
**Bar Tip Clearance**
On sprocket nose bars, check for clearance around the bar tip between top of rails and the bottom of cutters or tie straps weekly. Replace nose sprockets before cutters or tie straps contact the bar rails



**Bar Cleaning**
Clean bar channel, grease hole and, oil hole daily



**Chain Lean**
With chain on the bar, hold a straight-edge against the bar body and against a cutter side plate. A good groove will hold the chain straight, leaving a small gap between the straight edge and bar body. A worn groove will let the chain lean until straightedge is flush with bar body. Replace bar if groove is worn. Check weekly



**Chain and Bar Oil**
Inspect before use and after every hour of use

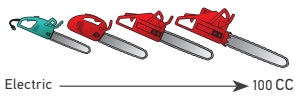
# Sprockets

## Selecting The Right Sprocket

Oregon® offers multiple options for different sprocket needs. The sprocket, chain, and guide bar make up the cutting system. The sprocket is an essential component of this system. The chart below will help you select the right sprocket for your system.



| | | 4 | 0 | | | | 8 | | | 3 | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | .043" | .050" | | | | .058" | | | .063" | | |

## Power Mate® Rim Sprocket Systems

The most effective sprocket for all types of chainsaw users.

- Extend operational life by maximizing chain and bar groove alignment, while reducing overall costs
- A two-piece design includes a drum with a replaceable rim, allowing the rim to be replaced multiple times before the entire unit is replaced
- Replacement schedule: Every three rims

**Attention Dealers:** Some Oregon® Power Mate systems have bearings installed, but some do not. Part numbers ending with a number have bearings installed. Part numbers ending with the letter "X" do not. Bearings must be purchased separately for all rim systems having part numbers that end with an X. See the facing page for information on replacement rims. See bearing fit up info starting on page FOR 204–208.

# Sprockets

## Oregon® Rims

Rims provide the ultimate cutting system performance.

- Smoother cutting and less chain wear than spur sprockets
- Radial port design uses centrifugal force to throw off sawdust and debris
- Wear-depth indicators show when it's time to replace the rim
- Replacement schedule: every two chain loops

Attention Dealers: Some Oregon® spur sprockets have bearings installed, but some do not. Part numbers ending with a number have bearings installed. Part numbers ending with the letter "X" do not. Bearings must be purchased separately for all rim systems having part numbers that end with an X. See bearing fit up info starting on pages FOR 204–208.

*For the 6-tooth spur column part numbers, use only with 3/8" Low Profile™ chains (90PX, 91P, 91PX, 91VXL) or the competitive equivalent of the previously listed chains.

## Spur Sprocket Additional Components

Washers

Bearings

Bushings

NOTE: Additional components are available separately and part numbers are listed in the charts on pages FOR 204–208.

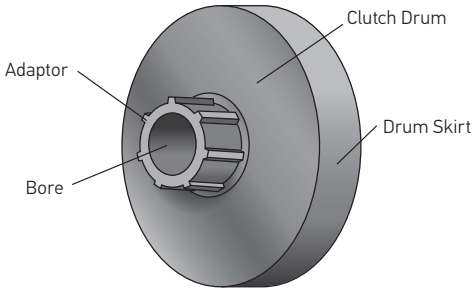
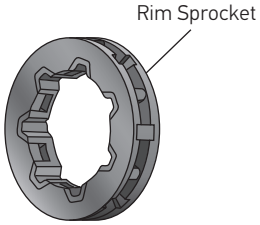
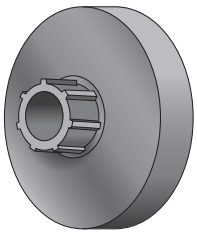
## Rim & Spur Sprocket Troubleshooting Guide

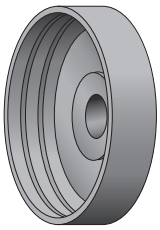




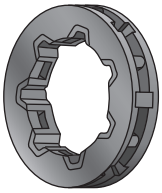
**Power Mate® Sprocket**
(front view)



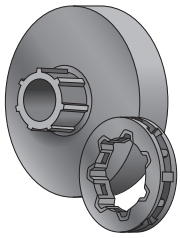
**Power Mate Sprocket**
(inside view)



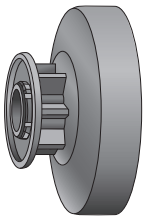
**Oregon® Rim**



**Power Mate Rim Sprocket System**

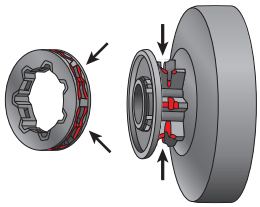


**Spur Sprocket**

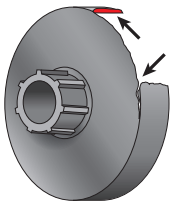


## Basic Sprocket Maintenance

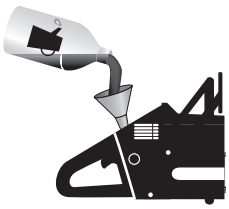
**Rims and Spur Sprocket**
Visually inspect daily



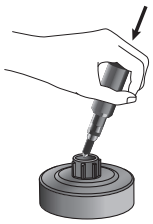
**Power Mate Sprockets**
Visually inspect daily and before use



**Bar and Chain Oil**
Fill before use and when reservoir is empty

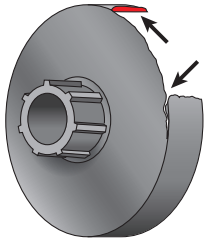


**Sprocket Grease**
Apply grease to sprocket once a week

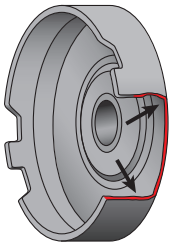


## Typical Drum Stress

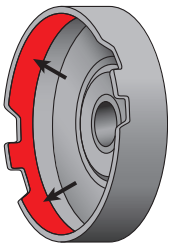
**Broken/cracked skirt**



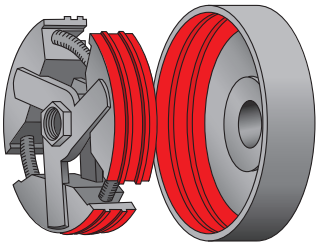
**Cracked oil pump lug**



**Worn inner diameter**



**Worn clutch, worn inner diameter**



Result
Check daily for cracks, splits, or excessive wear in the sprocket clutch drum

Solution
If the drum is cracked, split, or broken, as shown, replace the drum immediately with a new one.

# Sprockets — Troubleshooting

## Rim & Spur Sprocket Troubleshooting Guide

### Spur Sprocket Damage

Cause
This condition can occur when cutting chain drive links wear through the case-hardened teeth

Result
Cutting chain can be ruined by damaged spurs

Solution
If spur sprocket teeth look like this replace immediately

### Rim Damage

Cause
Wear can occur under normal conditions. However, check for excessive rim wear and look for wear on outer diameter

Result
The reduction in diameter can also allow chain drive links to damage the sprocket adaptor

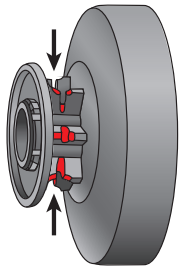
Solution
Replace rim after two chains

### Severe Rim Damage

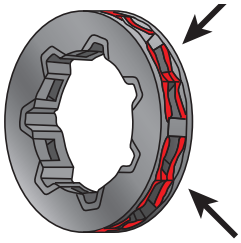
Solution
Do not fit cutting chain to rims that are severely worn. Serious chain damage will result and the rim may break

4

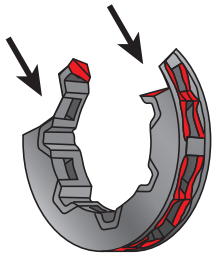
### Worn Spur



### Outer Wear

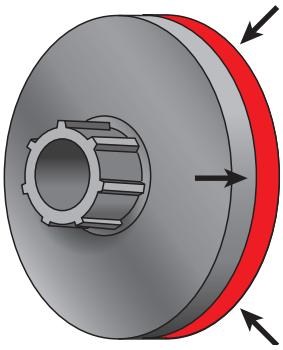


### Broken Rim

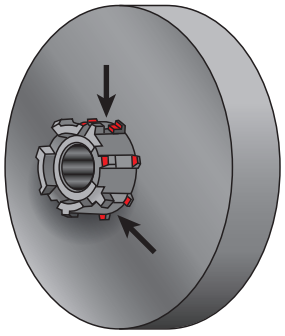


## Chain Brake Stress

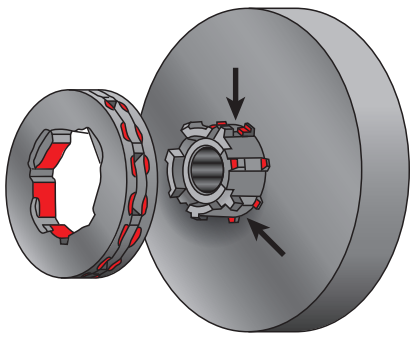
### Skirt Wear/Brake Band



### Wear/Adaptor Damage



### Worn Rim and Adaptor Spline



Result
An overly tightened strap around the drum will cause the strap to rub against the clutch drum which will overheat and soften the metal causing potential drum failure

Solution
If your chainsaw has a chain brake, always check the brake to make sure it stops the rotating chain when activated. Make certain that the brake strap around the drum is not too tight

Tygon fuel lines, Oregon fuel lines and primer bulbs are compatible with up to 10% Ethanol blend fuels unless otherwise stated. Using Ethanol blends higher than 10% may speed deterioration and cause leakage.

OREGON Replaces Description

## Oregon® Fuel Line

- Oregon Fuel Line is a specially formulated gas and oil vinyl tubing — made for use with lawnmowers, chainsaws, and snowmobiles
- Maintains air tight seal on fittings — even in extreme temperatures
- Translucent material resists swelling or hardening
- Compare to Tygon®

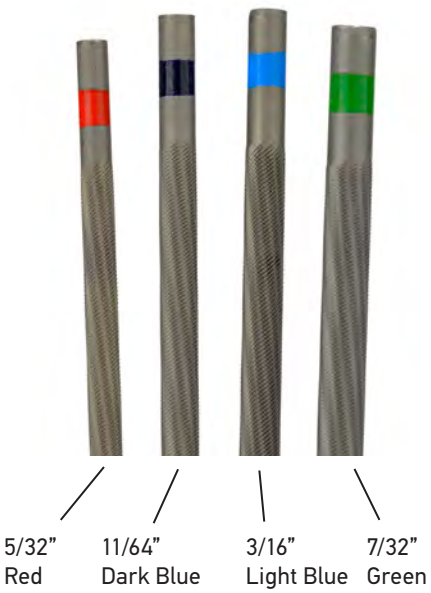
## Color ID™ Files

Introducing a new feature to our premium Oregon Round Files: Color ID.

