⚠ Tygon fuel lines, Oregon fuel lines, and primer bulbs are compatible with up to 10% Ethanol blend fuels unless otherwise stated. Using Ethanol blends higher than 10% may speed deterioration and cause leakage.

## Oregon® Fuel Line

- Oregon Fuel Line is a specially formulated gas and oil vinyl tubing — made for use with lawnmowers, chainsaws, and snowmobiles
- Maintains air tight seal on fittings — even in extreme temperatures
- Translucent material resists swelling or hardening
- Compare to Tygon®

## Universal

**60-036**

**Throttle Control Cable Assembly**
**Left-hand** version
Positive action control, for most popular for panel mounting on riding mowers, tractors, and self-propelled walk-behinds

**60-106**

**Throttle Control Cable Assembly**
Positive action control, steel control with aluminum cover plate
Suggested mounting: panel or bolt thru center
Conduit size: 3/16", conduit length: 48", inner wire dia.: .060"

**60-160**

**Throttle Control Cable Assembly**
Extra long wire and conduit for use on walk-behind mowers with front throttle controls, all steel construction
Conduit size: 3/16", conduit length: 66", inner wire length: 71"

**60-860**

**Throttle Control Cable Assembly**
Same as Oregon® 60-160 but with 48" inner wire
Conduit size: 3/16", conduit length: 43-1/2", inner wire length: 48",
wire travel: 1-1/2"

## AMF / Dynamark / Noma

**46-330** 301503

**Zone Safety Control Cable**
Safety control, blade engagement for walk-behind mowers, 1/4" eyelet on one end, z-bend on the other end
Conduit length: 23", inner wire length: 56"

## AYP

**60-004** 700417

**Throttle Control Cable Assembly**
20" and 22" side and rear discharge, Z-bend
Conduit size: 3/16", inner wire length: 49-1/2"

**46-322** 146323

**Drive Control Cable**
Self-propelled control for 22" self-propelled mower, flexible inner wire with spring on end, Z-bend on spring
Conduit length: 56"

**46-325** 130861

**Zone Safety Control Cable**
Zone control cable for 22" walk-behind push mower model PP751, die cast z-bend on each end
Conduit length: 52", cable length: 59-3/16"

6-gauge battery cable with poly-vinyl insulation

## Batteries & Accessories

**33-500-0** Toro 55-7520, Lawn Boy 684708, Lawn Boy 683637

**Battery**
For all Toro walk-behind mowers with electric start & newer style "S" series Lawn Boy mowers

**42-005**

**Battery Terminal Protector Spray**
10 oz. spray can
Fights battery corrosion
Prolongs battery life

**42-007**

**Battery Cleaner Spray**
16 oz. spray can
Penetrates, loosens and neutralizes all acid corrosion deposits
Assures maximum current flow

**42-001**

**Battery Hydrometer**
Heavy-duty shop version
Measures cell specific gravity

OREGON Description Product Code

## Fuel Stabilizer

**4205M** **Fuel Stabilizer**
Stabilizes fuel and keeps it fresh
Previously 42-912-1
Keeps gum and varnish from developing
Use in any 2-cycle, 4-cycle, gas or diesel engine fuel systems
Promotes easy starts after storage
Convenient easy measure, easy pour bottle
8 oz. bottle, 12 per carton

Mix:
1 oz. Fuel Stabilizer to 2-1/2 gallons gasoline (entire contents of 8oz. bottle will treat 20 gallons of gasoline).

- Oregon Fuel Line is a specially formulated gas & oil vinyl tubing — made for use with lawnmowers, chainsaws, and snowmobiles
- Maintains air tight seal on fittings — even in extreme temperatures
- Translucent material resists swelling or hardening
- Compare to Tygon®

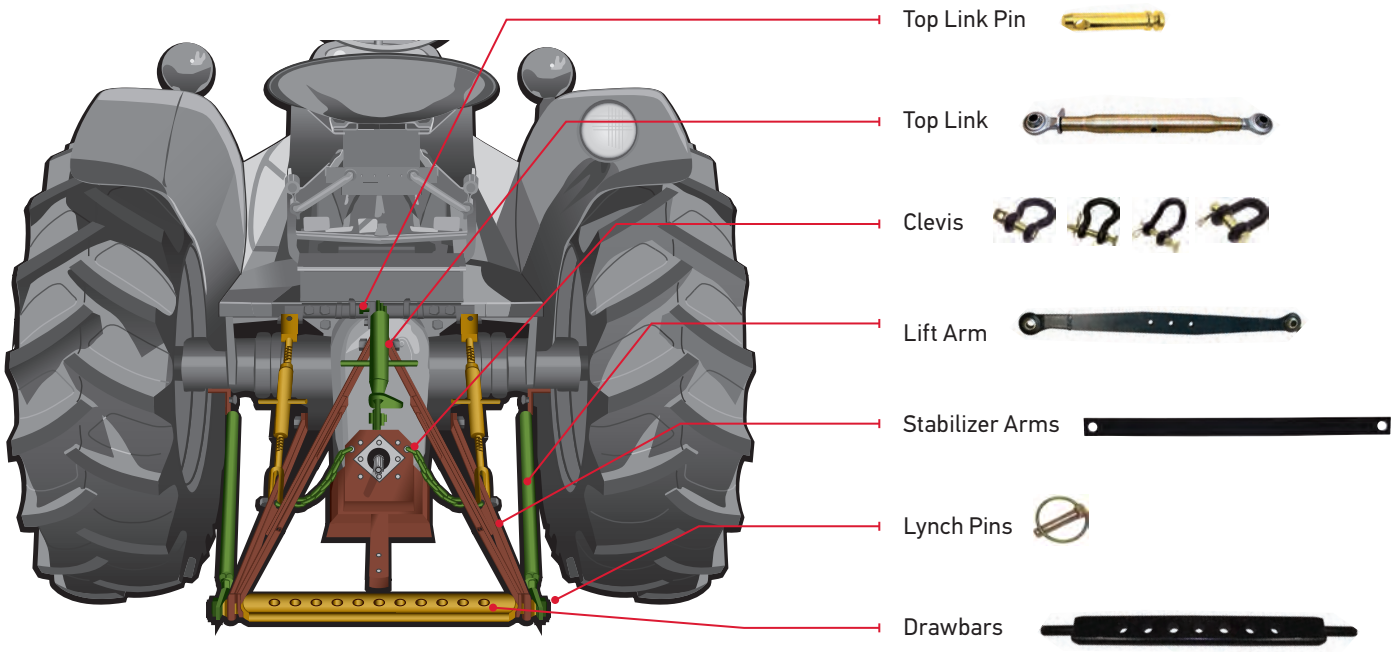
## The Three-Point Hitch System



### Introduction

A typical tractor three-point hitch system is standard on almost all farm tractors today. The basic function of the system is the attachment and adjustment of agricultural implements. The three primary parts of the system are the top link and two lower lift arms as shown in gold and brown in the illustration above. Special pins are used to fasten the implement at these three points: top link pins and draw pins (lift arm pins). Adjustment of one or all of these components allows the tractor operator to raise, lower or tilt an implement. The three-point linkage parts described in this catalog are built to standard specifications set by the American Society of Argicultural Engineers (ASAE) described in the table on the right.

### Category 1, 2, 3, and 4

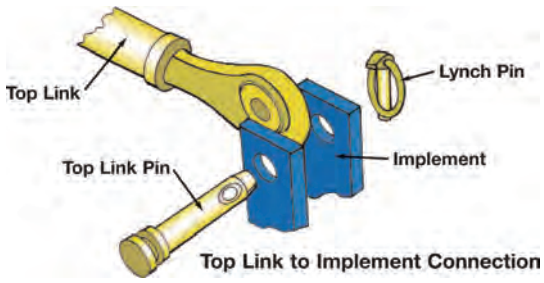
Categories are used to classify tractors by drawbar horsepower. The table below gives the dimensions and the horsepower ratings that are associated with these three categories.

| Maximum Drawbar Horsepower | Top Link Pin Dia. | Pull/Draw Pin Dia. | Stanard Lift Arm Spacing |
|---|---|---|---|
| Cat. 0 - up to 20 | 5/8" | 5/8" | 20" |
| Cat. 1- up to 45 | 3/4" | 7/8" | 26" |
| Cat. 2- 40 to 100 | 1" | 1–1/8" | 32" |
| Cat. 3- 80 to 225 | 1–1/4" | 1–7/16" | 38" |
| Cat. 4- 135 to 300 | 1–3/4" | 2" | 46" |

### Top Link Connection

Top link pins are always unthreaded and are held in place by either a lynch pin, or in some cases, a large “R” clip pin. See below. Top links and top link pins vary in length, but their respective ball socket holes and pin diameters are standardized by horsepower category.

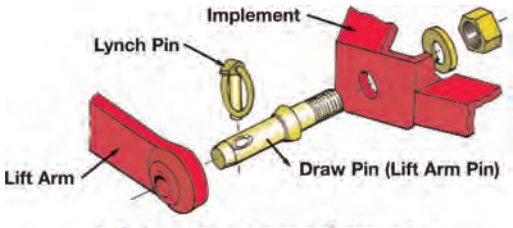
### Top Link Connection



Top Link to Implement Connection

### Lift Arm Connection

Most lift arm pins are threaded on the end that bolts to the implement bracket. The unthreaded end with the cross hole accommodates the ball socket of the lift arm. The lift arm is secured on the pin with a lynch pin or large “R” clip pin. See below. Lift arms and lift arm pins vary in length, but their respective ball socket holes and pin diameters are standardized by horsepower category.