Color ID is a visual indicator that makes it easier to select the right file straight out of your tool box. Our most popular premium round files are now marked with a distinctive color that denotes the diameter of the file.

You'll find that the Oregon Round Files are the same great product you've come to rely on over the years; we've just added this new exclusive feature to help simplify your day.



## Summary of Changes & Affected Part Numbers

| Part Number | Diameter | Color ID™ |
|---|---|---|
| **12-Pack Round Files** | | |
| 70502 | 7/32" – 5.5 mm | Green |
| 70503 | 3/16" – 4.8 mm | Light Blue |
| 70504 | 5/32" – 4.00 mm | Red |
| 70505 | 13/64" – 5.2 mm | No Color ID |
| 70511 | 11/64" – 4.5 mm | Dark Blue |
| **4x3-Pack Round Files** | | |
| 70502T | 7/32" – 5.5 mm | Green |
| 70503T | 3/16" – 4.8 mm | Light Blue |
| 70504T | 5/32" – 4.0 mm | Red |
| **6-Pack Round Files** | | |
| 90410 | 5/16" – 8.0 mm | No color ID |

# Saw Chain Filing

Product Code

Note: See "Filing Angles" in the Saw Chain section's "Saw Chain Sharpening Chart" for the correct file.

- Superior performance
- Finest steel material
- State-of-the-art production and finishing processes
- Smooth filing action
- Long stay-sharp
- Resists clogging

## Oregon Flat Files

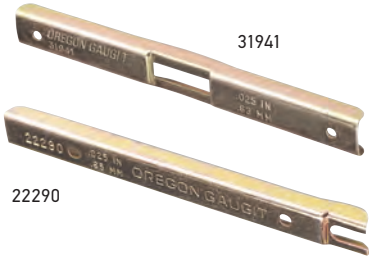
Used in combination with an Oregon depth gauge tool.

| OREGON | Description | Product Code |
|---|---|---|
| **12211** | 6" Flat Depth Gauge File | |

- Aggressive cutting design
- Made from the finest steel
- Specially heat-treated for maximum stay-sharp
- Resists clogging
- 6" working length

## Depth Gauge Tools

A major factor affecting any saw chain's level of safety and performance is the depth gauge setting.



| OREGON | Description – 10-Packs | Product Code |
|---|---|---|
| **31941** | .025" Drop-Center Depth Gauge Tool | |
| **22290** | .025" Depth Gauge Tool | |
| **22291** | .030" Depth Gauge Tool | |
| **38850** | .050" Depth Gauge Tool | |
| **26800** | .060" Depth Gauge Tool | |
| **107529** | .070" Depth Gauge Tool | |

- Makes accurate, consistent depth gauge settings easy
- Available in five sizes with built-in .025", .030", .050", .060" or .070" depth gauge settings

## Depth Gauge Tool & Flat File

| OREGON | Description | Product Code |
|---|---|---|
| 40466 | Depth Gauge Filing Kit<br>Includes .025" drop-center depth gauge tool & flat file<br>Display pack | |

## File Handles

Anytime files are sold, file handles can be sold too, using the Oregon® display box.

| OREGON | Description | Product Code |
|---|---|---|
| 30870-B | File Handles<br>Display box (100 handles)<br>Fits on the sales counter<br>Holds 100 wooden handles<br>Has a stand-up space for files<br>(files not included) | |
| 558286 | File Handles<br>Bulk pack (25 handles) | |

## File Guide

Assembled file guide includes: one round file, one frame, and one wooden handle – display pack.

- Grips file securely
- Lines on the guide's frame make it easy to align the file consistently and correctly
- Keeps file at the correct depth

# Forestry Accessories

## Felling Lever

Edge designed for excellent grip on wood

- Heavy-duty forged lever
- Sliding, forged cant hook
- Bent handle provides extra leverage
- Comfortable non-slip handle

| OREGON | Description | Product Code |
|---|---|---|
| 536305 | Long-Handled Felling Lever – 51" Long | |

## Lifting Picks

Notches for extra grip in frozen wood

Non-slip handle with stop end

- Significantly easier log handling
- Ergonomic, light-weight aluminum handle
- Sharp tip grips wood easily

| OREGON | Description | Product Code |
|---|---|---|
| 536319 | Lifting Pick – 19.7" | |
| 536320 | Long Lifting Pick – 27.5" | |

## Lifting Tongs

Non-slip ergonomic leather handle (Patent Pending)

- Forged steel
- Non-slip leather (small tongs) or rubber (large tongs) handle
- Articulated joints

| OREGON | Description | Product Code |
|---|---|---|
| 536321 | Small Lifting Tong – 8" Jaw Opening | |
| 536306 | Large Lifting Tong – 12" Jaw Opening | |

## Marking Crayons & Crayon Holder

Writes and marks on wood, metal, stone, concrete, tiles, ceramic, plastic, glass, rubber, etc.

### Crayon Features

- 6-sided shape to prevent rolling
- Paper sleeve
- Diameter: 12 mm; length: 120 mm
- 12 per box

### Crayon Holder Features

- Made of durable metal
- For round and hexagonal crayons with diameter of 10-12 mm

| OREGON | Description | Product Code |
|---|---|---|
| 295360 | Marking Crayon (12-Pack) – Blue | |
| 295361 | Marking Crayon (12-Pack) – Red | |

| 295365 | Marking Crayon (12-Pack) – Black | |
| 520272 | Crayon Holder | |

## Guide Bar & Chain Oil

Specially compounded to provide extra high tackiness and reduce "throw off" even under adverse weather conditions. Provides maximum engine power, low friction and faster cutting time. High film strength prevents wear or scuffing of chain links and guide bars while protecting metal parts against corrosion and rust. Resists build up of deposits such as pitch, sap, or gum.

| OREGON | Description | Qty. | Size | Product Code |
|---|---|---|---|---|
| 54-026 | Guide Bar & Chain Oil | 12 | 1 quart | |
| 54-059 | Guide Bar & Chain Oil | 4 | 1 gallon | |

## Only One™ Two-Cycle Engine Oil

Only One is a two-cycle engine oil that's easy to use. Only One is a "universal mix" product, meaning no more confusing gas-to-oil mixtures. Just follow the "gallons mixed" information on each package.

- Reduces particulate emissions and oil consumption by at least 50% over standard oil
- Good for all two-cycle engines
- Works with gasohol
- Complies fully with California's Proposition 65 guidelines

| OREGON | Description | Qty. | Makes | Product Code |
|---|---|---|---|---|
| 40092 | 1.8 oz. Pillow Pack | 48 | 1 gallon | |

The 700-Series Auto Chain Grinders have benefits for both dealers and professional end users seeking an efficient, profitable solution for high-volume chain sharpening.

# 700-Series Advantage

**Labor Cost Savings**
Once the learning phase is completed, the machine requires minimal set-up and supervision, freeing up staff for more value-added tasks.

**Consistent, High-Quality Grind**
Auto chain grinders minimize human involvement, and offer a consistent, standardized, high-quality grind.

## FOR DEALERS

**Profit Center**
With the break even time as short as 58 days, grinding chains with these machines makes chain sharpening profitable.

**Increased Foot Traffic**
A better-quality grind results in satisfied customers and motivates them to revisit the shop, increasing foot traffic and customer retention.

## FOR PROFESSIONALS

**Decreased Downtime**
For professional end users, having grinders out in the field and sharpening chain in a short time at a better quality increases efficiency and decreases downtime on the actual job.

## 720-120
All-in-One

- Auto feeding
- Auto grinding
- Air tensioniing
- Auto stopping
- Simultaneous cutter and depth gauge grinding, gullet cleaning
- Digital counter
- Skip tooth grinding (standard: 3/8")
- Stand with air tensioning
- Incremental speed setting

## 710-120
Standard

- Auto feeding
- Auto grinding
- Auto stopping
- Two-speed setting

*Optional Accessories*

Stand with air tensioning

Chain weight

# ACCESSORIES

### Stand & Air Tensioner

| OREGON | Description |
|---|---|
| 700-STND | Stand & Air Tensioner<br>VS113937-189895<br>*Included with the 720-120 but is an option on the 710-120* |

### Telescoping Chain Extension

If you have extra long (.404" or 3/4") harvester chains, our telescopic extension is an ideal choice. It accommodates up to 12 ft. chain loops.

| | |
|---|---|
| 590247 | Telescopic Chain Extension<br>VS49867-83112 |

### Air Tensioner Extension

Shorter chains—smaller than 40 drive links—require this extension to properly engage the tensioning system.

| | |
|---|---|
| 591152 | Air Tensioner Extension<br>VS12537-20895 |

### Chain Weight

| | |
|---|---|
| 590246 | Chain Weight<br>VS9055-15092 |

### Grinding Wheels

Oregon® makes grinding wheels designed specifically for the 700-Series that are specially formulated to reduce friction and prevent burning. The wheels leave a sharper and cleaner finish on the cutters.

**Optional**

Stand and tensioning are sold separately for stability and chain tensioning

For use with 710-120 without a stand, this helps to tension the chain during sharpening

## Heavy-Duty Chain Breaker & Bar Nose Rivet Driver

Another heavy-weight champion of service tools from Oregon®. This multi-purpose tool breaks all chain pitches, including 3/4", and can also be used to drive out bar nose rivets, including the nose rivets on big 3/4" pitch harvester bars. Heavy-duty materials and top-quality components are used throughout, and replacement parts are available separately to keep this ultimate shop tool in service for a long time. Punches for all chain pitches are included. Anvil for 3/4" pitch chain must be purchased separately.

## Mower Ramps

**42-090** **Loading Ramps**
Folding, arched ramps ideal for loading riding mowers, lawn and garden equipment, & ATVs
Arched design prevents mower decks from hanging up on ramps
Compact – stores virtually anywhere
Galvanized steel for corrosion protection
Length: 7', width: 12"
Capacity: 1200 lb.
Assembly required

**42-091** **Loading Ramps**
Made from light-weight aluminum (half the weight of Oregon® 42-090), improved anchoring straps
Folding arch: 7-1/2"
Length: 90", width: 11-1/4", height: 6"
Weight: 33 lbs.
Distributed maximum loading capacity: 1500 lb. (750 lb. per ramp)
No assembly required

**42-095** **Deck Leveler**

**42-434-0** **Chain Holder**
For 35 through 60 chain
Works with bicycle chain
Complete with instructions
Holds chain in tensioned position to allow both hands to install links

## Shop Tools

**42-430-0** **Chain Detacher**
For 25 through 60 chain
Complete tool – hardened tip

**42-431-0** **Punch Only – (repair part for Oregon 42-430-0)**
For 25 through 60 chain
Hardened tip

**42-432-0** **Chain Detacher**
For 60 through 100 chain
Complete tool – hardened tip

**42-001** **Battery Hydrometer**
Heavy-duty shop version
Measures cell specific gravity

## Shop Tools

**42-422** **Compression Tester**
Flexible hose with side pressure release valve
14 mm and 18 mm screw-in adaptors for spark plug holes
Reads up to 300 p.s.i.
Length: 12"

**42-505-0** **Feeler Gauge**
For sizes .0015" thru .035"
Contains 25, 1/2" gauges

**42-441** **Flywheel Puller**
Replaces Briggs & Stratton 19069/19165
For 3–3 1/2 HP engines
For 6, 7, & 8 HP engines

**42-073** **Flywheel Knocker**
For Tecumseh engines
5/8" thread

**42-446-0** **Gasket Scraper**
Nickel-chrome plated
Wide blade
“Insulite” plastic handle
Length: 11"

**42-411** **Hemostat**
6" Curved
Adjustable pressure locking teeth

**42-031** **Spark Tester**
Allows visual inspection of ignition output
Use between coil wire and spark plug

**42-087** **Spark Tester**
Use with engine running or just cranking
Similar to Briggs & Stratton part number 19368

## Shop Tools

**42-423** **Wireless Tachometer**

Built-in selector switch to choose 0-5000 RPM low scale or 0-15,000 RPM high scale
RPM readout accurate to within + or - 2%
Solid state electronics
Zener voltage regulator uses 9-volt battery (not included)
Built-in battery check
For all 2-cycle & 4-cycle single cylinder engines

**42-450-0** **Roll Pin Punch Set**

| Pt. size | Pin Length | Overall Length |
|---|---|---|
| 1/8" | 2" | 4" |
| 5/32" | 2-1/2" | 4-1/2" |
| 3/16" | 2-1/2" | 4-1/2" |
| 7/32" | 3" | 5" |
| 1/4" | 3-1/2" | 5-1/2" |
| 5/16" | 4" | 6" |

**42-516** **Valve Refacer**

Clamp designed so that main strain is directed into the machine v-block
May be held in vise or screwed to bench
Black enamel finish

**88-400** **Oil Extractor**

Ideal for oil changes on boats, cars, motorcycles, and lawn power equipment
Hand operated vacuum pump mounts on 6 liter container
Extracts fluids from inaccessible or confined areas
Approximately 10 strokes needed to empty most lawn mower engine sumps
Comes with a removable pouring spout for easy disposal
Works great for trapped water

**88-405** **Oil & Fuel Extractor**

Fuel and oil removal and transfer system. Remove oil and other fluids into the 48 oz. plastic container using the provided pump and hoses
Also use for fuel transfer between equipment using universal adapter provided
Insert the adapter and pump into fuel opening of machine needing fuel and the transfer hose into the tank with fuel
Pump the handle to start transfer
Quick & simple operation

**42-961** **Oil Drain Pan**

10 quart capacity
Resistant to chemicals and solvents
Convenient pouring spouts for disposal
Low profile easily slides under lawn & garden tractors

## Tire Tools

**70-700** **Safety Seal Tubeless Tire Repair Kit**
Kit contains:
Insertion tool
Heavy-duty spreader probe
Lube
Spare needle
Two razor blades
30 repair strips
Kit comes in convenient plastic case
Detailed instructions included

**67-109-0** **Tubeless Safety Repair Kit for ATVs**
Emergency repair kit for ATV and other tires
Tires can be safely & easily repaired without removal from equipment
Complete with two (2) C02 cylinders, adaptor valve, &
hose to inflate tires with compressed air
Detailed instructions included
Packaged in convenient tube that can be attached to handle bars

**70-721** **Tubeless Safety Repair Kit**
Emergency repair kit for ATV and other tires
Tires can be safely & easily repaired without removal from equipment
Does not include C02 cylinders and adaptor
Detailed instructions included

**70-703** **Repair Refill**
60 per pack
Priced per pack

Oregon® manual tire changers are designed for time and labor savings. Any wheel can be secured onto the non-skid base plate by simply positioning and tightening the "quick adjust" center post onto the threaded rod. This unique design allows the operator to change small tires and switch wheel sizes or styles very quickly.

**67-214** **Tire Changer – Complete**
Designed especially for 4" to 12"
Lug-center or bearing-in hub wheels
(Includes Oregon 67-215, 67-216, & 67-217)

**67-215** **Replacement Threaded 12" Rod**
For Oregon 67-214 tire changer.

**67-216** **Quick Adjust Center Post**
For Oregon 67-214 tire changer.

**67-217** **"Duck Head" Mount/De-Mount Tool**
For Oregon 67-214 tire changer.

## Equipment Racks

**42-032** **Backpack Blower Rack/Holder**
BR3000 Backpack Blower Rack/Holder securely holds and locks most commercial backpack blowers using a flat pin design
- Heavy-duty black vinyl coating
- Comes with hardware, one lock
- Will internal wall mount or external trailer mount

**42-196** **Retaining Strap Long**
For padlocks

**42-043** **Hand Tool Rack**
HT2500 Hand Tool Rack
- Mounts on Oregon® 42-063 Trimmer Guard
- Holds up to 5 rakes, shovels, brooms, or other hand tools
- Durable powder-coated finish

III

**42-044** **Multi-Purpose Holder**
MP2000 Multi-Purpose Holder powder-coated holder will hold most chainsaws and hand-held blowers
Includes bungee cord
13"L x 12"W x 9-1/2"H

**42-063** **Vinyl-Coated Trimmer Racks**
Securely hold 3 trimmers and/or brushcutters
- Steel racks with heavy-duty black vinyl coating
- For mounting on open trailers
- Includes three keyed-alike padlocks

**42-204** **Padlocks**
Set of 3
Keyed-alike

**42-196** **Retaining Strap Long**
For padlocks

|---|---|---|

## Bar & Chain Oil

Specially compounded to provide extra high tackiness and prevent "throw off" even under adverse weather conditions. Provides maximum engine power, low friction, and faster cutting time. High film-strength prevents wear or scuffing of chain links and bars while protecting metal parts against corrosion and rust. Resist build-up of deposits such as pitch, sap, or gum.

**54-026** **Bar & Chain Lube**
1 quart bottle

**54-059** **Bar & Chain Lube**
1 gallon bottle

**VP2931** **VP Bar & Chain Oil – 32 oz.**
**Drop shipped only**

**VP2933** **VP Bar & Chain Oil – 1 Gallon**
**Drop shipped only**

## Hydraulic Oil

**54-063** **SP Antiwear Hydraulic Oil**
Recommended for use in hydraulic systems – especially those designed with close tolerances operating where extremes of pressure, temperature, and pump speed are encountered.
Performance Properties:

- Anti-wear protection for a wide range of hydraulic pumps & components
- Use under severe operating conditions
- Meets the ASTM salt, corrosion, water, rust, & copper strip corrosion tests
- Excellent water separation qualities
- Filterability meets Denison requirements
- Foam control
- Good low temperature properties
- To ensure proper lubrication in all cases consult the operator's manual
- 2-1/2 gallon bottle

**VP2941** **VP Hydraulic Oil – 2.5 Gallons**
Multi-purpose AW46
**Drop shipped only**

## Hand Cleaner

Permatex fast orange smooth hand cleaner in cream and lotion formulas. Fast orange is the #1 selling, biodegradable, waterless, petroleum solvent-free hand cleaner. It contains no harsh chemicals, mineral oils, or ammonia that can sting cuts and abrasions. Pure, fresh-smelling natural citrus power does the cleaning while aloe, lanolin, glycerin, and jojoba condition and protect skin. Fast orange gently deep cleans the toughest soils. Work great on laundry strains, scuff marks, tile floors, pet odors, and many other household cleaning needs.

**F25219** **Fast Orange Hand Cleaner**
- With pumice
- 1 gallon

## Grease, High Temperature

**4050T** — **High Temperature Grease**

- Stays put under extreme shock loads
- Very low friction coefficient
- Moisture resistant
- Meets NLGI GC-LB requirements
- Sold in cartons of 10 only
- Priced per each
- Previously 54-020-0
- 14 oz.

## Grease Gun

**54-021** — **Lube 'n Push Pro Grease Gun**

- Features an all-purpose nozzle
- Manufactured from high quality plastic materials
- Oil and grease resistant
- Withstands changes in temperature
- One hand operation
- 1.5 oz. capacity

## Gear Lubricant

**4120H** — **Gear Lubricant**

- Multipurpose gear oil
- 1 quart squeeze bottle
- 80-90 WT, gear lube
- Previously 4113H

**49-010** — **Gear Lubricant**

- "00" grease
- 9 oz. bottle
- 12 per case

**49-015** — **Gear Lubricant**

- "0" grease
- 4-1/2 oz. tube
- 12 tubes per case

## Heavy-Duty Penetrant-Lubricant

**4244M** — **Heavy-Duty Penetrating Lubricant**

Loosens and lubricates even the most rusted bolts.

- Displaces water
- Stops squeaks
- Protects metal surfaces against rust & corrosion
- Removes tar
- Previously 54-015-0
- 9 oz. aerosol can

**16PB** — **PB Blaster Penetrating Lubricant**

Breaks free rusted joints and frozen parts by removing surface tension.

- Powerful, concentrated penetrating catalyst
- Non-evaporating lubricant
- VOC compliant
- 11 oz. aerosol can

## WD-40 Lubricant

WD-40 Smart Straw — now you can use WD-40 to protect, clean, and lubricate thousands of items — without ever losing the straw again.

- Features a permanently attached straw that sprays two ways
- Flip it up for precision stream
- Flip it down for regular spray action

**F110054** — **WD–40 Lubricant**

Smart Straw 8 oz. aerosol can

**F110078** — **WD–40 Lubricant**

Smart Straw 11 oz. aerosol can

## Carburetor Spray Cleaner

**4521K** — **Carburetor Spray Cleaner**

Especially formulated to dissolve grease, varnish, and sludge from carburetors

- 11 oz. aerosol can
- Previously 54-012-0 & 4121K
- Heavy-duty

## Starting Fluid

**PSTFLL** — **Starting Fluid**

Premium starting fluid contains 50% ether for a fast start on the coldest days (regular starting fluid contains 25% ether)

- 11 oz. aerosol can

## Starting Fluid

**PSTFLS**

**Starting Fluid**
Premium starting fluid contains 50% ether for a fast start on the coldest days (regular starting fluid contains 25% ether)
- 7 oz. aerosol can

## Solvents

**4117D**

**Champion Solvent**
General-purpose standard solvent (sometimes referred to as mineral spirits or petroleum naptha)
- Close tolerance to specifications
- Good solvency
- Narrow range of volatility
- 5 gallon bucket

## Tire Inflator

**4086KH**

**Tire Inflator with Hose**
Quickly inflates and seals tires with small to medium punctures
- Previously 54-010-0
- 12 oz. aerosol can

## Brake Cleaner

**4126P**

**Brake Cleaner**
For disc and ABS brakes
- Removes brake fluid, dirt, & grease
- Removes harmful brake dust
- Improves braking & reduces noise
- Non-flammable
- Can be used to clean electrical components
- Does not contain silicones
- Leaves no residue
- Previously 54-017-0
- 19 oz. aerosol can
- NOT FOR SALE IN CALIFORNIA

**4525I**

**Non-Chlorinated Brake Cleaner**
Cleans brake, clutch parts, and CV joints
- Removes brake fluid, grease, & oil
- Degreases instantly
- Leaves no residue
- Previously 4125I
- 15 oz. aerosol can

## Battery Terminal Care

**42-005** **Battery Terminal Protector Spray**
Fights battery corrosion.
- Prolongs battery life
- 10 oz. can

**42-007** **Battery Cleaner Spray**
Penetrates, loosens, and neutralizes all acid corrosion deposits.
- Assures maximum current flow
- 16 oz. can

## Permatex Sealant & Threadlocker

**F80022** **Permatex Blue RTV Silicone GSK**
The original Permatex Blue
- Will not foul oxygen sensors
- Replaces almost any cut gasket
- Makes reliable "formed-in-place" gaskets that resist cracking, shrinking, & migrating
- Coats pre-cut gaskets to increase reliability
- Temperature range -65° F to 500° F (-54° C to 260° C) intermittent
- Resists auto & shop fluids
- First generation 1970-1980 gasket maker
- 3 oz.