Lift Arm to Implement Connection

## Clevises

# Oil Filters

**Metal Shell**

**Relief Valve Assembly**
Relief valve opens when necessary to provide engine with oil under all conditions

**Perforated Steel Core**
Allows full flow while giving rigid support

**Anti-Drain Back Valve**
Anti-drain back valve prevents oil from draining out of the filter during engine shutdown

**Metal End Cap**
Metal end caps and thermo setting adhesive provide positive seals

**Resin Impregnated**
Paper filter medium
Cured resin impregnated paper removes harmful foreign particle

**Metal End Cap**
Metal end caps and thermo setting adhesive provide positive seals

**Lid Assembly**
Lid assembly is roll seamed to the shell which provides a leak-tight assembly

## Tecumseh

**33-716** — 33835

**Electric Starter Motor**
Fits models HH80, HH100, HH120, HH150, OH,120, OH160, OH140, & OH160

**33-712** — 33605, 35763, 35763A, 36343, 36680

**Electric Starter Motor**
Fits models HM70, HM80, HM100, HMSK90, HMSK100, OHM90, OHM110, OHM120, OHSK90, OHSK100, OHSK110, OHSK120, OHSK130, OHV12, OHV125, OHV13, TVM195, TVM220, TVXL220, OHH50, & TVXL120-170

**33-711** — 36795

**Electric Starter Motor**
Fits models L, LEV, OHV135, OHV14, OHV145, OHV15, OHV150, OHV155,
OHV16, OHV160, OHV165, OHV17, OHV170, & OHV175

**33-791** — 36795

**Magnum Heavy-Duty Electric Starter Motor**
Heavy-duty version of Oregon® 33-711
15% more torque & 15% faster cranking
Quicker starts
Exceeds OEM standards
Heavier gel coat on the laminations
Larger brush surface contact area
Use with Oregon 33-761 replacement brush kit

**33-713** — 37425, 36914

**Electric Starter Motor**
Fits models OH50, OHH50, OHV110, OHV120, OHV125, OHV130, & OHV135

**NOTE**: When used to replace four bolt mount starter, 2 new screws required (included)

**33-739** — 37425

**Magnum Heavy-Duty Electric Starter Motor**
Heavy-duty version of Oregon 33-713
15% more torque & 15% faster cranking
Quicker starts
Exceeds OEM standards
Heavier gel coat on the laminations
Larger brush surface contact area
Use with Oregon 33-761 replacement brush kit

**NOTE**: When used to replace four bolt mount starter, 2 new screws required (included)

**33-738** — 33329E

**Electric Starter Motor 120V**
Fits Snow King Engines TVM, TVXL, & HMSK, & OHSK engines
**CSA Approved**

# Gator® SpeedLoad™

## Trimmer Head & Line System

**FAST, EASY, DURABLE**

It's a revolutionary and Oregon® exclusive string trimmer cutting system.
The system is composed of a durable plastic head and disk shaped line.
The self-contained trimmer line disk makes reloading line fast and easy.

**FAST, EASY, DURABLE**

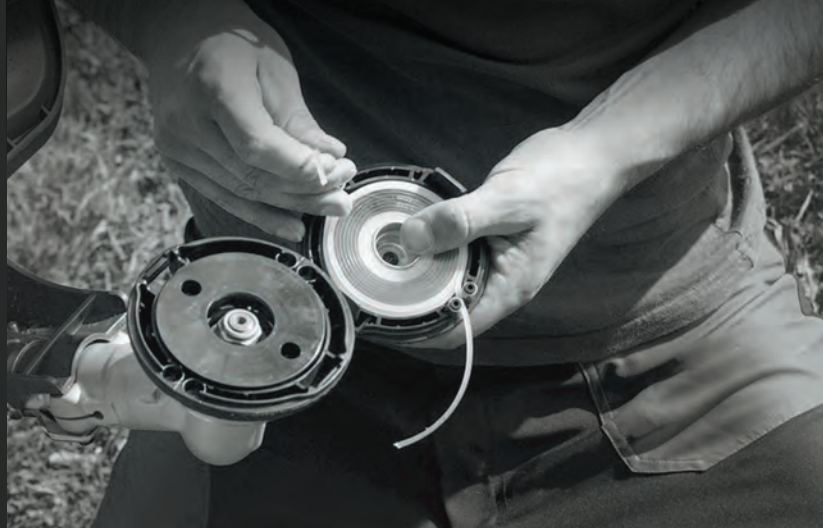
OregonProducts.com/GSL

# Why Gator® SpeedLoad™

Traditional string trimmer, trimmer lines and heads are ***sources of frustration.***

A survey made in May 2015 with 300 professionals and 300 homeowners has indicated that more than 70% of string trimmer users are confronted with problems when dealing with string trimmer accessories.

## NO WINDING, NO HASSLE



*As a great example of Oregon's best-in-class innovation, Gator SpeedLoad heads are available in 2 different package types.*

### RETAIL PACKAGING

The two smaller heads are in a clamshell while the large head is in a cardboard box.

**24-200**

**24-250**

**24-500**

### DEALER PACKAGING

Meant for dealerships and online sales. The two heads will be available in economy cardboard boxes.

**24-200-B**

**24-250-B**

Dealer boxes come in a displayable shipper that folds into an attractive counter display box and holds 6 heads per shipper.

# Gator® SpeedLoad™

**Load in less than 20 seconds**

**Lasts up to twice as long**

**Tested & approved by the largest US landscaping company**

**UNIVERSAL**
Fits most gas brushcutters & trimmers

**PLASTIC HEAD**
Improved toughness,
extremely resistant to wear & shocks

**NO LOOSE PARTS**
Eliminates the hassle and expense of replacing lost parts

**DISK SHAPED LINE**
Each disk represents a full load
No need to deal with messy spools anymore
Fits inside of a pocket and easy-to-carry
Small size means less inventory space
Reduced packaging

**HEAT-TREATED DISK**
Twice the resistance of standard line

**SIDE TAPS**
Easy to open, no tools needed

**TAP AND GO**
Advance the line while trimming

## BioTrim™ Trimmer Line

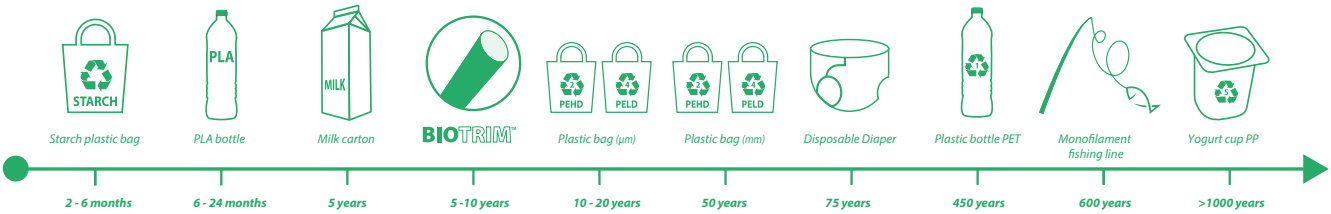
- Oxo-biodegradable material offers quick decomposition compared to standard Oregon® trimmer lines
- Performs similar to Oregon Gatorline® products with comparable applications
- Recyclable material used for packaging components

| OREGON | Package Type | Footage | Product Code |
|---|---|---|---|
| **.080" Gauge** | | | |
| 559046 | 50' Donut | 50' (15 m) | |
| 559050 | 1 lb. Donut | 413' (126 m) | |
| **.095" Gauge** | | | |
| 559047 | 50' Donut | 50' (15 m) | |
| 559051 | 1 lb. Donut | 285' (87 m ) | |

**Oxo -Biodegradability* is a three-fold process:**

1. Photo-oxidation: The line is fragmented by UV light from the sun over a period of 3 years.
2. Thermo-oxidation: Heat continues the fragmentation on the soil.
3. Bio-assimilation: Finally, micro-organisms in the earth consume the remaining elements. The whole process takes between 5 and 10 years (depending on climatic conditions), after which no trace of the line remains. The line will oxo-biodegrade only when in contact with the soil. It remains completely intact and in perfect condition when stored.

**Degradability Scale:**



* OXO-Biodegradability certified by "Le Centre National d'Evaluation de Photo protection" C.N.E.P. – University Blaise Pascal, Clermont-Ferrand, FRANCE. Test protocol C.N.E.P. – SEESIB compliant with BS 8472:2011

T

## Platinum Gatorline™

**Platinum Gatorline** solves many of the problems that aggravate users of traditional trimmer line. An armored exterior – more resistant to breakage than standard line – shields a highly flexible co-polymer core, providing outstanding durability. Platinum Gatorline is also engineered to resist welding up to 498° F (259° C) – much higher than standard line.

Features
- Consistent line diameter
- Armored exterior
- Flexible core
- SuperTwist®

Benefits
- Compatible with most trimmer head systems
- High resistance to abrasion, breakage and welding
- Resistant to cracking and breaking
- Less resistance, engine drag, vibration and noise compared with traditional, round nylon lines

**Important Trimmer Line Information**

Any monofilament trimmer line can lose moisture over time or become brittle, especially if subjected to heat and sunlight. To reduce brittleness, Oregon® strongly recommends that line be submerged in water for 24 hours.