**F82180** **Permatex Ultra Black Silicone**
Fast-curing formula
- Sensor safe, low odor, & noncorrosive
- Meets performance specs of OE silicone gaskets
- Retains high flexibility, oil resistance properties through use of patented adhesion system
- Temperature range -65º F to 500º F (-54° C to 260° C) intermittent
- Resists auto & shop fluids and vibration
- 3 oz.

**F29208** **Permatex Right Stuff® Cartridge**
Return equipment to service immediately when you make leak-proof gaskets in just one minute with the Right Stuff
- Latest elastomeric rubber gasket technology is blowout resistant
- Outperforms pre-cut gaskets
- Temperature range -75° F to 450° F (-59° C to 232° C) continuous, 500° F (260° C) intermittent
- Resists ATF, coolant, oil, & other shop fluids
- Protects against leaks caused by vibration & thermal expansion
- Sensor-safe
- 5 oz.

**F81158** **Permatex Black RTV Silicone**
General-purpose, black RTV indoor / outdoor sealant
- Seals, bonds, repairs, mends, & secures glass, metal, plastics, fabric, vinyl, weather stripping, & vinyl tops
- Protects & repairs electrical wiring
- May be applied to horizontal or vertical surfaces
- Waterproof & flexible
- Temperature range -75° F to 450° F (-59° C to 232° C)
- Resists oil, water, weather, vibration, & grease
- 3 oz.

III

| OREGON | Description | Product Code |
|---|---|---|

## Permatex Sealant & Threadlocker

**F80050** **Permatex Clear RTV Silicone**

General-purpose, clear RTV indoor / outdoor sealant

- Seals, bonds, repairs, mends & secures glass, metal, plastics, fabric, vinyl, weather stripping, & vinyl tops
- Protects & repairs electrical wiring
- May be applied to horizontal or vertical surfaces
- Waterproof & flexible
- Temperature range -75° F to 400° F (-59° C to 204° C)
- Resists oil, water, weather, vibration, & grease
- 3 oz.

**F81160** **Permatex Hi-Temp Red RTV Silicone**

Formulated for hi-temp applications, or heavy-duty use (such as towing, etc.)

- OEM specified
- Replaces almost any cut gasket by making reliable “formed-in-place” gaskets that resist cracking, shrinking, and migrating caused by thermal cycling
- Coats pre-cut gaskets to increase reliability
- Temperature range -65º F to 650º F (-54° C to 343° C) intermittent
- Resists auto and shop fluids
- First generation 1970-1980 gasket maker
- 3 oz.

**24010E** **Permatex Threadlocker Gel Blue**

The patent-pending GEL TWIST pin-point applicator puts the Threadlocker where you want it: on the part

- Gel formula provides “liquid-reliability” without drips, globs, mess or waste
- All-purpose, medium strength threadlocker
- Ideal for all nut & bolt applications 1/4 inch to 1 inch (6 mm to 25 mm)
- Eliminates need for stocking expensive lock nuts & lock washers
- Locks & seals while preventing parts from loosening due to vibration
- Protects threads from corrosion
- Removable with hand tools for easy disassembly
- .35 oz. / 10 g

**F27100** **Permatex Threadlocker Red – 271**

High-strength threadlocker for heavy-duty applications 3/8 inch to 1 inch (10 mm to 25 mm)

- OEM specified
- Especially well-suited for permanently locking studs and press fits
- Adds 3,000 PSI holding power on slip and press fit assemblies
- Replaces set screws and snap rings
- Locks against vibration loosening
- May require heat or special tools for removal
- .20 oz. / 6 ml

**F24200** **Permatex Threadlocker Blue – 242**

All-purpose, medium strength threadlocker. Ideal for all nut and bolt applications 1/4" to 3/4" (6 mm to 20 mm)

- OEM specified
- Eliminates need for stocking expensive lock nuts & lock washers
- Locks and seals while preventing parts loosening due to vibration
- Protects threads from corrosion
- Removable with hand tools for easy disassembly
- .20 oz. / 6 ml

OREGON | Description | Product Code

## Gorilla Glue

Gorilla Glue bonds materials other adhesives simply can't—metal, stone, wood, ceramics, foam, glass and much more

- Versatile – ideal for most household fixes & building repairs
- 100% waterproof – does not break down when exposed to outdoor elements
- Easily passes ANSI/HPVA HP-1-2000 Types 1 & 2
- Temperature resistant – once it's dry Gorilla Glue is unaffected by extreme heat or cold
- Sandable, paintable, stainable – invisible glue line makes finishing easy
-

**F50002** **Gorilla Glue**
- 2 oz. bottle

**F50004** **Gorilla Glue**
- 4 oz. bottle

## J-B Weld

**F8265** **J-B WELD**

The world's finest cold-weld compound. It's a remarkably easy, convenient, and inexpensive alternative to welding, soldering, and brazing. One contains liquid steel / epoxy resin, and the other contains hardener. When mixed together in equal portions, a chemical reaction occurs that turns the mixture into a compound as hard and tough as steel — and with similar properties

- Bonds any combination of iron, steel, copper, aluminum, brass, bronze, pewter, porcelain, ceramic, marble, glass, PVC, ABS, concrete, fiberglass, wood, fabric, paper — just about any porous & non-porous material
- It stays pliable for about 30 minutes after mixing, sets in 4 - 6 hours, and cures fully in 15 - 24 hours
- Tensile strength: 3960 PSI
- Withstands temperatures up to 500°
- J-B Weld is packaged in two tubes

**F8276** **J-B KWIK**

The same as the original J-B Weld except it stays pliable for about 2 minutes after mixing, sets in just 4 minutes, and cures fully in 4 hours. Because J-B KWIK cures so fast, it's not as strong or as heat-resistant as the original J-B WELD

- Tensile strength: 2100 PSi
- Withstands temperatures up to 300°
- J-B KWIK is packaged in two tubes

## Snow & Ice Melter

This blend of sodium chloride and magnesium chloride is an efficient and affordable ice melt product. Aspen contains patented inhibitors designed to reduce impact to metal and spreading equipment. Melts ice to -7°F/-21°C

**F51020** **Aspen Snow and Ice Melter**
- 20 pound poly bag

**F51050** **Aspen Snow and Ice Melter**
- 50 pound poly bag

## Pressure Washer Pump Saver

**AR64511** **Pump Saver**
- Non-aerosol version
- 16 oz. bottle

## Slime Tire Sealant

Slime Tire Sealant is formulated and tested for use in all pneumatic tires. Once installed, Slime remains liquid and will not harden or dry out. As the Slime treated tire rotates, centrifugal force pushes the sealant to the tread area creating a layer of protection, repairing punctures as they occur, or treating existing punctures. Slime is not intended for use in tires losing pressure from sidewall punctures, bead leaks, damaged rims, or faulty valves. Slime is recommended as a repair only in high-speed, over-the-road tires.

- Remains liquid inside the tire, coating the tread area as the tire rotates
- Non-toxic, non-hazardous, non-flammable, non-aerosol, and water soluble
- Contains rust and corrosion inhibitors to maintain the integrity of the rim
- TPMS friendly (Note: May not install easily into tires with direct or valve mounted devices)
- Tires treated with Slime can be cleaned out with water allowing for the installation of a proper plug/patch
- Slime for tubeless tires can also be installed into tubeless bike tires
- Installs between the rim and the tire bead

Hold the bead open with two tire levers, install, and re-inflate with a fast burst of air to seat the bead to the rim. Repairs punctures up to (6 mm) using Fibro-Seal technology. What is Fibro-Seal technology? Slime utilizes a state-of-the-art blend of environmentally friendly fibers, binders, polymers and proprietary congealing agents which intertwine and clot within the puncture. This Fibro-Seal lattice, together with the viscous transportation system (the "green goo"), seeks out and tightly packs itself into the puncture, preventing and repairing flats with a flexible long-lasting plug.

**SB1G** **Slime Tire Sealant**
- 1 gallon jug with pump

**SL07** **Slime Tire Sealant**
- 8 oz. bottle

**SL09** **Slime Tire Sealant**
- 32 oz. bottle

**SL11** **Slime Tire Sealant**
- 16 oz. bottle

OREGON Description Product Code

## Starlite – Safety Eyewear

Unitary scratch-resistant lens has two distinct viewing areas, each with 9.75 base curvature, delivering a wider range of vision. Deep universal-fit temples provide side protection equal to that of eyewear with large sideshields.

**42-139** **Starlite**
Blue mirror lens with gray frame
Oregon® logo on leg
Meets ANSI Z87.1+ safety standard
99.9% UVA & UVB protection

**42-138** **Starlite**
Gray lens with gray frame
Oregon logo on leg
Meets ANSI Z87.1+ safety standard
99.9% UVA & UVB protection

**42-137** **Starlite**
Clear lens with clear frame
Oregon logo on leg
Meets ANSI Z87.1+ safety standard
99.9% UVA & UVB protection

## Eyewear Protection

Impact and scratch resistant lens with integrated sideshields wraps around for wide field of vision. Adjustable and racheting temples for custom fit. Molded in browguard for protection above eyes. Meets ANSI Z87.1+ standards and 99.9% UVA/UVB protection.

**42-163** **Coverall Eyewear**
Covers prescription eyewear

**42-135** **Clear Goggles**
Allows full vision in all directions
Fits over regular eye glasses
Meets ANSI Z87.1+ safety standard

## Scorpion-Mag™ Safety Eyewear

Built in bifocal, contemporary styling, adjustable and racheting legs, soft grip nose piece, black frame with clear lens, and free "Scorpion's Tail" retainer included. Meets ANSI Z87.1+ standards and 99.9% UVA/UVB protection.

**42-152** **Scorpion-Mag – Clear Safety Eyewear**
2.0 Diopter magnification

OREGON Description Product Code

## Venom Head Gear with Visor

Fang-shaped Venom Visor is contoured to provide complete protection from head to chin. Tension adjustment ensures that raised visor stays in place.