T

# Trimmer Line & Heads

## FlexiBlade™ Trimmer Line

**FlexiBlade** is a revolution in trimmer technology, a patented cutting system with the power to sever weed stalks up to 3/4" in diameter with ease. The extreme cutting force of FlexiBlade for cutting weeds and heavy grass comes from its serrated edges. The serrations act like the teeth of a saw, bringing multiple cutting surfaces into contact with the vegetation being cut. FlexiBlade is made from a proven high-strength reinforced composite material for long-wearing durability.

- Leaves a cleaner cut in grass
- Cuts through dense weeds and berry vines
- Cuts fast, even in heavy cutting conditions
- More cutting power than trimmer line
- Quieter than trimmer line
- Safer than steel weed blades

**NOTE**: FlexiBlade is designed to cut weeds, vines and grass. Avoid contact with concrete, rocks and wood. The sharp teeth can damage trees, walls, and fences. The .099" and .105" diameters can be used in most manual-feed trimmer heads. FlexiBlade is not recommended for most "bump feed" trimmers.

### Donuts & Spools

| Gauge | OREGON | Package Type | Footage | Product Code |
|---|---|---|---|---|

**Important Trimmer Line Information**
Any monofilament trimmer line can lose moisture over time or become brittle, especially if subjected to heat and sunlight. To reduce brittleness, Oregon® strongly recommends that line be submerged in water for 24 hours.

# Trimmer Line & Heads

## Similar to Speed-Feed® Heads, 2-Line

Easy line loading takes 30 seconds or less. No disassembly required. Simply slide line through head until half of amount to be added is on each side of the head, grasp the easy grip collar and wind line in. Rugged semi-matic head is designed for medium to heavy-duty applications. Inner wall reduces debris inside the head and large durable eyelets increase line life. Line tensioning system with split spool reduces vibration. Part numbers 55-294 & 55-265 mount on most straight-shaft trimmers using the included adaptors similar to Speed-Feed.

## Jet-Fit™ Trimmer Heads

An easy-to-load fixed-line head designed for use with FlexiBlade™. These heads also work with all types and sizes of trimmer line, and fit the majority of counterclockwise-turning trimmers. Jet-Fit heads mount on trimmers using the trimmer's blade bolt or nut and one of the basic adapter washers included (8mm, 10mm, 12mm, 15mm) or the reduction-ring adapter for trimmers requiring a 20 mm arbor. The adaptors packaged with Jet-Fit heads also include several others for fit-up to trimmers having different mounting requirements.

**NOTE**: Jet-Fit heads are attached using the trimmer's blade bolt or nut mounting bolts are not packaged with Jet-Fit heads. In Canada, Jet-Fit heads have been replaced with Flexihead™ trimmer heads:

- Oregon® 55-403 is Oregon 55-407 in Canada
- Oregon 55-404 is Oregon 55-408 in Canada

**55-403** **2-Line Aluminum Jet-Fit Trimmer Head**

T

**WARNING:** High-speed cutting tools present risk of serious injury to operators or bystanders from thrown objects or from contact with rotating cutting attachments. Read and follow all instructions below for proper fitting and for safe and proper use of blades and trimmer heads.

## Attention Dealers

OREGON® URGES YOU TO READ AND FOLLOW ALL OF THESE SAFETY GUIDELINES WHEN SELECTING, INSTALLING, SERVICING OR OPERATING ANY CUTTING ATTACHMENTS FOR TRIMMERS OR BRUSHCUTTERS. ENCOURAGE YOUR CUSTOMERS TO DO THE SAME.

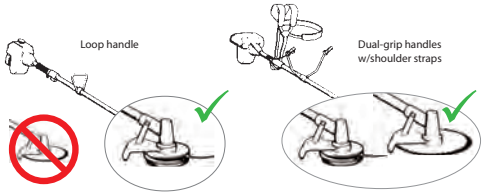
The application charts on the following pages are based on the best information available to Oregon at the time of printing. We take care that listed applications are accurate, but it is your responsibility to assure that Oregon cutting attachments are correctly and appropriately fitted to equipment you service. Some trimmers and brushcutters offer more than one cutting-attachment shield. Be sure to use the appropriate shield for the cutting attachment installed. Inadequate shielding can expose operators and bystanders to the risk of serious injury.

Important safety and maintenance information is often printed on Oregon packaging. When installing new cutting attachments, do not diskard such packaging — give it to your customer.