**42-160** **Venom Head Gear & Visor**
Three-part adjustment system
Meets ANSI Z87.1+ standards

## Truair Disposable Respirator Masks

N95 NIOSH-approved; has exhalation vent to reduce hot air build up. Two non-latex elastic head straps plus adjustable nosepiece give secure fit 95% filtration against aerosols free of oils below PEL.

**42-161** **Vented Respirator Mask**
10-Pack

N95 NIOSH-approved; non-latex elastic head straps plus adjustable nosepiece give secure fit. 95% filtration against aerosols free of oils below PEL.

**42-162** **Respirator Mask**
20-Pack

# Cautions & Warnings

## Attention Dealers

Oregon® urges you to read and follow all of these safety guidelines when selecting, installing, servicing or operating any outdoor power equipment. Encourage your customers to do the same.

## Air Filters

**CAUTION:**

- Shut off engine before servicing or making any adjustments.
- Disconnect battery at negative terminal. (for electric start engines only)
- Remove and ground spark plug wire
- Refer to owner's manual and follow safety warnings

## Belts

**WARNING:**

- Never operate equipment without original guards securely in place

**CAUTION:**

- Shut off engine before servicing or making any adjustments
- Disconnect battery at negative terminal. (for electric start engines only)
- Remove and ground spark plug wire
- Refer to owner's manual and follow safety warnings

## Blades

**WARNING:**

Before servicing or removing blades

- Remove and ground spark plug wire
- Disconnect battery at negative terminal. (for electric start engines only)
- Refer to owner's manual and follow safety warnings
- Do not substitute any other bolt for the blade retaining bolt. Blades and blade retaining bolts are specially made for this application
- Proper torque must be used when tightening the blade retaining bolt; refer to owner's manual. If this safety precaution is not followed, the blade could come off during operation

While mowing

- Immediately inspect blade if abnormal vibration occurs

**WARNING:**

- Properly support and secure mower when replacing blade.
- To avoid possible injury, always wear proper eye and hand protection when servicing mower blade.
- Unbalanced or warped blades can cause damage to the mower and/or personal injury.
- Inspect the blade(s) and replace damaged blades before operating the mower

## Brush & Grass Blades

**WARNING:**

- Check that cutting attachment shields are properly located and in good condition. Never remove, modify, or in any way compromise the cutting attachment shield.
- Read and follow all instructions supplied by the manufacturer of the trimmer/brushcutter.
- Rigid blades must be used only on brush cutters designed to accommodate blades. Never use a metal cutting attachment on a brushcutter without a shoulder harness, properly mounted barrier handlebar and cutting attachment shield in good condition.
- Never remove the cutting attachment shield.
- Be certain that replacement cutting attachments are fitted properly with regard to the direction of rotation, the size of the mounting bolt and the size of the arbor.
- Do not install Oregon metal blades on any brushcutter capable of spinning the blade faster than 10000 RPM.
- Check the condition of cutting attachments frequently. Always replace cutting attachments that are cracked, bent, or warped – even if such damage appears to be superficial. Never attempt to repair damaged cutting attachments by welding or bending.
- Always wear eye, face, leg and foot protection during operation.
- Keep bystanders and pets at least 50 feet away in all directions. Always clear the work area of rocks, glass, wire, nails or other foreign objects that can be picked up and thrown by the rotating cutting attachment.
- Sharpen or maintain the cutting attachment according to instructions packaged with the attachment.
- Use cutting attachments to cut only the types of material for which the attachment is designed.
- Disconnect power to electrically powered trimmer/brushcutters before performing any service.
- **Do Not install metal blades on curved shaft trimmers**.

## Attention Dealers

Oregon® urges you to read and follow all of these safety guidelines when selecting, installing, servicing or operating any outdoor power equipment. Encourage your customers to do the same.

### Flywheel Key

**WARNING:**

- Do not strike the flywheel with a hammer or hard object because the flywheel may shatter during later operation.

**CAUTION:**

- Remove and ground spark plug wire
- Disconnect battery at negative terminal. (for electric start engines only)
- Refer to owner's manual and follow safety warnings

### Fuel Caps

**WARNING:**

- Never operate equipment without fuel cap in place
- Allow engine to cool before removing fuel cap

### Other Fuel Related Components

**WARNING:**

Gasoline and its vapors are extremely flammable. Fire or explosion can cause severe burns or death.

- Never smoke when working on fuel system components
- Keep gasoline away from sparks, open flame, pilot lights, and other ignition sources
- Shut off fuel before removing the fuel filter

### Spark Plug Removal

**CAUTION:**

- Remove and ground spark plug wire
- Disconnect battery at negative terminal. (for electric start engines only)
- Refer to owner's manual and follow safety warnings
- Allow engine to cool before removing spark plug

### Throttle Cable

**CAUTION:**

- Wear eye protection and gloves when opening package and handling throttle cable
- Disconnect battery at negative terminal. (for electric start engines only)
- Refer to owner's manual and follow safety warnings.

### Trimmer Line & Trimmer Head

**WARNING:**

Wear eye and hearing protection:

- Thrown objects and loud noise can cause severe eye injury and hearing loss.
- Wear eye protection meeting ANSI Z87.1 standards and ear protection when operating this unit.
- Use a full face shield when needed.

Keep bystanders away:

- Keep all bystanders, especially children and pets, at least 50 feet (15m) from the operating area.

Thrown objects and rotating cutter can cause severe injury:

- Do not operate without the cutting attachment shield in place. Keep away from the rotating cutting attachment.
- Do not install Oregon®trimmer heads on any trimmer capable of spinning the attachment faster than 10000 RPM.
- Refer to owner's manual and follow safety warnings
- Refer to trimmer line installation instructions provided with aftermarket trimmer heads.

(See Trimmer Lines & Heads section for additional Cautions and warnings specific to Trimmers & Brushcutters)

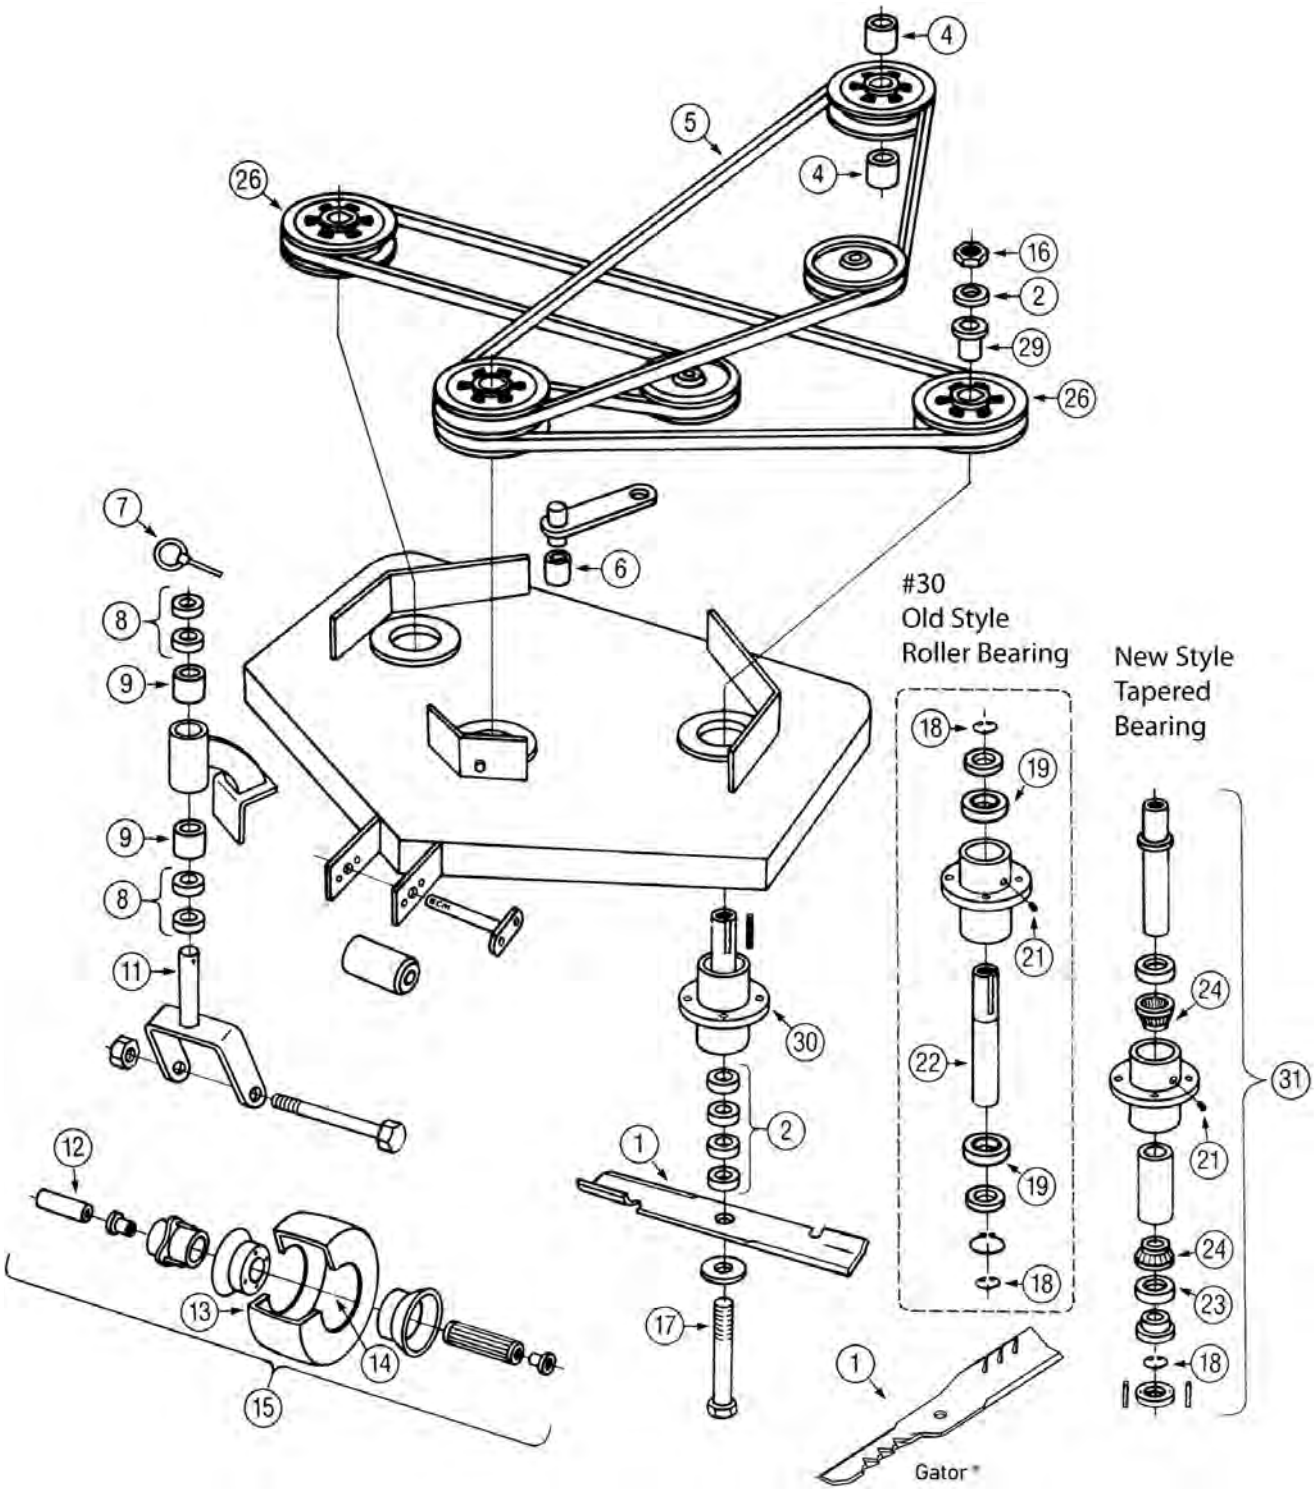
## Scag 61" & 72" Hydraulic Drive 3-Wheel Rider



## Scag 61" & 72" Hydraulic Drive 3-Wheel Rider

| № | Part No. | OEM No. | Description |
|---|---|---|---|
| **Blades for 61" Decks with 5/8" Round Center Hole** | | | |
| 1 | 91-638 | 482879 | Standard-Notch Lift, 21" |
| | 91-626 | 481708 | High-Notch Lift, 21" |
| | 91-628 | 481712 | Extreme High-Notch Lift, 21" |
| | 96-347 | | Gator® G3™, 21" |
| | 596-347 | | Gator G5™, 21" |
| | 396-727 | | Gator G6®, 21" |
| **Blades for 72" Decks with 5/8" Round Center Hole** | | | |
| 1 | 91-627 | 481709 | Standard-Notch Lift, 24-1/2" |
| | 92-035 | 482882 | High-Notch Lift, 24-1/2" |
| | 96-341 | | Gator G3, 24-1/2" |
| | 596-341 | | Gator G5, 24-1/2" |
| | 396-764 | | Gator G6, 24-1/2" |
| **Replacement Parts** | | | |
| 2 | 09-802 | 43038 | Blade Spacer, 1/4" |
| 4 | 45-257 | 48102 | Bearing |
| 5 | 75-594 | 48359 | Engine-to-Deck Belt, for 72", 5/8" x 94" |
| | 75-036 | 48083 | Engine-to-Deck Belt, for 61", 5/8" x 88-7/8" |
| 6 | | 48100-05 | Bronze Bearing |
| 7 | 02-446 | 04066-01 | Linchpin, 7/16" |
| 8 | 09-804 | 43037-01 | Spacer, Thickness: 1/2" |
| 9 | 45-127 | 48100-01 | Bronze Bearing |
| 11 | 48-202 | 45006 | Caster Yoke |
| 12 | 45-188 | 43022 | Spanner Bushing |
| 13 | 72-795 | 48307-01 | Tire, 410/350-4 |
| 14 | 71-274 | 48006-03 | Tire Tube |
| 15 | 72-795 | 46079 | Complete Wheel Assembly |
| 16 | | 04020-09 | Hex Nut |
| 17 | 04-125 | 04001-41 | Hex Bolt |
| 18 | | 04050-04 | Retaining Ring, Small |
| 19 | 45-220 | 48101-02 | Spindle Bearing, Heavy-Duty |
| 21 | 02-010-1 | 48114-02 | Grease Fitting |
| 22 | 82-305 | 43001-02 | Spindle Shaft |
| 24 | 45-002 | 48668 | Tapered Bearing |
| 26 | 78-642 | 48127 | Spindle Pulley |
| 30 | | 46020 | Spindle Assembly |
| 31 | 82-325 | | Spindle Assembly, Cast Iron |

# Air Filters

## Shop Packs

Oregon® premium quality air filters are more profitable than ever when you stock the "Shop Packs."

- Save 10% or more compared to packaged filters
- Buy in larger quantity and save
- 5 air filters in each Shop Pack
- Oregon packaging

## Blister Packs

Put the Oregon name and quality on display.

- Puts the filter out where the end user can see it
- Helps self sell
- Frees up counter and shelf space

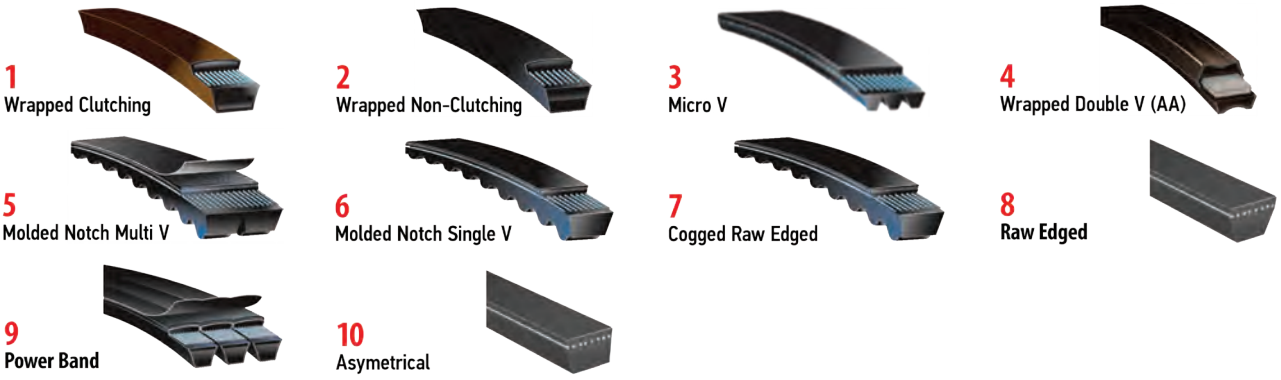
# Belts by Size



For all Oregon® belts, the outside circumference (OC) is the length listed. A belt measurer, like the Oregon 75-910, can be used to determine this dimension. For belts with an OC longer than 100" or those with non-standard backs (like the Oregon 75-068), use a tape measure wrapped around the outside of the belt to determine the length.

| OREGON | Length | Width | Type |
|---|---|---|---|

## Belt Measurer

**75-910**

- Measures belts from 14–100" in length
- Heavy-duty aluminum

## Belt Rack

**75-902**

- 36" wood rack with (6) 5-1/2" hooks
- Adjustable rack has 16 placements for hooks

# Belts

## Tech Tip — Measure an Aramid Cord Belt

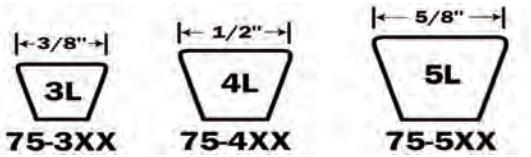
**Aramid Fiber Cord** is the family name of nylons that include Kevlar®. Oregon® Aramid Fiber Cord belts are the best quality, longest-lasting belts available in the market place.

Oregon Aramid cord belts are measured by the outside circumference and can easily replace an A or B belt. Simply add 2 inches to the length for "A" belts and 3 inches to the length for "B" belts.

**Examples**
75-340 = 3/8" x 40" belt
75-468 = 1/2" x 68" belt
75-598 = 5/8" x 98" belt

**Examples**
A48 = 75-450
B40 = 75-543

**Measuring Top Width of Aramid Belts**

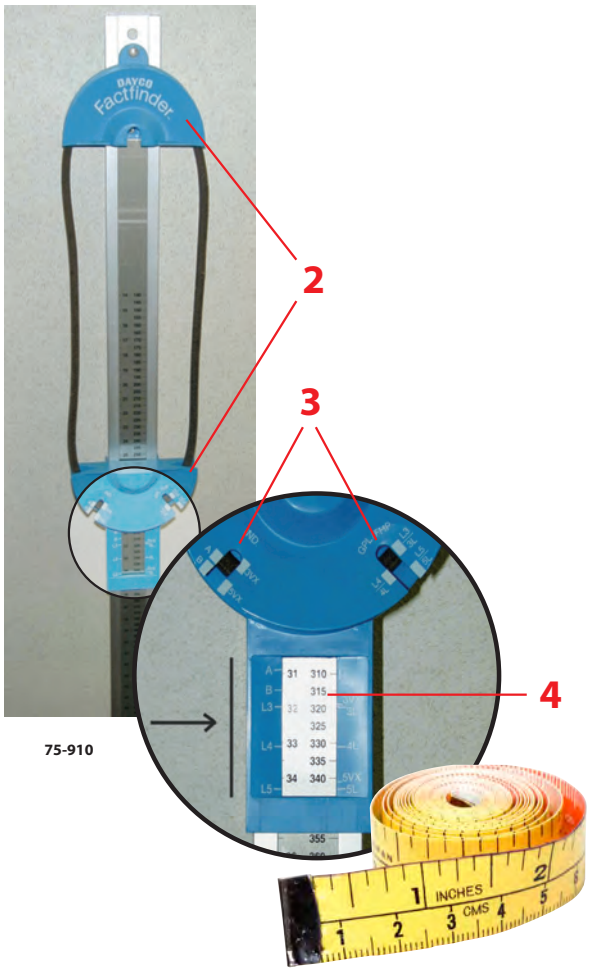


**Aramid Belt Part Numbers**
Part numbers for the Premium Aramid Fiber Cord belts are coded to save look-up time, are five digits and are determined as followed:

A B C
**75-340**

A. First two digits are always 75-
B. Third digit is the width of the belt
   3 = 3/8"
   4 = 1/2"
   5 = 5/8"
C. Forth and fifth digit show the length

## Tech Tip — Measuring a Belt



75-910

**Oregon Belt Measurer 75-910**

1. Define type of belt :
   - 3L = 3/8" or 9.5 mm
   - 4L = 1/2" or 12.7 mm
   - 5L = 5/8" or 15.9 mm
2. Fit the belt over the blue plastic split pulley and pull the bottom half down tight.
3. If you are measuring an industrial belt (bulgy top), look at the left-hand slot in the half pulley.

   The size (section) of the belt is indicated by the intersection of the belt top with one of the white blocks, either A or B.

   If you have an FHP belt (flat top), the same procedure applies to the right-hand slot. The belt in the photo is a 4L belt (the section).
4. Now that you know the belt's profile (section), look at the window below the split pulley and find the section number for your belt (3L, 4L, 5L, A or B) printed in white on the left side of the window. The number opposite or closest is the length in inches of the belt you are measuring.