## Trimmer/Brushcutter Safety Instructions

**Check that cutting-attachment shields are properly located and in good condition. Never remove, modify or in any way compromise the cutting-attachment shield to accommodate a cutting attachment, or for any other reason.** The shield protects against inadvertent contact with the cutting attachment and reduces the risk of the operator and bystanders being struck by objects that may be picked up and thrown violently by the rotating tool. **Read and follow all instructions supplied by the manufacturer of the trimmer/brushcutter.** Manufacturers' instructions include important additional information regarding safe use and proper maintenance procedures for their products.

**Rigid blades must be used only on brushcutters designed to accommodate blades. Never use a metal cutting attachment on a brushcutter without a shoulder harness, properly mounted barrier handlebar and cutting-attachment shield in good condition. Never remove the cutting-attachment shield.** These features are designed to minimize the risk of inadvertent contact with the cutting blade, reduce the risk of injury to the operator and bystanders from thrown objects and to aid in control of the brushcutter. Contact with rigid blades can result in severe bodily injury.



**Be certain that replacement cutting attachments are fitted properly with regard to the direction of rotation, the size of the mounting bolt and the size of the arbor.** Improperly mounted attachments can damage the machine or work loose and be thrown off, causing injury to the operator or bystanders. Do not mount any attachment on any trimmer or brushcutter without a solid, secure fit of all parts.

**Do not install Oregon trimmer heads on any trimmer capable of spinning the attachment faster than 10,000 RPM. And do not install Oregon metal blades on any brushcutter capable of spinning the blade faster than 10,000 RPM.** Speeds higher than these may cause the cutting attachment to break and fly apart, especially if they become damaged in use, with pieces possibly striking and injuring the operator or bystanders.

**Check the condition of cutting attachments frequently. Always replace cutting attachments that are cracked, bent, or warped—even if such damage appears to be superficial. Never attempt to repair damaged cutting attachments by welding or bending.** There is a risk that damaged cutting attachments will fly apart, with pieces possibly striking and injuring the operator or bystanders.

**Always wear eye, face, ear, hand, leg, and foot protection during operation.** These precautions reduce the risk of injury from noise or from material that may be thrown by the cutting attachment. Do not wear shorts or short-sleeved shirts. Wear safety glasses or similar eye protection.

**Keep bystanders and pets at least 50 feet (15m) away in all directions. Always clear the work area of rocks, glass, wire, nails, or other foreign objects that can be picked up and thrown by the rotating cutting attachment.** Trimmers and brushcutters can violently throw loose objects, or uncontrollably thrust away from objects they contact but cannot cut. Keep bystanders away.

**Sharpen or maintain the cutting attachment according to instructions packaged with the attachment.** A dull tool is more difficult to use. Failure to sharpen, or incorrect sharpening of metal blades, can lead to cracks that may result in breakage, exposing the operator and bystanders to the risk of serious personal injury.

**Use cutting attachments to cut only the types of material for which the attachment is designed.** If used improperly, cutting attachments may become damaged and may break, increasing the risk of serious personal injury to the operator or bystanders.

**Diskonnect power to the trimmer/brushcutter before performing any service.** There is always a risk that the cutting attachment will inadvertently be started if the machine is under power.

**Do not install metal blades on curved-shaft trimmers.**

For safety reasons, metal blades should not be attached to straight or curved-shaft trimmers with a **loop-handle**. Use only nylon-line heads on these trimmers.

**Dual-grip handle bar** type trimmers equipped with shoulder straps and proper cutting-attachment shields can accept either metal blades or nylon-line heads.

**WARNING**: Improperly installed trimmer attachments can create a risk of personal injury to the trimmer operator or bystanders. Improperly installed attachments can work loose and be thrown off the trimmer. In some cases, mounting bolts may not securely fit all intended trimmer models, for example: there may be a difference in the size of the bolt's counterbore versus the counterbore on the trimmer. Do not install any attachment on any trimmer without a solid, secure fit of all parts.
**ATTENTION DEALERS**: Install heads only on trimmers that are within the size range (cc displacement or horsepower) for which the head is intended. Performance will suffer if the type of head and the size of trimmer are not properly matched. Read and follow all of the Important Safety Information.

**WARNING**: Improperly installed trimmer attachments can create a risk of personal injury to the trimmer operator or bystanders. Improperly installed attachments can work loose and be thrown off the trimmer. In some cases, mounting bolts may not securely fit all intended trimmer models, for example: there may be a difference in the size of the bolt's counterbore versus the counterbore on the trimmer. Do not install any attachment on any trimmer without a solid, secure fit of all parts.
**ATTENTION DEALERS**: Install heads only on trimmers that are within the size range (cc displacement or horsepower) for which the head is intended. Performance will suffer if the type of head and the size of trimmer are not properly matched. Read and follow all of the Important Safety Information.