**Cloth Tape Measure**

1. Place the beginning of the cloth measuring tape anywhere on the outside of the belt
2. Wrap the tape around the complete circumference of the belt until it wraps back around to its beginning
3. Where the two meet, read the length given

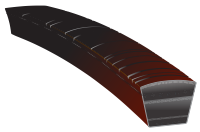
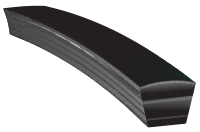
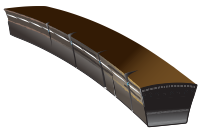
# Belts – Troubleshooting



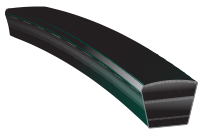
Cracking **A**



Wear on Sidewalls **B**

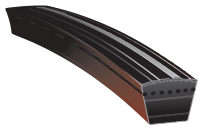


Edge Cord Failure **C**

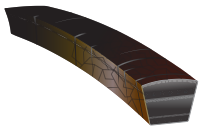


Wear on Top Corner **D**

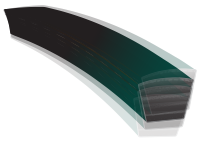
Surface Flaking Sticky or Swollen **E**



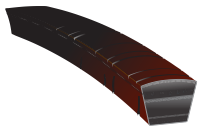
Wear on Top Surface **F**



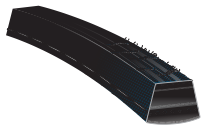
Surface Hard or Stiff **G**



Vibration **H**

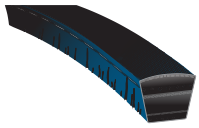


High Belt Temperature **I**

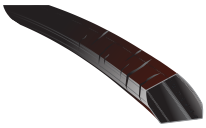


Wear on Bottom Surface **J**

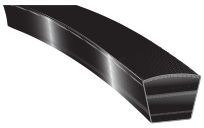
| | Probable Cause | Corrective Action |
|---|---|---|
| **A** | **Cracking** | |
| | Sheaves too small for belt section | Use larger diameter sheaves |
| | Belt slip | Retension to manufacturer's recommendations |
| | Backside idler diameter too small | Increase backside idler to acceptable diameter |
| | Improper belt storage | Don't coil belt too tightly, kink, or bend. Avoid heat & direct sunlight |
| | Excessive hot or cold temperature | Control drive environment |
| **B** | **Wear on Sidewalls** | |
| | Belt slip | Retension to manufacturer's recommendations |
| | Sheave misalignment | Realign drive |
| | Worn sheaves | Replace sheaves |
| | Incorrect belt | Replace with correct belt size |
| **C** | **Edge Core Failure** | |
| | Sheave misalignment | Check alignment & correct |
| | Damaged tensile member | Follow correct installation procedure |
| | Worn or incorrect sheaves | Replace sheaves for correct belt/sheave match |
| **D** | **Wear on Top Corner** | |
| | Belt-to-sheave fit incorrect | Use correct belt/sheave match |
| | Belt rubbing against guard or drive structure | Remove obstruction |
| **E** | **Surface Flaking Sticky or Swollen** | |
| | Oil or chemical contamination | Do not use belt dressing; eliminate sources of oil, grease, or chemical contamination |
| **F** | **Wear on Top Surface** | |
| | Belt rubbing against guard | Repair or replace guard |
| | Damaged idler | Repair or replace idler |
| **G** | **Surface Hard or Stiff** | |
| | Hot drive environment | Improve ventilation to drive |
| | Belt slip | Retension to manufacturer's recommendations |
| **H** | **Unusual Vibration** | |
| | Incorrect belt | Use correct belt/sheave match |
| | Poor equipment structural design | Check structure for adequate strength & rigidity |
| | Excessive sheave eccentricity | Replace defective sheave |
| | Loose drive components | Check machine components, guards, motor mounts, motor pads, bushings, brackets & framework for adequate strength, stability & installation |
| **I** | **High Belt Temperature** | |
| | Hot drive environment | Improve ventilation to drive |
| | Slipping | Retension until slipping stops |
| **J** | **Wear on Bottom Surface** | |
| | Belt bottoming against sheave groove bottom | Use correct belt/sheave match |
| | Worn sheaves | Replace sheaves |
| | Debris in sheaves | Clean sheaves |



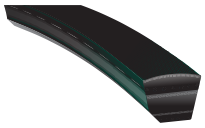
Undercord Cracking **K**



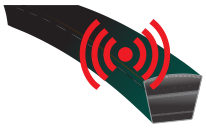
Turns Over or Comes of Drive **L**



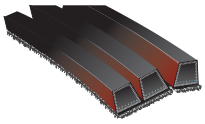
Undercord Sidewall Burn or Hardening **M**



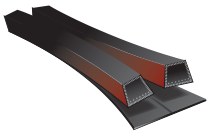
Wear on Bottom Corner **N**



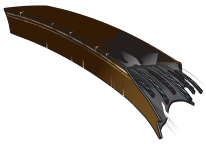
Unusual Noise **O**



Top of Tie Band Damaged **P**



Tie Band Separation **Q**



Broken Belt **R**

| | Probable Cause | Corrective Action |
|---|---|---|
| **K** | **Undercord Cracking** | |
| | Sheaves too small for belt section | Use larger diameter sheaves |
| | Belt slip | Retension to manufacturer's recommendations |
| | Backside idler diameter too small | Increase backside idler to acceptable diameter |
| | Excessive hot or cold temperature | Control drive environment |
| | Improper belt storage | Don't coil belt too tightly, kink, or bend. Avoid heat & direct sunlight |
| **L** | **Turns Over or Comes Off Drive** | |
| | Shock loading or vibration | Check drive design |
| | Foreign material in grooves | Shield grooves & drive |
| | Sheave misalignment | Realign drive |
| | Worn sheave grooves | Replace sheaves |
| | Subminimal diameter sheave | Replace sheave with correct diameter |
| **M** | **Sidewall Burn or Hardening** | |
| | Belt slip | Retension to manufacturer's recommendations |
| | Worn sheaves | Replace sheaves |
| | Under-designed drive | Redesign to manufacturer's recommendations |
| | Shaft movement | Check for center distance changes |
| **N** | **Wear on Bottom Corner** | |
| | Belt-to-sheave fit incorrect | Use correct belt/sheave match |
| | Worn sheaves | Replace sheaves |
| **O** | **Unusual Noise** | |
| | Incorrect belt for sheaves | Use correct belt size & type |
| | Incorrect tension | Check belt tension & adjust |
| | Worn sheaves | Replace sheaves |
| | Debris in sheaves | Clean sheaves; improve shielding; remove rust, paint; or remove dirt from grooves |
| | Sheave misalignment | Realign drive |
| **P** | **Top of Tie Band Damage** | |
| | Interference with guard | Check & adjust guard |
| | Backside idler malfunction | Replace or repair backside idler |
| | Debris in sheaves | Clean sheaves |
| **Q** | **Tie Band Separation** | |
| | Improper groove spacing | Use sheaves manufactured to industry specifications |
| | Worn or incorrect sheaves | Replace sheaves |
| | Sheave misalignment | Realign drive |
| **R** | **Broken Belt** | |
| | Under-designed drive | Redesign to manufacturers recommendations |
| | Belt rolled or pried onto sheave | Use drive center distance adjustment when installing |
| | Object falling into drive | Provide adequate guard or drive protection |
| | Severe shock load | Redesign to accommodate shock load |

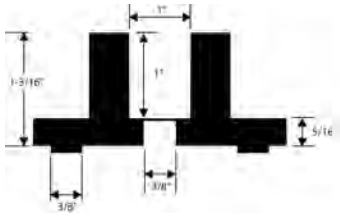
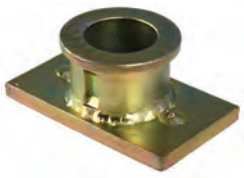
## AYP

**65-002*** 193707, 184590, 532193707 (Husqvarna), 532184590 (Husqvarna)

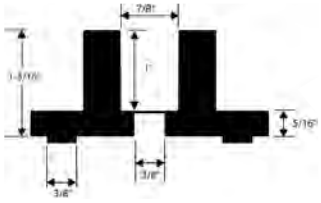
**Blade Adapter**
For walk-behind mowers built after 2005
Diameter: 1"

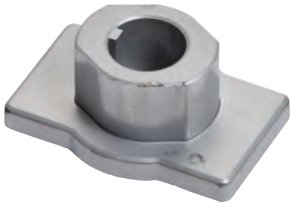




**65-006*** 850977

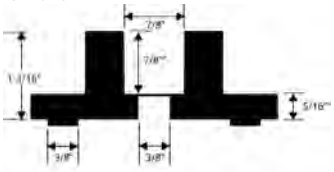
**Blade Adapter**
For all newer style walk-behind mowers
Depth: 1", diameter: 7/8"
POWDERED METAL

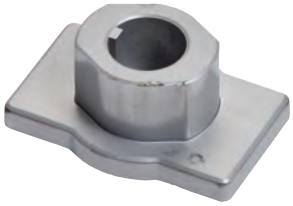




**65-007*** 851514

**Blade Adapter**
For all new-style mulching mowers
Depth: 7/8", diameter: 7/8"
POWDERED METAL





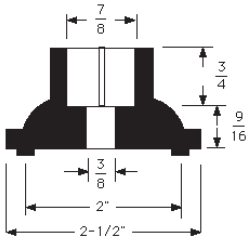
**65-008** AYP 420097, 532420097 (Husqvarna)

**Blade Adaptor**
Fits 21" models PR160N (2009–2010), PR625N, & XT625N, Husqvarna model 6021P

## Bobcat

**80-122**** 71002B, 146281 (Lawn Boy)

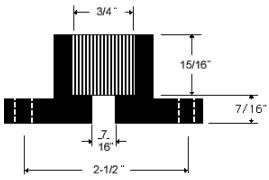
**Blade Adapter**
DIECAST

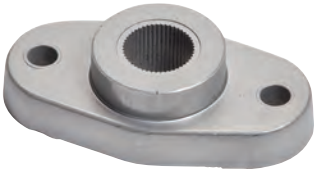


## MTD

**65-220*** 753-0210, 748-0235, 748-0283

**Blade Adapter**
Splined for new style rider
Fits 30" model 796
Side holes: 5/16"
POWDERED METAL





*adaptor only **kit with hardware

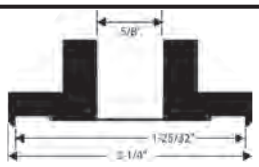
## Murray

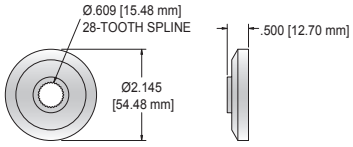
**65-206*** 54211, 20617

**Blade Adapter**
For all riding mowers with double "D" center hole
Keyway: 5/32"
POWDERED METAL



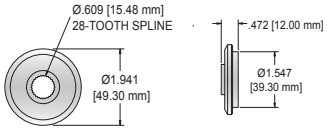
**65-208*** 91926, 92466

**Blade Adapter – Splined**
For blades with round center-hole on riding mower & lawn tractor (1990 to present)
Use with Oregon® 82-243, 82-023, & 82-250 spindles
Diameter: 2-5/32"
Splined shaft: 5/8"
POWDERED METAL