**WARNING**: Improperly installed trimmer attachments can create a risk of personal injury to the trimmer operator or bystanders. Improperly installed attachments can work loose and be thrown off the trimmer. In some cases, mounting bolts may not securely fit all intended trimmer models, for example: there may be a difference in the size of the bolt's counterbore versus the counterbore on the trimmer. Do not install any attachment on any trimmer without a solid, secure fit of all parts.
**ATTENTION DEALERS**: Install heads only on trimmers that are within the size range (cc displacement or horsepower) for which the head is intended. Performance will suffer if the type of head and the size of trimmer are not properly matched. Read and follow all of the Important Safety Information.

**WARNING**: Improperly installed trimmer attachments can create a risk of personal injury to the trimmer operator or bystanders. Improperly installed attachments can work loose and be thrown off the trimmer. In some cases, mounting bolts may not securely fit all intended trimmer models, for example: there may be a difference in the size of the bolt's counterbore versus the counterbore on the trimmer. Do not install any attachment on any trimmer without a solid, secure fit of all parts.
**ATTENTION DEALERS**: Install heads only on trimmers that are within the size range (cc displacement or horsepower) for which the head is intended. Performance will suffer if the type of head and the size of trimmer are not properly matched. Read and follow all of the Important Safety Information.

**F** = Female • **M** = Male • **LH** = Left-hand • **RH** = Right-hand • **CB** = Counterbore

**WARNING**: Improperly installed trimmer attachments can create a risk of personal injury to the trimmer operator or bystanders. Improperly installed attachments can work loose and be thrown off the trimmer. In some cases, mounting bolts may not securely fit all intended trimmer models, for example: there may be a difference in the size of the bolt's counterbore versus the counterbore on the trimmer. Do not install any attachment on any trimmer without a solid, secure fit of all parts.
**ATTENTION DEALERS**: Install heads only on trimmers that are within the size range (cc displacement or horsepower) for which the head is intended. Performance will suffer if the type of head and the size of trimmer are not properly matched. Read and follow all of the Important Safety Information.

# Trimmers - Brush Cutter Blades

## Grass & Brush Blades

- Made of Swedish steel to exceed international standards for durability and safety.
- Ground edge can be easily re-sharpened with standard saw chain files.
- Grass and brush blades include a 20 mm reducer bushing for easy mounting on .75" arbors.
- 3 and 4 tooth blades are reversible.

All Oregon® grass-and-brush blades and clearing-saw blades are rated to 13,000 RPM and they are so stamped. However, Oregon recommends that these blades SHOULD NOT be installed on any brushcutter capable of spinning the blade faster than 10,000 RPM.

| OREGON | Blade Dia. | Hole Dia. | Bushing | Thickness | Teeth | Product Code |
|---|---|---|---|---|---|---|
| **Use for cutting and clearing heavy weeds and underbrush** | | | | | | |
| **41-920** | 10" | 1" | 20 mm | 2.25 mm | 3 | |
| **41-921** | 12" | 1" | 20 mm | 2.25 mm | 3 | |
| **Use for cutting grass and weeds** | | | | | | |
| **41-922** | 8" | 1" | 20 mm | 1.5 mm | 4 | |
| **41-923** | 9" | 1" | 20 mm | 1.5 mm | 4 | |
| **Use for cutting grass and weeds** | | | | | | |
| **41-924** | 8" | 1" | 20 mm | 1.5 mm | 8 | |
| **41-925** | 9" | 1" | 20 mm | 1.8 mm | 8 | |

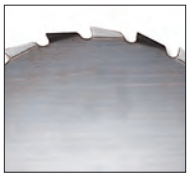
## 3-Tooth Grass & Brush Blades

- Patented design
- Creates airlift to remove debries out of the way of the cutter
- Self-sharpening cutting edge
- Reduces engine drag

| OREGON | Blade Dia. | Hole Dia. | Bushing | Thickness | Teeth | Product Code |
|---|---|---|---|---|---|---|
| **41-938** | 10" | 1" | 20 mm | 4 mm | 3 | |
| **41-939** | 12" | 1" | 20 mm | 4 mm | 3 | |

## Clearing Saw Blades

- Made of Swedish steel to exceed international standards for durability and safety
- Ground edge can be easily re-sharpened with standard saw chain files



All Oregon grass-and-brush blades and clearing-saw blades are rated to 13,000 RPM and they are so stamped. However, Oregon recommends that these blades SHOULD NOT be installed on any brush cutter capable of spinning the blade faster than 10,000 RPM

# The Oregon® Customer Satisfaction Policy

**Oregon Limited Warranty – Replacement Parts***
At Oregon, our goal is help you get the job done right with outstanding products that perform to your full satisfaction.
Oregon | Blount, Inc. warrants its products to be free from defects in materials and workmanship for as long as it is owned by the original retail purchaser.

If for any reason, you are not satisfied with our products, please let us know. Our contact information is listed below.

LIABILITY UNDER THIS WARRANTY IS LIMITED TO REPLACEMENT PARTS AT THE OPTION OF YOUR OREGON DISTRIBUTOR AND OREGON. PLEASE CONTACT YOUR OREGON DISTRIBUTOR OR US DIRECTLY. OREGON PRODUCTS ARE NOT WARRANTED AGAINST NORMAL WEAR AND TEAR, USER ABUSE, IMPROPER MAINTENANCE OR IMPROPER REPAIR.

REPLACEMENT OF DEFECTIVE PRODUCT IS THE EXCLUSIVE REMEDY UNDER THIS WARRANTY AND ANY APPLICABLE IMPLIED WARRANTY. THE REPLACEMENT WILL BE UNDERTAKEN AS SOON AS REASONABLY POSSIBLE AFTER RECEIPT OF THE DEFECTIVE PRODUCT. TO THE EXTENT PERMITTED BY LAW, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE APPLICABLE TO THIS PRODUCT IS LIMITED TO THE DURATION AND SCOPE OF THIS EXPRESS WARRANTY. OREGON SHALL NOT BE LIABLE FOR ANY CONSEQUENTIAL OR INCIDENTAL DAMAGES. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS OR DO NOT ALLOW THE EXCLUSION OF CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU. THIS WARRANTY GIVES THE ORIGINAL OWNER SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS WHICH VARY FROM STATE TO STATE.

**You Have Additional OEM Warranty Protection**
If an original equipment manufacturer (OEM) declines to honor their written warranty solely because you purchased and used Oregon replacement parts in the OEMs product, please read on.

Oregon will allow you to substitute the rights and remedies provided to you under the OEMs written warranty for this express limited warranty. Here's how it works: Send us a written confirmation — from the OEM — that states that the OEM has refused to honor the OEM written warranty solely because you purchased and used Oregon replacement parts in the OEMs product. We are here to help.

**Oregon 120V Professional Series 2-Year Limited Warranty**
Oregon offers the original purchaser a two (2) year limited warranty for products for which they will be the end user, and a ninety (90) day limited warranty for products purchased to rent to other end users. The Oregon 120V Professional Series limited warranty covers the following products: BL120VX-NA Backpack Blower, ST120VX-NA String Trimmer, EHT120VX-NA Hedge Trimmer, EG120VX-NA Edger, BX975-UV Battery, BX650-UV Battery, C1600-NA Charger, CD01120VX-NA Battery-to-Tool Cable, BPBXOR01-UV Backpack, and BPBXSY01-UV Backpack.

**Cordless Tool System 3-Year Limited Warranty †**
At Oregon, we're committed to building better cordless tools to help you do the best job possible. Our commitment is backed by a three-year limited warranty for all Oregon Cordless Tools and Chargers, and a two-year limited warranty for all Oregon Cordless Battery Packs.

**Oregon CS1500 Chain Saw 2-Year Limited Warranty**
Blount, Inc. warrants all Oregon CS1500 Chain Saws for a period of two (2) years for personal use. This warranty is one (1) year for units that have been rented, or used for commercial or industrial use. During the warranty period, Blount will replace or, at its option, repair for the original purchaser only, free of charge, any product or part which is found upon examination by Blount to be defective in material and/or workmanship. The purchaser shall be responsible for all transportation charges and any cost of removing any part submitted for replacement under this warranty.

**Oregon Log Splitter Limited Warranty**
Blount, Inc. warrants all Oregon branded Log Splitters in the following manner: All steel components are warranted for (3) years. 22-ton engines (as rated by the manufacturer) are warranted for (2) years. 28-ton engines (as rated by manufacturer) are warranted for (3) years. Hydraulics are warranted for (1) year.

**You Can Reach Us Several Ways**
We're here to take your calls between 7:30 a.m. and 4:00 p.m. (Pacific Time) Monday through Friday.
Our phone number is 800-223-5168. Or, write to us at: Technical Services Department, Oregon, Blount, Inc., P.O. Box 22127, Portland, Oregon 97269-2127. You can also visit our website at OregonProducts.com. Use the "Technical Information" or "Technical Services" links.

* In this catalog, the Oregon Limited Warranty covers all Oregon products except Oregon Cordless Tool System products, Oregon 120V Professional Series products, Oregon Log Splitter products, and the Oregon CS1500 chain saw product. Product exceptions are warranted under separate warranties.
† Warranty is 2 years if product is used for commercial purposes.