**65-204*** 690411

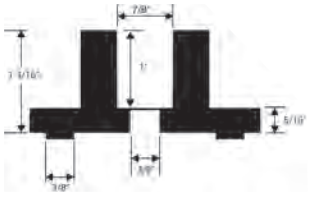
**Blade Adapter**
For 42", 46", & 52" rail deck frames
Use with Oregon 82-245 spindle
Diameter: 2-5/32"
Splined ID: 5/8"
POWDERED METAL

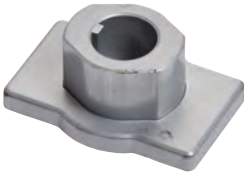


## Sears

**65-006** AYP 850977

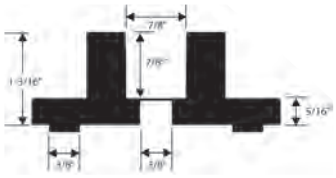
**Blade Adapter**
For all newer style walk-behind mowers
Depth: 1"
Diameter: 7/8"
POWDERED METAL

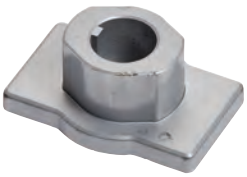




**65-007** AYP 851514

**Blade Adapter**
For all new-style mulching mowers
Depth: 7/8"
Diameter: 7/8"
POWDERED METAL

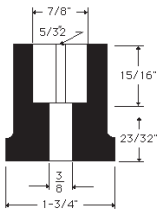




## Snapper

**65-229*** 1-2927, 7012927

**Blade Adapter**
Use with Oregon 99-103, 99-107, & 99-920 blades
For steel deck walk-behind mowers
Keyway: 5/32"
POWDERED METAL



65-229

## Walker

**65-230*** 5706

**Blade Adapter**
Use wth Oregon 91-910, 91-911, 91-912 91-913, & 91-914 blades

# Gator® Lawn Mower Blades

The Oregon® Gator series of lawnmower blades deliver a full range of enhancements designed to boost performance and durability. The exclusive Gator Mulcher® feature on every Gator blade provides outstanding bagging and discharge efficiency, saving you time and hassle.

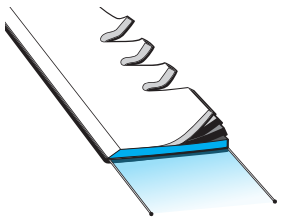
**G3™** Engineered with the core Gator mulching features that make them a great choice for normal and abrasive conditions.

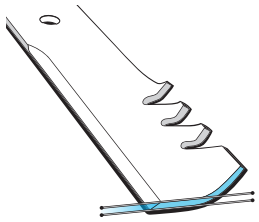
*— G3 blades may include additional features and/or other dimensions than listed below.*

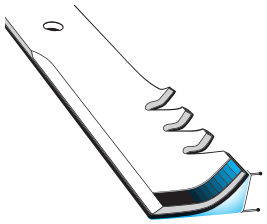
**G5™** An optimum combination for a wide range of mower units. Features a high-lift contour as well as two additional, premium features to improve performance and retain blade sharpness.

**G6®** Heavy-duty blades designed for commercial applications and to withstand punishing conditions, while offering the full-range of features that make Gator series blades unique.

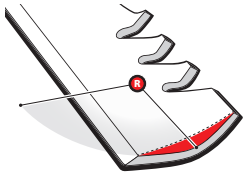
## SPECIFICATIONS







| | Width | Thickness | Air Lift* |
|---|---|---|---|
| **G6** | 3.00"<br>76.2 mm | 0.250"<br>6.35 mm | 1.00"<br>25.4 mm |
| **G5** | 3.00"<br>76.2 mm | ≤ 0.203"<br>≤ 5.156 mm | 1.00"<br>25.4 mm |
| **G3** | ≤ 2.50"<br>≤ 63.5 mm | ≤ 0.203"<br>≤ 5.156 mm | 0.75"<br>19.05 mm |



**Radius-cut end**

All Gator blades feature progressive geometry to maintain maximum cutting length throughout the life of the blade.

* tops of Gator teeth extend 1/4" more than the air lift height listed

Oregon® mower blades are created using manufacturing processes that combine the latest technology with a comprehensive range of quality control standards. These processes and standards are designed to provide Oregon blades with the consistency and longevity that professionals demand and homeowners prefer.

**QUALITY CONTROL**

- Oregon blades not only meet specifications, Oregon blades often are the specification
- Oregon consistently delivers quality mower blades through established manufacturing standards for 26 characteristics – look for the Certified Quality label on Oregon blades.

**COMPUTER CONTROLLED STRAIGHTENING**

- Superior straightness and consistency
- Cleaner cut, especially on multi-blade decks
- Reduced vibration

**SELECTION**

- Find a full range of replacement blades for most residential and commercial mowers at oregonproducts.com or in the Oregon catalog.

## FEATURES

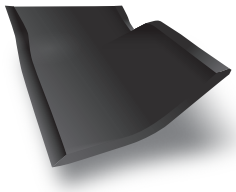
| Superior Side Discharge & Bagging | Superior Mulching | Increased Cutting | Preserves Cutting Edge | Superior Longevity |
|---|---|---|---|---|
|  | |  |  |  |
| High-lift | Gator Mulcher® | X-Tended Cutting Length™ | Fusion® | Thicker & Wider |
| ★ | ★ | ★ | ★ | ★ |
| ★ | ★ | ★ | ★ | ☆ |
| ★ | ★ | ☆ | ☆ | ☆ |
| The aggressive blade angle increases air flow to push debris up-and-out for superior bagging or side discharge. | Cleaner, more efficient cutting performance can eliminate the need to bag, saving time and hassle. | Up to twice the cutting length optimizes the cutting efficiency with each revolution. | Tungsten carbide is "fused" into the blade – creating an ultra-hard layer at the cutting edge and increasing the time between sharpening. | Greater width and thickness extends blade life and allows for longer lifting arch to improve bagging and mulching. |

B

# Lawn Mower Blades

## 100-Series Blades

**Ultra X-Tended Cutting Edge™**
- Double Bevel Technology
- Reduces overall blade noise by up to 1.5 decibels
- Maximum mulching length



**Made From US Boron Steel**
- Perfect balance between durability & ductility
- Rockwell 43–48 HRc

**Superior Flatness and Straightness**
- Clean cut for manicured look

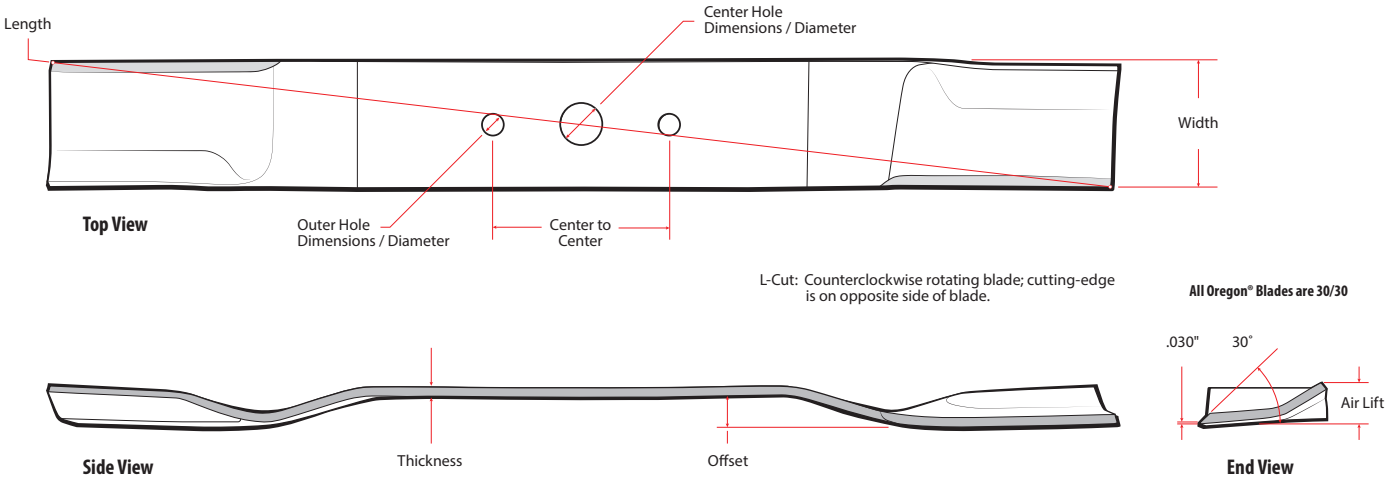
**Optimum Packaging**
- Labeling includes OEM & aftermarket cross references

## Sand Blades

**Heavy Duty for Abrasive Conditions**
- 2 to 3 times the life of a standard Oregon® blade when used in sandy and abrasive soil conditions
- Currently available for select 16-1/4", 18", & 21" Scag applications only

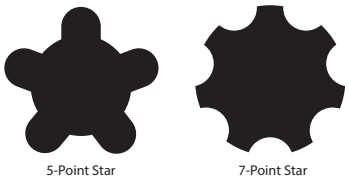
B

## Common Blade Measurements

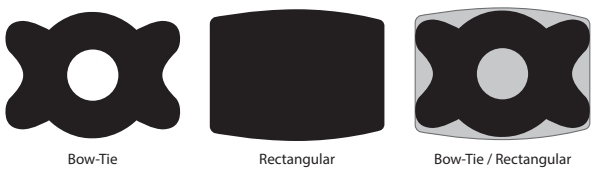


## Blade Arbor Hole Types

**5 or 7-Point Star**
Center holes may be 5 or 7-point star shaped.

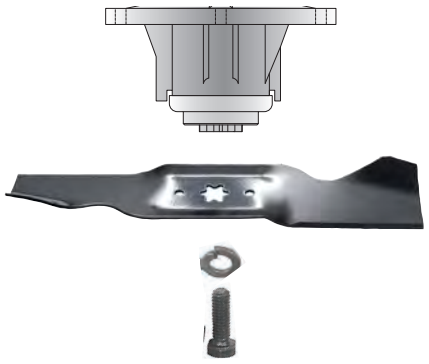


**Square or Rectangular**
The MTD built blades on many walk-behind lawn mowers have a "bow-tie" hole. In this case the Oregon replacement blade will have a rectangular center hole which will fit on the bow-tie pattern on the blade adapter.



**MTD Blades**
The MTD built blades (Bolens, Cub Cadet, Troy-Bilt, White, Yard Machine and Yardman) may have a 6-point star. Oregon replacement blades will have a "Y" shaped center hole which will fit exactly on the 6-point star on the blade spindle.

**The two sizes of the 6-point star.**
If your blade spindle has a bolt and lock washer that holds the blade to the machine, you would use the 11/16" star or "Y" blade



If your blade is secured with a large flange nut, then you would use the 5/8" star or "Y" blade
